REVENUE DEPARTMENT.

No. 1113.

Extract from the Minutes of Consultation under date the 31st October 1857.

Para. 1. The Right Honorable the Governor in Council proceeds to pass orders on the letter in this Department from the Honorable the Court of Directors, dated 9th September 1857, No. 8.

Transmit copy of a despatch to the Government of India on the subject of the encouragement to be afforded to Associations formed for the purpose of constructing works of irrigation and navigable canals in India; together with copy of the correspondence with the "Madras Irrigation and Canal Company" referred to in that Despatch. Desire that this Government will take into immediate consideration the particular projects submitted to the Honorable Court by the above Company, and report whether there is any objection to the acceptance of their offer to commence operations in respect to those works, under such conditions as the India Government may determine to be applicable to such Companies.

2. The Government resolve to forward the letter to the Government of India and the correspondence with the "Madras Irrigation and Canal Company", received with this Despatch, to the Chief Engineer for consideration and report.

3. The chief point more immediately requiring notice, is the proposal contained in the letter from the "Madras Irrigation and Canal Company" to the Honorable Court, dated 6th June 1857, to open out certain works having for their object both irrigation and navigation. These are, as the heading of the printed paper of particulars describes them;

1. "Proposed plan for providing irrigation and Canal transit to portions of the Districts of Bellary, Kurnool, Cuddapah and Nellore, also Raichoor."

2. "Proposed plan for irrigating the Districts of Coimbatore and South Malabar, and providing water communication between those Districts and the sea coasts."

4. Both the projects would appear to have been partially treated of in previous correspondence, and the allusion to Colonel A. Cotton's views respecting them, bears out this view; but it is necessary that they should now be taken up and reported upon in a definite and complete form. The Government rely on the Chief Engineer for this duty being properly fulfilled, and they desire that, after consulting the Superintending Engineers, and the Engineers within whose range the proposed works will lie, he will report fully on the subject, with especial reference to the works specified by the Company; their probable cost, and the return that may be expected from them.

5. A copy of the Despatch to the Government of India will be furnished to the Board of Revenue, who will be requested, after communicating with the Collectors of the Districts concerned, to afford the Government the benefit of their views on the two works now proposed, and on the general question of allowing private Companies to undertake the construction of directly remunerative public works, such as the channels of irrigation and navigation now proposed by the new Company.

6. There is one other point in the Honorable Court's Despatch to the Government of India which calls for early notice. In para. 13 the Honorable Court refer to an opinion given by Mr. Inverarity, the Collector of Broach, as to the injurious tendency of artificial irrigation on the cotton crop, and they require that the judgment of persons conversant with the culture of the plant, be taken as to the correctness of that opinion. The Government would wish the Board to take this matter in hand at once, and after communicating with the Collectors of the cotton growing districts, and with parties who largely invest their capital in the cotton trade and who must be supposed to be more or less conversant with whatever affects the plant, supply information on the point at issue.

7. The remarks of the Honorable Court in para. 14 are highly important, and will receive the Board's attention accordingly.
