Revenue DEPARTMENT.

G.O. No. 1426 Press ~~Mis.~~

3-4

Dated 22-10 1859.

Not to be folded or roughly handled

Proceedings of the Madras Government, Revenue Department, from 22d to 31st October 1859.

No. 3. Read the following letter from H. NEWILL, Esq., Director of Revenue Settlement; to J. D. BOURDILLON, Esq., Secretary to Government, Fort Saint George, dated Madras, 15th October 1859, No. 886.

1. I have the honor to state that the Superintendent Revenue Survey, "from actual "inspection of the country and of the trigonometrical points which formed the basis of Captain "Ward's Survey in 1826-7, finds, that it is absolutely necessary to carry on a minor triangula- "tion by which to check the details of the Revenue Survey in the Wynaad," and that for that purpose a 12 inch theodolite is the smallest instrument with which the trangulation can be efficiently performed.

2. The large theodolites hitherto employed by the Revenue Survey Department, are 7 inches in diameter, and Captain Priestley requests that an application may be made for obtaining one 12 inch theodolite from the Stores of the Deputy Surveyor General in Calcutta.

3. I would add that the application should be accompanied with a request that the instrument may be forwarded as early as possible.

4. I take this opportunity of stating that if it is resolved to expand the survey operations, beyond the 4 parties now at work, or in progress of organization, further supplies of instruments similar to those already furnished will be required, and to suggest that it may be suitable to ask on this occasion how far a requisition to the above effect can be at once met by the Deputy Surveyor General at Calcutta.

Ordered in consequence that the following letter be despatched.

No. 4. From J. D. BOURDILLON, Esq., Secretary to Government, Fort Saint George; to the Secretary to the Government of India; dated 22nd October 1859, No. 1426.

The Superintendent of Revenue Survey of this Presidency requires a 12 inch Theodolite for some work which he is about to undertake; and as such an instrument is not obtainable here, I am directed to request that the Government of India will be pleased to permit one to be snpplied from the stores of the Deputy Surveyor General at Calcutta.

2. I am also directed to request information to what extent requisitions for Survey instruments generally could be met from those stores in the event of the Survey operations in this Presidency being enlarged.

Revenue Settlement Office,
Madras, 15th October 1859.

No. 886

From W. Nevill Esqre
Director of Revenue Settlement

To J. D. Bourdillon Esqre
Secretary to Government
Fort St George

Sir

I have the honor to state that
the Superintendent Revenue Survey "from
" actual inspection of the Country and of the
" trigonometrical points which formed the basis
" of Captain Ward's Survey in 1826-7, finds
" that it is absolutely necessary to carry on
" a minor triangulation by which to check
" the details of the Revenue Survey in the
" Mysore" and that for that purpose a 12
inch Theodolite is the smallest instrument
with which the triangulation can be
efficiently performed.

The

2. The Surgeon Theodolites hitherto employed by the Revenue Survey Department, one 7 inches in diameter, and Captain Speedy requests that an application may be made for obtaining one 12 inch Theodolite from the Stores of the Deputy Surveyor General in Calcutta.

3. I would also that the application should be accompanied with a request that the instrument may be forwarded as early as possible.—

4. I take the opportunity of stating that if it is resolved to expend the Survey operations beyond the Provinces now at work, or in progress of organization, further supplies of instruments similar to those already procured will be required, and to suggest that it may be desirable to ask in this occasion however or no question to the above effect can be determined by the Deputy Surveyor General at Calcutta.

I have the honor to be
Sir
Your most Obedient Servant
J Thuillier
Assistant to Pay. Settlement
