Chemico-legal Examination of Substances from Native States.

Approving the Resident's suggestion as to the procedure to be adopted in forwarding substances from Travancore and Cochin for examination by the Chemical Examiner at Madras; and ordering, with certain remarks, transmission to Native States within and bordering upon this Presidency of the rules on the subject in force here.

GOVERNMENT OF MADRAS.

POLITICAL DEPARTMENT.

READ—again the following papers:—

G.O., Mis. No. 114, Political, dated 15th February 1896.

ABSTRACT.—Requesting the Resident in Travancore and Cochin to draw the attention of the Cochin Darbar to the unsatisfactory conduct of the local magistracy and police in a case of suspected poisoning in the Trichur Cantonment, and transferring to the Public Department the questions relating to Surgeon-Major Pemberton's conduct in the case.

G.O., Mis. No. 284, Public, dated 25th February 1896.

ABSTRACT.—Communicating to the Surgeon-General Proceedings, Political Department, regarding a case of suspected poisoning in the Trichur Cantonment, and requesting him to obtain and submit a full explanation from Surgeon-Major Pemberton of his conduct in the matter and to report on the relationship which should exist between the Chemical Examiner and (1) the authorities of Native States and (2) British officers circumstanced as Surgeon-Major Pemberton was.

G.O., Mis. No. 703, Political, dated 1st October 1896.

ABSTRACT.—Requesting the Resident in Travancore and Cochin to report as to the procedure to be adopted in future in Native States in forwarding suspected matter to the Chemical Examiner, Madras, for examination.

READ—also the following paper:—

From F. A. NICHOLSON, Esq., Acting Resident in Travancore and Cochin, to the Chief Secretary to Government, dated Trivandrum, 1st February 1897, Ref. on C. No. 3412.

Referring to G.O., No. 703, Political, dated 1st October 1896, I have the honour to reply that, in my opinion, the procedure to be adopted in forwarding substances from Travancore and Cochin for chemico-legal examination at Madras should be that prescribed in No. 2 of the rules printed in G.O., No. 685, Public, dated 24th August 1893, the Resident taking the place of the Magistrate, Superintendent or Assistant Superintendent of Police. As the Resident may be on distant circuit, as in North Travancore, it will be well, in order to avoid delay, to rule that the Assistant Resident shall be authorized to make the order, which is of a formal nature, "for" the Resident in cases of urgency, where the telegraph is not available, the matter being, of course, reported forthwith to the Resident.

2. If this suggestion is approved, I will issue the necessary instructions to British medical officers within the two States, and give intimation of the same to the Darbars.

3. I understand that the cases contemplated are only those in which the medical officers enquiring are medical officers in the British service; all other cases will be dealt with by the local authorities in the usual way.

ORDER—No. 133, Political, dated 1st March 1897.

In his letter read above, the Resident in Travancore and Cochin suggests that, so far as British medical officers are concerned, the procedure to be adopted in forwarding substances from Travancore and Cochin for chemico-legal examination at Madras should be that prescribed in the second of the rules printed in G.O., No. 685, Public, dated 24th August 1893, the Resident (or in his absence the Assistant Resident) taking the place of the Magistrate, Superintendent, or Assistant Superintendent of Police. This course is approved and the necessary additions to the rule referred to above will be made in the Public Department.

2. It is observed that there are no definite rules regulating the transmission of substances for examination by the Chemical Examiner from Native States, in cases where no British medical officer intervenes. His Excellency the Governor in Council, therefore, deems it desirable that Native States within and bordering upon this Presidency should be informed of the rules on this subject which it has laid down for the guidance of its own officers, and that the Chemical Examiner is authorised to undertake work on their behalf at the scale of fees laid down in G.O., No. 1733, dated 26th December 1877. Steps will be taken to invite the Administrations of Native States to communicate to Government the designations of the officers, corresponding to those named in rule 2, on whose order they would wish the Chemical Examiner to take action.

