NOVEMBER.

Supply of Diet Articles to Presidency Hospitals.

Passing orders on the letter from the Surgeon-General submitting, with remarks, the final reports of the Committee appointed to consider the question of the issue of rules to regulate the —.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following papers :—

From Surgeon-General C. SIBTHORPE, C.B., F.R.C.P.I., Surgeon-General with the Government of Madras, to the Chief Secretary to Government, dated Camp, Ootacamund, 15th September 1899, No. T-8/556.

I have the honour to report that, on receipt of G.O., No. 1484, Public, dated 8th December 1898, I appointed, in January 1899, a special committee composed of the marginally-noted medical officers for submission of a complete report called for in the above order.

President.
Lieutenant-Colonel W. R. Browne, I.M.S.
Member.
Lieutenant-Colonel A. J. Sturmer, I.M.S.
Member and Secretary.
Captain W. Vickers, I.M.S.

2. Copies of the reports of the committee (which sat on two occasions), with the remarks of the Accountant-General thereon, are herewith forwarded for the information of Government.

3. *Paragraph 2 (i) of the Government Order.*—As regards the classification of hospital requirements, it is observed that, in some cases, it is absolutely necessary that the same article should appear under two different heads, such as arrowroot is an article of food and is also used for dispensary purpose, and this cannot be avoided. A copy, however, of the revised list is enclosed for the information of Government. As already approved by Government, the list will be liable to revision by the Surgeon-General from time to time as circumstances may require.

4. *Paragraph 2 (2).*—The bed-head ticket remains in the ward until the patient is discharged. But if he remains in hospital for more than a month a new ticket is prepared and put on his bed on the 1st day of each succeeding month and the old one temporarily filed in the steward's office. The only time the ticket is away from the ward is during the short time the diet sheets are compiled in the steward's office, which does not occur until after the visit of the medical officer in the wards.

5. *Paragraph 2 (4).*—(1) The adoption of Financial Form No. 2 proposed by the Accountant-General is only extra clerical labour, as the information required by him can be easily ascertained from the acquittance rolls maintained. For drawing pay, Form No. 6 (copy enclosed) of the Civil Account Code shall continue to be used, but the medical officers must of course maintain office copies of such bills as observed by the Accountant-General in his last report.

(2) The adoption of Financial Form No. 4 is considered by the committee as practically impossible. The Accountant-General also states that the separation of European and Native diets need not take place as they are separately shown in the diet rolls. I concur in their views and am of opinion that the present Financial Form No. 4, as used in the General Hospital, should be adopted in preference to that printed in the Government Order under reference.

(3) The committee and the Accountant-General propose to discontinue the use of Financial Form No. 6 and to continue the form now in use in the General Hospital. I concur in this proposal as the particulars shown in Financial Form No. 6 will, under the new system, appear in the contingent register.

(4) Financial Form No. 7 now used in the General Hospital is also recommended for adoption, alterations having been made in it in accordance with the Auditor's report on the account of the hospital. This is concurred in by the Accountant-General. A bound book of simple receipts for refund or advances of hospital stoppages will be maintained to prevent loss of loose sheets.

6. A complete set of financial forms duly numbered, at present in use in the General Hospital, is also attached to this correspondence and the printing of instructions at the foot or on the back of each form will be attended to as soon as they are finally approved by Government.

7. With reference to paragraph 3 of the order, I have the honour to state that the rules printed in Appendix B to G.O., No. 1022, Public, dated 19th September 1896, require no modification except the following addition to paragraph (iv) of the instructions printed on page 11 and the inclusion of the revised list of extras (copy enclosed) in those printed in Appendix B on pages 17—20 :—

“Kerosine-oil should be stored in steel drums. If stored in any quantity, care should be taken that no lights should ever be allowed in the store-rooms in which the drums are kept.”

I request that Government will be pleased to pass early orders on this letter.

ENCLOSURES.

From the Secretary to the Diet Committee, Madras, to the Secretary, Surgeon-General with the Government of Madras, dated 17th April 1899.

I have the honour to submit the following report of the diet committee appointed by the Surgeon-General.

