DECEMBER.

Estimate of Rs. 4,800 for improvements to — in the Cuddapah division, sanctioned as a famine-relief work.

The following estimate is sanctioned as a famine-relief work :—

43. Minor Works and Navigation.

43. Minor Works and Navigation.
Minor Works for which neither Capital nor Revenue Accounts are kept, P.W.D.
Original Works.

Minor Works for which neither Capital nor Original Works.
Improvements to Hastinapuram tank, No. 92 of list of works in the Cuddapah division,
appended to G.O., No. 465 I., dated 7th July 1887.

Estimate

2. This sanction is registered as No. 155 I. of 1896-97.

(True Extract.)

Irrigation.
Account.

From W. B. DEWINTON, Esq., Superintending Engineer, III Circle, to the
Chief Engineer for Irrigation, dated Bellary, 21st December 1896,
No. 3062 I.

I have the honour to forward herewith an estimate, amounting to Rs. 4,800, together with a report for improvements to Hastinapuram tank (major work No. 92), Ráyachóti taluk, of the Cuddapah district, for sanction.

2. The ayacut and assessment of

2. The ayacut and assessment of the tank are 273 acres and Rs. 1,044; respectively, and as the upkeep for the past five years exceeds five years' revenue, this estimate is submitted with reference to G.O., No. 902 I., dated 16th November 1894, for your very early sanction, being one of the works in the list of famine programme of Cuddapah district.

3. I have lately inspected the tank, and found that the revetment is in the state described in the report; but it is not in urgent need of repairs, and I should not forward this estimate, nor do I propose to carry it out, if sanctioned, except as a famine-relief work.

ENCLOSURE.

REPORT to accompany the estimate for repairs to Hastinapuram large tank (Major No. 92), in the Ráyachóti taluk.

Amount of estimate

RS.
4,800

This is an imperial tank situated about $8\frac{1}{2}$ miles north-east of Báyachóti town. The tank has only been recently repaired and sufficient provision has been made for discharging the surplus; hence no hydraulic details are given with this estimate.

The bund is in good order except the

The bund is in good order except the revetment which has been rebuilding.

On account of this, when the tank receives its full supply, the bund slips in many places. It is now proposed to remove and rebuild the revetment where it has slipped. The work can, if necessary, be carried out as a famine relief. Gravel backing to the revetment will be done.

Gravel backing to the revetment has been provided in the estimated amount where it has slipped.

Earthwork is required here and there for the front slope to ensure uniformity of slope in rebuilding the revetment, and a lump sum of Rs. 200 is provided in the estimate for this purpose.

7th December 1896.

(Signed) S. B. MURRAY,
Executive Engineer.

Under Secretary to Government,
Irrigation Branch.

To the Chief Engineer for Irrigation.

Superintending Engineer, III Circle,