3. The Residents in Mysore and Hyderabad will be addressed.

GOVERNMENT OF MADRAS.

POLITICAL DEPARTMENT.

READ—again the following papers:—

G.O., Nos. 133, 134, Political, dated 1st March 1897.

ABSTRACT.—Approving the suggestion of the Resident in Travancore and Cochin as to the procedure to be adopted in forwarding substances from Travancore and Cochin for examination by the Chemical Examiner at Madras; and ordering, with certain remarks, transmission to Native States within and bordering upon this Presidency of the rules on the subject in force at Madras.

G.O., R. No. 115, Political, dated 5th April 1897.

ABSTRACT.—Forwarding to the Resident at Hyderabad three spare copies of G.O., No. 685, Public, dated 24th August 1893, containing the rules relating to chemico-legal examinations.

READ—also the following papers:—

From the Resident in Mysore, to the Chief Secretary to Government, dated Bangalore, 2nd April 1897, No. 1445.

With reference to your letter, No. 134, Political, dated the 1st ultimo, I have the honour to state that, as they have their own Chemical Examiner, the Mysore Darbar will not require assistance from the Chemical Examiner at Madras in the matter of chemico-legal examinations.

From B. MACLEOD, Esq., B.A., Political Agent for Pudukkottai, to the Chief Secretary to Government, dated Trichinopoly, 7th April 1897, Dis. No. 99.

With reference to the concluding portion of paragraph 2 of G.O., No. 133, Political, dated 1st March 1897, I have the honour to inform you that the Diwan states that the Chief Medical and Sanitary Officer of Pudukkottai State is the only officer on whose order the Chemical Examiner should take action.

From the Resident at Hyderabad, dated 14th April 1897, No. 2175.

From H. A. STUART, Esq., Acting Collector and Political Agent, Bellary, to the Chief Secretary to Government, dated 27th May 1897, Dis. No. 3121.

In reply to paragraph 2 of G.O., No. 133, Political, dated 1st March 1897, I have the honour to report that the designation of the officer on whose requisition the Sandur State would wish the Chemical Examiner to take action is the Administrator of Sandur State.

Letter to the Resident at Hyderabad, R. No. 1157, dated 1st June 1897, Political.

From the Resident at Hyderabad, dated 14th June 1897, No. 3352.

ABSTRACT.—Stating that His Highness the Nizam's Minister has been addressed regarding a chemico-legal examination of substances from Native States, and that his reply will be communicated on receipt.

From F. A. NICHOLSON, Esq., Acting Resident in Travancore and Cochin, to the Chief Secretary to Government, dated Trivandrum, 14th June 1897, Ref. on C. No. 1646.

With reference to G.O., No. 133, Political, dated 1st March 1897, I have the honour to report, for the information of Government, that I have communicated the orders contained therein to the British medical officers stationed in Travancore and Cochin and to the Diwans of those States. The Diwan of Travancore informs me, in reply, that there is a special Chemical Examiner in that State and that it will scarcely be necessary to send up substances to Madras for chemico-legal examination. Should, however, any such necessity arise, the transmission will be through the Darbar and not by the officers direct. For the guidance of the police and magistracy in the State, however, the Diwan proposes to introduce rules similar to those existing in Madras.

2. The Diwan of Cochin accepts the procedure laid down by Government for allowing the Chemical Examiner at Madras to undertake work on behalf of that State. The designations of the officers on whose requisition he would desire the Chemical Examiner to take action are the Superintendent of Police, Cochin, and the District Magistrates of Anjikamial and Trichur.

From E. A. ELWIN, Esq., Political Agent, Kurnool, to the Chief Secretary to Government, dated 8th July 1897, C. No. 95-P.

With reference to paragraph 2 of G.O., No. 133, Political, dated 1st March 1897, I have the honour to report that the Nawab of Banganapalle has appointed his Diwan as the officer under whose order he would wish the Chemical Examiner at Madras to take action.

Letter to the Resident at Hyderabad, dated 17th July 1897, R. No. 206, Political.