Paragraph 2 (1) of Government Order.—Regarding the remarks that more than one article appears under different heads, the committee note that, under certain circumstances, this cannot be avoided, e.g., arrowroot as a food is correctly placed under articles of diet, whereas arrowroot issued for dispensary purposes must be included under the head of hospital necessities. If it were excluded from the latter list it could not be issued for dispensary purposes. A manuscript copy of articles arranged alphabetically is attached.

2. *Paragraph 2 (2) of Government Order.*—Regarding bed-head tickets these remain in the ward until the patient is discharged, should this event occur within any current month, if not on the 1st day of each succeeding month a new bed-head ticket is made out and put over the patient's bed and the old one being sent to the steward's office for temporary filing. The only time the bed-head ticket is away from the ward is during the short time that the compilation of diet sheets is being made up in the steward's office. This removal does not occur ordinarily until after the medical officer's visit, should he however visit his ward after its removal, he could easily obtain it from the steward's office should the nurse or the patient be unable to give him the information he required about the diet.

3. *Paragraph 2 (4) of Government Order.*—Concerning the financial forms the committee have to note that since they met some minor changes have been introduced (chiefly to meet the wishes of the Auditor), and as their final adoption rests with the Surgeon-General and the Accountant-General, the committee have only to offer the following observations for approval :—

Form II.—The Accountant-General proposes that this form should show fuller details than is at present the case, but the method pursued at the General Hospital gives even more detail than the Accountant-General's proposed plan. What is now done is that a manuscript copy of all bills giving the full details of each is made out and this is sent to the Surgeon-General along with Form II; in the latter the totals under each heading but not the details are given. Form II is then countersigned by the Surgeon-General and returned to the hospital for transmission to the Accountant-General, but the manuscript copy of the bill containing the details is retained in the Surgeon-General's office. The committee recommend that the copy of the bills should accompany the countersigned abstract (Form II) which will obviously provide all

the details suggested by the Accountant-General's new method of filling in Form II and in a better way for future reference.

Form IV.—The committee think that the present Form IV as used in the General Hospital should be adopted in preference to that printed in G.O., No. 1484, Public, dated 8th December 1898, seeing that it meets with all the requirements of the present system of showing "contingent charges."

Form VI.—The present Form VI, as used in the General Hospital, is recommended in preference to that published in the Government Order under reference. Form VII as now used in the General Hospital is recommended instead of the older form as the alterations are in accordance with the Auditor's report on the accounts of that hospital. The committee find that there is no form showing "refund of hospital stoppages" amongst the Accountant-General's proposals. They consider such a form, as is at present in use in the General Hospital, absolutely necessary and attach a sample which they recommend for adoption, suggesting it being numbered "Financial Form No. X" which will involve renumbering the present Forms X and XI to XI and XII.

A complete set of financial forms now used in the General Hospital is attached to this correspondence for convenience and ready reference.

4. With reference to the Surgeon-General's letter, No. 345, dated 18th January 1899, the Committee report as follows:—

His paragraph 2 (1).—It is not quite understood what is required.

His paragraph 2 (2).—Has been complied with and resubmitted in manuscript form.

His paragraph 2 (3).—The forms cannot be numbered at this state until it is known whether they will be accepted by the Accountant-General.

His paragraph 4.—The formula can be embodied in the general list of sanctioned extras.

From the Accountant-General, to the Surgeon-General with the Government of Madras, dated Fort St. George, 8th June 1899, No. O. 2469.

The papers are returned with the following remarks:—

In clause (4) of paragraph 2 of the Government Order, it is observed that the Surgeon-General and the Accountant-General may be left to come to a decision regarding the financial forms drawn up by the Accountant-General. This observation was made with reference to paragraph 9 of letter No. T-2/225, dated 17th July 1897, from the Surgeon-General to the Chief Secretary, in which it is stated that the forms suggested by the Accountant-General are accepted by the Committee with the exception of Financial Forms Nos. 2 and 4.

2. As regards Financial Form No. 2, the Surgeon-General suggested that, if it was to be used for the existing pay abstracts, additional columns should be opened.

The object of the form has been misunderstood as explained in this office letter, No. 443, dated 3rd February 1899. It is intended as a permanent record from which, if kept up to date, can be immediately ascertained at any time the sanctioned appointments and the names and actual pay of the persons holding them for the time being.

For drawing pay of establishment the form now in use (Form No. 6 of the Civil Account Code) should continue to be used.

