INSTRUCTIONS.

GAZETTED OFFICERS ONLY.

With the cognizance of the head of his office, or if he is himself the head of the office, of the head of his department: the applicant must present himself with 3 copies of the statement of his case in a cover sealed by his medical attendant at the seat of the Government under which he is serving, or at such other place as may be appointed by that Government where a committee of medical officers can be assembled under the orders of the Surgeon-General. The board should see that the applicant fulfils these conditions.

Before deciding whether to grant or refuse the certificate the medical board may in a doubtful case, detain an applicant under professional observation during a period not exceeding fourteen days.

If it can be avoided, the medical attendant on a case should not be a member of the board which considers it, and under no circumstances can he sit as president. He should, however, be required to attend the board to furnish any information whenever his presence is considered necessary.

The medical board, after a careful examination of the officer, and consideration of the medical attendant's statement of the case, will record in the proceedings as follows:—

- (a) Whether change of climate *in or out of India* is necessary.
- (b) The period of absence recommended in or out of India, care being taken that leave in excess of the period to which the sick officer is entitled by regulations is not recommended.
- (c) In the case of an officer requiring furlough or leave of absence owing to illness caused directly by intemperance, the medical board, whilst recording their opinion, will confine their recommendation to the officer appearing periodically before fresh boards, or to the treatment of the case as one of discipline, whichever may be deemed necessary.

In urgent cases when a medical board considers it absolutely necessary that an officer recommended for change of air, *either in or out of India*, should proceed in anticipation of sanction, a recommendation to that effect should be made in the proceedings.

STATEMENT of the case of Lt. Col. William Frederick Thomas, M.D., F.R.S.
District Medical & Sanitary Officer & Superintendent of Jail, Madras.

Age ... years 16

Total Service ... years 20 1/2

Service in India ... years 18 1/2

Previous periods of leave of absence on medical certificate or private affairs. Four months to Europe, October 1894, for 11 months & 25 days, from 5th Nov. 1894 to 11th Nov. 1895.

Date of return from last leave 1st Jan. 1896.

Habits ... Temperate

Temperament ... Nervous - Sanguineous

Disease ... Neurasthenia

This Officer on 24th January 1899, met with a very serious bicycle accident. The bridge of nose, was cut off, right nostril split open, right lower lip split open, a large deep cut on the right side of face, with great loss of blood, and loss of vision from the right side of face. These severe injuries went on to Facial Erysipelas, then Inflammation of the Cerebral Dura Mater, and last of all a very large Carbuncle on the back of the head. For most of the time I was in Medical Charge of this Officer, but early help was given by Dr. Van Vliet (American Mission Madras) and Lt. Col. W. F. Thomas (Dist. Med. & Sanitary Officer, Trichinopoly). Lt. Col. Thomas lost a great deal of weight & flesh during his illness. He regained his duties on 5th March, but the Carbuncle had not quite healed till 7th April. At present he is suffering from Nervous Debility and

When a person is suffering from a severe injury, it is often difficult to determine the extent of the damage. In this case, the injuries were severe, and the patient was in a bad state of health. The medical officer should be consulted, and the patient should be kept under close observation. The treatment should be such as to relieve the patient's suffering, and to prevent further complications. The patient should be kept in a cool, airy room, and should be given plenty of rest and food. The medical officer should be consulted frequently, and the patient should be kept under close observation.

The patient's condition is very serious, and it is essential that he should be kept under close observation. The medical officer should be consulted frequently, and the patient should be kept under close observation.