ABSTRACT.—Enquiring with reference to the Resident's letter, No. 3352, dated 14th June 1897, when a reply may be expected.

From the Resident at Hyderabad, dated 28th July 1897, No. 4245.

Letter to the Resident at Hyderabad, R. No. 254, dated 1st September 1897.

From T. CHICHELE-PLOWDEN, Esq., C.S.I., Resident at Hyderabad, to the Chief Secretary to Government, dated Hyderabad Residency, 3rd September 1897, No. 4927.

I have the honour to refer to correspondence ending with my letter, No. 4245, dated the 28th July 1897, regarding the chemico-legal examination of substances from Native States, and to forward, for the consideration of the Government of Madras, a copy of a letter, No. 1114, dated the 19th August 1897, and of its enclosure, received from His Highness the Nizam's Minister on the subject.

ENCLOSURES.

From His Highness the Nizam's Minister, Hyderabad, to the Resident at Hyderabad, dated the 19th August 1897, No. 1114.

Kindly refer to the correspondence ending with your letter, No. 1378, of 28th July 1897, regarding the chemico-legal examination of substances from Native States.

2. I now write to say that, under arrangements which have been sanctioned by His Highness' Government, the Director of Medical Department, who has the necessary apparatus, is entrusted with the duty of making all chemical analyses. Should it, however, be found necessary on any occasion to apply to the Chemical Analyser at Madras, there will be no objection to the rules in force in the Madras Presidency.

3. Before issuing the necessary instructions to all officers concerned, His Highness' Government would like to know whether any modification of these rules is advisable in view of the suggestions made by the Director of His Highness' Medical Department, a copy of whose letter on the subject is enclosed.

4. On hearing that the amendments proposed are approved, the rules now in force in His Highness' dominions will be revised accordingly, and intimation will be given as to who are the officers who will be empowered to authorize the translation of substances to the Chemical Examiner at Madras in cases in which an analysis by that officer is considered necessary.

From Brigade-Surgeon-Lieutenant-Colonel C. C. LITTLE, M.D., Officiating Residency Surgeon, and Director, Medical Department, His Highness the Nizam's Government, Hyderabad (Deccan), to the Secretary to His Highness the Nizam's Government, Judicial, Police and General Departments, dated Hyderabad, 26th July 1897 (19th Sharawar 1306 F) No. 414 E.

With advertence to your letter, No. 954, dated 9th May 1897, on the subject of rules for the guidance of Medical, Police and Judicial authorities in connection with chemico-legal examinations, I am of opinion that the rules in force in the Madras Presidency fully meet the object in view and might, with advantage, be adopted by His Highness' Government with the following slight modifications.

2. At the end of paragraph 2 and after the words "adverse to such proceedings" the following sentence may be added: "In every case when any doubt exists, whether on the part of the Medical officer or the Magistrate or Police authorities, it is desirable to obtain the opinion of the Chemical Examiner." At the end of paragraph 1, section 2, after the words "interfered with" add: "An accurate description of the articles despatched, together with any particular marks on them for identification and accurate description of packing arrangements will obviate error in identification." Add footnote to the words "small phial" in paragraph 3, section 2: "Every article brought into actual contact with the material to be examined should be thoroughly clean and free from any alleged impurity." At the end of paragraph 6, section 2, add: "In all cases where earth has been added to the bottles, chatties, boxes, &c., or where the matters have to be removed from the soil, it is advisable to forward a few ounces of the earth as a specimen. This is specially necessary in the case of metallic or inorganic poisons." To paragraph 13, section 2, after the words "should be removed" also add: "As it is not possible with the naked eye to discover the difference between seminal and other stains on the foul clothes usually presented for examination, every stained part of the cloth should be forwarded."

3. In addition I would recommend that spirit of wine, manufactured indigenously 60° over-proof be employed in the packing of articles demanding its use, as it may be obtained comparatively cheap. A certain quantity of this (two gallons would be sufficient for experimental trial) should be supplied to each dispensary together with half-a-dozen large wide-mouthed, clear glass-stoppered bottles.