3. As regards "Financial Form No. 4", the separation of European and Native diets is necessary as pointed out by the Surgeon-General in his letter abovementioned, and the form now in use in the General Hospital, which the committee now recommend, is also objectionable because it includes a number of unnecessary headings and mixes up supplies and services (sanitary charges and lime-washing charges) with ordinary contingencies. At the same time the form printed in G.O., No. 1484, Public, dated 8th December 1898, seems defective, inasmuch as it also does not clearly separate "supplies and services" from other contingencies. The best plan

would seem to be to substitute the following for the columns from "bedding" to "punkah machinery", both inclusive, of the form printed in the Government Order columns headed—

Bedding and clothing.

Medicines supplied by the Medical Store Depot.

Country medicines.

Other medicines not procurable at Medical Store Depot.

Hospital necessities.

Funeral expenses.

Three blank columns for other heads of supplies and services for which separate budget grants have been sanctioned. One column for each of the contingent heads as given at page 217, Madras Treasury Manual (which amalgamate many of the heads now in use), as explained in this office Circular No. ^{T. General 97}, dated 20th May 1899, copy attached).

4. The committee now object to the contingent bill forms proposed by Mr. Harrison and propose that the form now in use should be retained, the desired particulars being given in a separate detailed statement of tradesmen's bills. Provided that the statement follows the arrangement proposed by Mr. Harrison, the perishables, non-perishables and wines and spirits being shown separately and provided the details in the statement clearly work up to the totals in the contingent bills, I see no objection to this. The form of the bill will be altered by reducing the number of contingent heads as explained in paragraph 3.

5. The committee also propose an alteration of Financial Form No. 6, "Abstract of departmental purchases". The use of this form is not clearly understood. It seems to have been copied from Civil Medical Form No. 36 formerly recommended by the committee and printed in G.O., No. 1022, dated 19th September 1896. I have no objection to the form now proposed being substituted for it if it is really necessary, but all the information it is intended to contain is recorded in the contingent register. If it is retained at all the best plan could seem to be to combine it with Form No. 5. If the headings of the money columns were made identical with the headings in the contingent register, it might then be found to facilitate the posting of the contingent register.

6. The committee propose to substitute for Financial Form No. 7, "Register of hospital charges" a register now in use in the General Hospital on the ground that the latter is in accordance with the Auditor's report on the General Hospital. The only alteration proposed in that report was the substitution of a column for "Number and date of bill" for the column "Date on which bill sent." Sundry other alterations have also been made to which there seems to be no objection. The word "advances" however seems less appropriate than "collections".

7. The committee recommend a form of receipt for refund of hospital stoppages or rather advances. This seems unobjectionable except that it is not clear why it should be in counterfoil book form. A simple receipt is all that is wanted in such cases.

8. With reference to the Surgeon-General's remarks in his letter above mentioned that each Superintendent will have to print forms of a size suitable for the requirements of his hospital, I forward a copy of a letter of the Superintendent, Government Press, in which he specifies the standard sizes that should be used for the sake of economy.

From W. H. DAWSON, Esq., Officiating Accountant-General, to all Collectors and Treasury Officers and Heads of Departments and Offices, dated Fort St. George, 20th May 1899, No. ^{T. General 97}.

I have the honour to forward herewith a ^{copy}_{copies} of the Madras Treasury Manual, and to invite your special attention to chapter 6 thereof, which contains revised instructions regarding contingent expenditure which have been approved by Government in its Order No. 550, Financial, dated 24th April 1899.

2. It will be observed from Appendix E to the Manual that countersignature which was hitherto required in the case of contingent expenditure of the following officers has been dispensed with under the new system. In these cases, therefore, contingent expenditure should not be drawn on abstract bills (Form 11, Civil Account Code), but on detailed bills (Form 12, Civil Account Code), as laid down in paragraphs 85 to 87 of the Treasury Manual:—

