Fort Saint George, Revenue Consultation of 24th November 1857.

No. 53. Read the following Extract from the Proceedings of the Board of Revenue, dated 11th November 1857, No. 3880.

Read letter from the Collector of Madras dated 3d November 1857.*

* *In Cons. 11th November 1857.*

(Here enter No. 171.)

Resolved that the above letter be submitted for the information of Government.

2. The Collector reports that notwithstanding the timely opening of the bar of the Cooum river, the fall of rain was so continuous and the influx of water from the interior so great that by the night of the 24th Ultimo, the entire "new platform" was submerged, and almost all the salt stored on it swept away. The two other platforms suffered but not to any considerable degree.

3. The total loss of Government salt is said to be about Indian Maunds 6,19,600, the value of which at the retail price would be as many Rupees; but at cost price and charges about Rupees 92,000.

4. The manufacturers have also suffered severe loss, 60,000 Indian Maunds being reported as swept away at the pans.

5. It is to be regretted that the new platform was not raised to the full height originally intended; but the experience of many years, certainly seemed to justify the belief that a lower elevation would suffice.

6. The Board have not the whole of the correspondence on this subject on their records, but conclude the estimate referred to by the Collector is the one mentioned in para. 4 of Extract Minutes Consultation dated 4th January 1856, (P. W. D. Rev. General No. 12).

7. It will of course be necessary to raise the platform to the level of the old, which the Board conclude is clearly shown to be sufficient by the experience of this season. The Collector will forward the report promised in para. 11 as soon as practicable.

8. The Board authorize the Collector to revert to the former practice of storing salt in 20 garce heaps if he is satisfied that he can guard against fraudulent heaping.

(A true Extract.)

(Signed) J. D. SIM, *Acting Secretary.*

No. 54. ORDER THEREON, No. 1203; dated 23rd November 1857.

Referred to the Chief Engineer for report as to the best means to be adopted for avoiding, for the future, accidents of the description which form the subject of the Board's Proceedings above recorded, as well as for reforming and repairing the platforms injured by the late rains. Colonel Faber will lose no time in submitting emergent estimates for the work that may be immediately necessary, either to prevent further loss to the State during the present monsoon, or to provide secure places for storing salt in future.

(Signed) H. FORBES,
Acting Secretary to Government.