In issuing the above to districts a circular order should accompany the supplies stating that they are to be used for no other purpose than that specified.

4. I would further suggest that the form of *post-mortem* report in use in Berar—copy of which was forwarded to you with this office letter, No. 164, dated 20th March 1897—be also adopted, in which form medical officers should be required to enter the results of all *post-mortem* examinations.

ORDER—No. 603, Political, dated 11th September 1897.

3.

SIR,

With reference to Public Department
Endorsement No. 2015 dated 29th September 1897,
referring for my remarks a letter from
Brigade - Surgeon - Lieutenant - Colonel Little,
Director of His Highness the Nizam's Medical
Department, proposing certain additions
to the rules in force in the Madras
Presidency relating to Chemical - legal
Examinations, I have the honor to forward
the following remarks seriatim:-

Proposal 1. To add at the end of paragraph 2
Section I: "In every case when
any doubt exists, whether on
the part of the Medical officer
or the Magistrate or Police
authorities, it is desirable
to obtain the opinion of the
Chemical Examiner." This is obvious

1897
Public Dept.
Enclos. No. 1
To
O. No. 3928

the purport and aim of this paragraph
which is sufficiently clear as it stands
and the proposed addition seems
to me to be needless.

Proposal 2. To add at the end of paragraph 1.
Section 2. "An accurate description
"of the articles despatched,
"together with any particular
"marks on them for identification
"and accurate description of
"packing arrangements will
"obviate error in identification".

This is already provided for
by paragraph 10. of Section 2;
and also in the Form of
Post mortem report adopted
for medico-legal cases in
this Presidency, in which

Description of viscera.

Mode of Packing.

Copy of Label attached.

Copy of Seal

Weight of parcel

Mode of despatch.

&c

&c

are all duly provided for,
with a view to preserve the identity
of the article sent for examination

Brigade

Brigade-Surgeon-Lieutenant-Colonel
Little might be provided with
this form for adoption if he
approves of it.

Proposal 3: To add a footnote to the words
"small bottle" in paragraph 3
Section 2. viz. "Every article brought
"into actual contact with the
"material to be examined should
"be thoroughly clean and free from
"any alleged impurity". I do not
quite appreciate the object
of this instruction and cannot
understand the necessity for
warning any medical subordinate
or officer against using bottles
alleged to be impure. Besides
by Section 2. paragraph 1. medical
officers are required "to maintain
"a supply of suitable bottles," and
in paragraph 3 itself the visceral
contents are required to be "received
"into perfectly clean bottles". The
proposed addition appears to be
superfluous.

Proposal 4: To add at the end of paragraph 6
Section 2. "In all cases where
earth

Sample of earth amongst
and other matters have been deposited
then a needless difficulty is ^{introduced} ~~added~~
for such a sample of earth must
be taken from the neighbourhood of
the vomit stained floor and it
is more than probable that the
sample itself would be stained
by the same vomited matter
though it might to all appearances
not be so stained. Dr. Little is
evidently thinking of the possibility
of the defence setting up the
plea of arsenical earth; but
arsenic when it is found in earth
does not exist there usually in
the amounts found in vomited
matters of poisoned persons. On the
whole, I strongly object to this
proposed addition.

Proposal 5. To add to paragraph 13 Section 2
"As it is not possible with
"the naked eye to discover the
"difference between seminal
"and other stains on the foul
"clothes usually presented
"for examination, every stained
"part of the cloth should be forwarded
"to the

The effect of this would be to enormously increase the Examiner's duties quite unnecessarily. The paragraph as it stands requires that "Suspicious" stains should be forwarded. Surely a Medical officer can with the naked eye distinguish a "suspicious" seminal stain from stains caused by oil and dirt &c. If this discretionary power is to be withdrawn, then it would be better to simply direct the whole garment to be forwarded for the Chemical Examiner himself to select the stains.