3. LAND REVENUE—LAND RECORDS

3. LAND REVENUE—LAND RECORDS AND AGRICULTURE—
Deputy Director.
12. REGISTRATION—
District Registrars.
- 19-A. LAW AND JUSTICE—
Sub-Judges.
District Munsifs.
20. POLICE—
Commissioner of Police.
Deputy Inspectors-General of Police.
Deputy Superintendents of Police.
Inspector of Steam-boilers.
21. MARINE—
Agent for Government Consignments.
22. EDUCATION—
Inspectors, Inspectresses and Assistant and Sub-Assistant Inspectors.
Heads of Colleges (excepting College of Agriculture).
* Heads of Schools.
Curator, Oriental Manuscripts Library.
Registrar of Books.
Secretary, Teachers' Certificate Examinations.
23. ECCLESIASTICAL—
Chaplains and Lay Trustees.
24. MEDICAL—
District Medical and Sanitary Officers.
Medical Officers in charge of Hospitals and Dispensaries.
Principal, Medical College.
Superintendents of Lunatic Asylums.
26. SCIENTIFIC, &c., DEPARTEMENTS—
Government Examinations—
Superintendents of Examinations.
Superintendent and Deputy Superintendent of Civil Veterinary Department.
30. STATIONERY AND PRINTING—
Officers specified above.
32. MISCELLANEOUS—
Officers specified above.

Particular care must be taken not to exceed, without previously obtaining an extra grant, the amount allotted to each officer under any detailed head.

3. Government has also sanctioned a reduction in the number of contingent heads as follows :—

Purchase of European articles.....	68
" " "	97
Total	165

- | Number of contingent heads | |
|---|---|
| Purchase of European articles each costing less than Rs. 5. | These should be shown under one head "Purchase of Furniture." |
| Purchase of European articles each costing not less than Rs. 5. | |
| Purchase of country articles each costing less than Rs. 50. | |
| Purchase of country articles each costing not less than Rs. 50. | |
| Record-racks, boards, &c. | |
| Rattan-mats and blinds. | |
| Table cloth. | |
| Office scales and weights. | |

• Expenditure on account of postage, library, prizes, furniture, and petty construction and repairs in Government girls' schools should be drawn by the Sub-Assistant Inspectors of the Schools concerned. Only petty office contingencies should be drawn by the heads of the schools.

These should be shown under
"Office Expenses."

These should be shown under
"Tour Charges."

} These should be shown under
"Cleaning Charges."

The heads mentioned on the left side should therefore be scored out of the treasury accounts and contingent register and the newly-prescribed heads inserted. Revised forms of contingent bills, registers and treasury accounts will be supplied as soon as the stock in hand is exhausted.

4. It should be noted in this connection that, under G.O., No. 1258, Financial, dated 27th December 1898, expenditure on account of periodicals and newspapers should not in future be shown under the departments in which it is incurred, but under the major head "32. Miscellaneous"—in all cases. Cost of books will continue to be shown in the accounts as heretofore.

From the Acting Superintendent, Government Press, to the Accountant-General,
dated 2nd June 1899, No. 144-Store.

With reference to your letter No. O.A.—2129, dated 31st May 1899, I have the honour to state that it is a general rule for *blank forms* and *job works* to be restricted as far as possible to double foolscap and royal sized papers or *regular divisions thereof* as shown below :—

Double foolscap	..	..	..	..	..	..	17" $\times$ 27"
Single foolscap	..	..	..	..	..	..	13 $\frac{1}{2}$ " $\times$ 17"
Foolscap folio	..	..	..	..	..	..	8 $\frac{3}{4}$ " $\times$ 13 $\frac{1}{4}$ "
Foolscap quarto	..	..	..	..	..	..	6 $\frac{3}{4}$ " $\times$ 8 $\frac{1}{2}$ "
Royal ..	..	..	..	..	..	..	25" $\times$ 20"
Royal folio ..	..	..	..	..	..	..	12 $\frac{1}{2}$ " $\times$ 20"
Royal octavo	..	..	..	..	..	..	9 $\frac{1}{2}$ " $\times$ 6 $\frac{1}{8}$ "

The adoption of these standard sizes avoids all cutting to waste, besides being a great convenience to the press and other offices as few sizes have to be stored.

2. Government has approved of the purchase of double foolscap writing paper in G.O., No. 1060, Public, dated 28th July 1887, and the supply of double double pott and medium sizes were ordered to be discontinued in G.O., No. 493, Financial, dated 20th June 1888. Brown cartridge royal was prescribed for covers and packing, and foolscap cream wove 14 lb. for demi-official covers in G.O., No. 908, Financial, dated 4th December 1890—see also Stationery Rules, page 10.

