GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

Irrigation.
Account.

READ—the following papers:—

From the Superintending Engineer, VI Circle, dated 18th July 1899, No. 1067 M D.

ENCLOSURES.

REPORT to accompany the estimate for excavating a field channel from sluice No. 2 in Boodagudi tank to irrigate Mulakaranai waste lands, etc.

Amount of estimate RS. 1,280

A block of waste lands about 40 acres in Mulakaranai village lying to the east of the surplus channel from Mulakaranai tank, are not commanded by any of the existing field channels. It is therefore proposed to excavate a field channel from the existing sluice in Boodagudi tank to irrigate these lands as well as 20 acres of dry lands in Boodagudi village.

The channel will not be maintained by Government.

The work will be carried out in accordance with the provisions of the standard specification current in the department.

3rd April 1899.

(Signed) A. V. RAMALINGA AIYAR,
Asst. Engineer, Periyár Divn.

Note by the Chief Engineer for Irrigation.

The Superintending Engineer, VI Circle, submits an estimate, amounting to Rs. 1,280, for excavating a field channel from sluice No. 2 in Boodagudi tank, Thandalai offtake, 4th Branch channel, Periyár project, for the irrigation of 60 acres of dry and waste lands in Boodagudi and Mulakaranai villages, from which a revenue of Rs. 436 is anticipated. Owing to errors found in the detailed estimate, the amount has been increased in this office from Rs. 1,280 to Rs. 1,310. The estimate may be sanctioned.

(Signed) W. HUGHES,
Chief Engineer for Irrigation.

3rd October 1899.

ORDER—No. 946 I., dated 3rd November 1899.

The estimate amounting to Rs. 1,310, or Rs. 1,520 including establishment and tools and plant, for excavating a field channel from sluice No. 2 in Boodagudi tank, Thandalai offtake, 4th Branch channel, Periyár project, is sanctioned.

2. This sanction is registered as No. 84 I. of 1899–1900, and will expire on the 31st March 1900.

3. Ordered that a copy of these Proceedings be forwarded to the Government of India for information.

Mudokanani surplus. It
would appear that the higher
part of this plot is 3 ft
lower than the bed of the
surplus ch^l where it
proposed to cross it and it is
presumed that the ch^l
is below the FTL of the
Karanai tank. As the
tank is very narrow and
probably very shallow
it is likely that its bed
will be much lowered
when it is abandoned and
as water will be forced
into it for the migration of
biting nugs it had better
be ascertained whether it
will not be possible to
migrate from the tank the
land water left of the
surplus.

Se VI

It is observed that the
field ch^t. from Shum No 2 in
Woodayur Tank perhaps
an old has been received with
the S^s No 1067 made by
10-7-29 is intended to
irrigate only 20 acres in
Woodayur village and 40
acres to the left of the
Mulakammi Angam ch^t.

The channel passes through wetland for a distance of 300 yards and is about 7 feet long in length. It moreover carries a ~~drain~~ line of drainage to a private tank and no means are provided of allowing this drainage to ~~pass~~ cross the Ch₂. It seems scarcely worth while to incur the expense and loss of water involved in irrigating so small and distant a plot as that East of the

OFFICE OF THE SUPERINTENDING ENGINEER

6TH CIRCLE,

Trichinopoly, 2 September 1899

From Lieut. Col. O. V. Boddy R.E.
Superintending Engineer,
6th Circle.

To The Chief Engineer,

for Irrigation.

5 - SEP 1899

S. 4 m. D. SIR,

ENCLOSURES. 5.

With reference to your memorandum

no. VI dated 3rd August 1899, I have

the honor to forward copy of a letter no.

95.B. dated 19th August 1899 from the

Executive Engineer, Periyar works. It

will be seen that the plot of land east

of the Mulakaranai Tank was sold in

auction during 1898, and that no means

at present exist of bringing water to it.

It cannot be supplied from the mula-

- karanai Tank, and the only source

of supply available, except from the

private tank, is the Boothgudi Tank.

Under these circumstances it would

appear that the proposed channel should

be