2. The majority of the proposals it will be seen are needless, being merely explanatory or a repetition of instructions already embodied in the standing rules. Should His Highness the Mizan's Government however wish to incorporate Dr. Little's modifications for use in His Highness' dominions, there is no objection to any of them in
my

my opinion except
I consider that none of them is at
all necessary.

3. In paragraph 4 of his letter
Dr. Little refers to a form of post-
mortem report in use in Berar. If he
uses the form in force in this Presidency
he will find that it meets most
of the points referred to in his proposals.
He may also be glad to have a
copy of the form on which Magistrates
forward their reports to the Chemical Examiners.
I regret that I have not any spare
copies of these forms. They have been
reprinted in G.O. No. 173 Pub. dated
3rd February 1896.

I have the honor to be,
Sir,

THE HON'BLE SIR HENRY BLISS, K.C.I.E.
~~THE HON'BLE MR. GROSE, C.I.E.~~

FOR ORDERS.

para 6 at A

In G.O. 969 Pubd 17. 9. 96
in connection with the inves-
tigation of the attempt to poison
Lt. Russell the Polt Dept was
requested to consider the
question of the procedure to
be adopted in future in Native
States when forwarding
suspected matter to the
Chemical Examiner.

The Residents in
Tras + Cochin, in Mysore
and at Hyderabad, as
also the Polt Agents of
Pudukkottai, Sandur
& Banganapalle were
therefore addressed.

In C 3574 Polt for-
wards their replies and it
is now necessary merely
to

to make the requisite addition to para 2 Section 1 of the rules on page 4 of G.O. 685 Ptdy 24.8.93 C specifying what officers in Native States are authorized to forward suspected substances to the Chemical Examiner.

These are:

1. In Travancore..... The Resident or Asst. Res.
2. In Cochin.....
 1. The Deputy Police
 2. The Asst. of the Kamial
 3. - - - - - Trichur
3. In Madakkottai..... The Chief Magistrate & Sany Officers
4. In Sandur..... The Administrator
5. In Mangalore..... The Duran

Mysore is prepared to do its own chemico-legal work and the list would therefore be complete but for Hyderabad which holds over its ~~Communication Section~~

officers pending a reply to certain amendments proposed in the rules vide para 4 of the Minister's letter

just before

letter no. 1119 dated 19.8.97 and Mr. Say. Jt. Col. Little's letter below it. The letter referred to, with the latter communication referring to the form of post-mortem report in use in Berar has not been forwarded by the President.

Dr. Little's suggestions were referred to the Chem. Examiner and the Surg. General for remarks (sent. 20.11.97 Ptdy 29.9.97). These are given in C. 3928.

It will be seen that the Chem. Examiner considers that the majority of the proposals are superfluous, though he strongly objects to proposal 4.

It may be noted that in his letter no. 1119 of 19.9.97 the Minister observes that the Director of Ind. Dept. who has the necessary apparatus, is entrusted with the duty of making all chemical analyses.

The chance, therefore, of any substance being sent to the Chemical Examiner, Andras, is extremely remote.

Under these circumstances there seems to be

no necessity for the
Chemical Examiner and the
Director of the Nizam's Med.
Dept. to carry on a controversy
as to the minutiae of the
methods to be adopted in packing
or suspected substances.

If the Nizam's
Govt. wish to avail themselves
of the services of the Chemical
Examiner, Madras, they then
should be informed that they
should comply with the Rules
in force in this Presidency, a
copy of which may be com-
municated to them for their
purpose.

on the other hand
the Nizam's Govt.
with H. H. the Nizam's Govt.
it is presumed, please
themselves in the matter of Rules
to be used in the dominions
of H. H. the Nizam, and there
seems to be no point in
forwarding the Chemical Exam-
iner's objections to Dr
Little's proposed modifications
of these rules.

on the Nizam's Govt.
or intimating the names of the

officers who are authorized to
forward substances to the
Chemical Examiner the necessary
addition will be made to para
2 sec. 1. of the Rules.