The following sizes have been fixed for *book work*, and Government publications are now restricted to one of these sizes—*vide* G.O., No. 950, Public, dated 22nd July 1898 :—

Foolscap folio	..	..	..	..	..	..	..	13 $\frac{1}{2}$ " x 8 $\frac{1}{4}$ "
Imperial octavo	..	..	..	..	..	..	..	10 $\frac{3}{8}$ " x 6 $\frac{3}{8}$ "
Royal octavo	..	..	..	..	..	..	..	9 $\frac{7}{8}$ " x 6 $\frac{1}{8}$ "

From the Secretary to the Diet Committee, to the Secretary to the Surgeon-General with the Government of Madras, dated 25th July 1899, No. 558.

The Committee report as follows with reference to minute III, Accountant-General's No. O-2469, dated 8th June 1899, addressed to the President by mistake.

Accountant-General's paragraph 2.—The adoption of Financial form No. 2 appears to be only extra clerical work. The Accountant-General gives as his reason for the adoption of the form that "all sanctioned appointments and the names and actual pay of the persons holding them can be immediately ascertained at any time by a reference to this form." The Committee note that the establishment acquittance roll furnishes all such particulars and is of opinion that this form should suffice. There seems no adequate reason for this reduplication. For drawing pay form No. 6 of the Civil Account Code shall continue to be used as heretofore and no modification is therefore required.

Accountant-General's paragraph 3.—The Committee note that it is a practical impossibility to separate the cost of European and Native diets with the present system of storing articles in bulk—as a simple illustration take one individual article of diet, viz., "rice." 20,000 lbs. are purchased and stored for a period of six months. The bill is drawn on the Accountant-General and the amount paid to the seller. It is beyond the comprehension of the Committee how the cost of this rice can be divided between European and Native diets before issue. The Accountant-General's plan could only be carried out, if the storage system were abolished, and if the exact quantities of the diet articles were obtained daily.

The Committee point out that the Surgeon-General is under (paragraph 9 of his letter No. T. 2—225, dated 17th July 1897) a misapprehension on this point of keeping the cost of European and Native diets separate. They are and will be kept separate in the diet rolls, but what the Accountant-General is referring to is the separation of the cost of the supplies put into the store-room and which cost is shown, of course, in Financial form No. 4 under the head of "Diet of Patients" until the whole of the bulk supply so put in is exhausted and which may occur six or more months' afterwards; it is impossible to say what proportion will come under the heads "European and Native", respectively, and if it were then worked out by much clerical labour it is impossible to see the utility of the labour. Month by month the cost of each diet in the hospital is known from the diet rolls and is worked out daily.

Since the receipt of the New Treasury Manual, the Committee note that Financial form No. IV must, of course, be revised in accordance with the headings shown in the Manual. A manuscript copy of such form proposed by the Committee is attached for approval.

The Committee wish to note that so recently as 1896 (G.O., No. 309, Financial, dated 2nd May 1896) elaborate details under the head of contingencies were required to be shown, whereas in the new Treasury Manual many of these headings are now grouped under one head. If there are to be constant changes in the method of showing "contingencies", much confusion will arise in the accounts.

Accountant-General's paragraph 4.—The Committee see no objection to the arrangement proposed by Mr. Harrison, viz., to show perishables, non-perishables and wines and spirits separately in the detailed statement.

Accountant-General's paragraph 5.—What appears to the Committee the best plan is to discontinue the use of form 6, as the particulars hitherto shown in this form must now be shown in the contingent register itself.

Accountant-General's paragraph 6.—The form at present in use in the General Hospital and which is attached to the Proceedings should be adopted. The word "advances" appears to the Committee to be appropriate as money received under that head is paid in advance by the patients, whereas the word "collection" rather infers that the money is collected after the discharge of the patient.

Accountant-General's paragraph 7.—The Committee approves of a simple receipt being maintained but bound in a book to prevent loss of such receipts.

Paragraph 2 of minute IV, Surgeon-General's No. 2485-5, dated 21st June 1899.—The only modification to paragraph IV in appendix B of G.O., No. 1022, Public, dated 19th September 1896, that occurs to the Committee is to add the following:—

"Kerosine-oil should be stored in steel drums. If stored in any quantity, care should be taken that no lights should ever be allowed in the store-rooms in which the drums are kept."

