Simla, the 9th July 1889.

SIR,

I am directed to request that you will inform Officers of the Public Works Department who may be employed at any time under your orders on important works situated on, or connected with, important waterways or drainage areas, that, should they desire to receive warnings of any unusual rainfall which is likely to cause extraordinary floods and thereby cause damage or delay the progress of the works under them, they must inform the Meteorological Department of the Government of India at Simla that they wish for such warnings, and supply that Department with full information as to the area on which, during any particular season of the year, exceptional rainfall would affect their works.

2. The officer in charge of such a work should apply direct to the Meteorological Reporter to the Government of India, Simla, and should send with his application a sketch map showing the catchment area the rainfall over which would seriously affect the work, and state the period of time during which he would wish to have warnings sent him.

I have the honour to be,

SIR,

Your most obedient Servant,

M. C. BRACKENBURY, Major, R.E.,
Under Secretary.