A revised list of extras is attached.

Paragraph 3.—It is necessary that final approval of the forms to be used should be first arrived at before the instructions for their individual use need be considered.

From the Accountant-General, to the Surgeon-General with the Government of Madras, dated Fort St. George, 19th August 1899, No. O.A.-5562.

With reference to the Diet Committee's Report No 558, dated the 25th July 1899, referred to me for remarks under your endorsement A.C. No. 1114—6, dated 1st August 1899, I have the honour to observe as follows.

2. *Paragraph 2.*—As the Committee object to Financial form No. 2, in lieu of it the maintenance of office copies of pay abstracts rendered to the Accountant-General, which contain the necessary particulars of all sanctioned appointments, should be prescribed.

3. *Paragraphs 3 and 4.*—The separation of the cost of European and Native diets in Financial form No. 4 need not take place.

4. *Paragraph 5.*—*Manuscript Form.*—The heads in the Treasury Manual should be adopted.

"Repairs to clocks" goes to "Repairs to furniture."

"Purchase of crockery" to "Purchase of furniture."

The heads "Purchase of books" and "Periodicals," "Nurses' uniform", and "Servants' clothing" may be separately shown.

APPENDIX.

SUPPLIES AND SERVICES AS DETAILED IN G.O., No. 309, FINANCIAL, DATED 2ND MAY 1896.

Formulæ for preparation of Extra Diets.

- Arrowroot blanc mange—

Arrowroot	..	oz.	1
Sugar	..	..	1
Lime	..	..	1
Milk	..	..	1
Ice	..	..	1
- Arrowroot conjee, per pint—

Arrowroot	..	oz.	1
Sugar	..	..	3
Milk	..	..	3
- Arrowroot jelly—

Arrowroot	..	oz.	1
Sugar	..	..	1
Egg	..	..	2
Milk	..	..	2
- Barley water, 1 pint—

Barley	..	oz.	2
Sugar	..	..	1
- Beef-juice, 1 lb.—

Hydrochloric acid	..	drops	40
Salt	..	..	1

 or prepare as follows:—Mince the beef and put in a jar adding 60 grains of salt to one pound of beef, cover the jar with paste and leave it in hot water near fire for three hours and then strain the juice with a clean piece of muslin.
- Beef-tea, 1 pint—

Beef, without bone	..	oz.	12
Salt	..	..	60
Pepper	..	..	10
- Beef-tea, jugged—

Beef	..	..	16
Salt	..	..	60
Pepper	..	..	20

 Water sufficient to just cover meat when placed in jar. To be jugged for three hours.

Public DEPARTMENT.

With reference to G.O. No 1484 Public, dated 8.12.98, the Surgeon General submits the final report of the Committee appointed to consider the question of the issue of rules to regulate the supply of diet articles to Prisoners.

2. The only points on which further report was called for in the G.O. above quoted, were:—

(1) The revision of the index to the classification of hospital requirements.

(2) The question as to whether the

(3) the audit of hospital accounts.
(4) used.

3. Items (1) & (2) are dealt with in paras 3 & 4 of the Surg. Genl's letter, & appear to require no further remarks. The alphabetical arrangement of the index to hospital requirements has been attended to, & it is explained why the same articles sometimes appear under different heads. It is also explained that bed-head tickets remain in the ward until a patient is discharged, but that if he remains over a month, a new ticket is put on his bed on the 1st day of each succeeding month.

4. Item (3), the question of the audit of hospital accounts, was finally disposed of by G.O. No. 5-11, Public, dated 6.5.29, & No. 246, Public, dated 31.7.29, & under which the audit will be undertaken by the Asst. Genl.

5. As regards the financial

forms, in clause (4) para 2 of G.O. No. 1484, Public, dated 8.12.28, it was left to the Surgeon Genl & to the Asst. Genl to come to a decision on the matter between themselves. The Committee has now made certain suggestions which have been accepted by the Asst. Genl & the Surgeon Genl, & it only remains to approve the forms as finally settled by the above authorities.

6. As regards the rules printed as Appendix B to G.O. No. 1022, Public, dated 1.12.28, the Surgeon Genl reports that they require no modification, except an addition regarding the storage of kerosine oil, & the inclusion of a revised list of quantities. With these additions, the rules may be finally approved for adoption.
