when the Cough is troublesome.
25th. Much better. He has had no returns of fever. Slept better, Cough and Sore throat less.
To Continue the Cough and Quinine Mixture.
26th. No return of fever; State improving.
27th. Recovered.

Mr. Arbuthnotts health has for a long time past been failing. He is subject to frequent indigestion. to looseness of the bowels. and a constant recurrence of attacks of fever. I believe that Mr. Arbuthnotts Constitution has been greatly impaired by a prolonged residence in India. and that a return to an European Climate for a period of at least fifteen months is essentially necessary for the restoration of his health.
I have therefore granted him the accompanying Medical Certificate.

I. James Ratton Surgeon at Kurnool do hereby Certify that the Honorable D Arbuthnott Esquire of the Civil Service is in a bad State of health, and I solemnly and sincerely declare that, according to the best of my judgement, a change of air is essentially necessary to his recovery, and do therefore recommend that he may be permitted to proceed to Europe for a period of fifteen months

I do hereby certify that according to the best of my professional judgment after careful personal examination of his case, I consider the state of health of the Honble D. Arbuthnot Esqr to be such as to render leave of absence for a period of 15 months highly desirable for his recovery.

Statement of the Case of the Honorable D. Arbuthnot. Collector of Kurnool.

I have known the Patient for the past ten years and on many occasions attended him. He had several attacks of severe Remittent; lately, fever assumed an Intermittent form. Consequent on fever the digestive organs became deranged. I have often expressed my opinion that a thorough change of climate - viz, to Europe was necessary to overcome the febrile habit and remove its sequelæ. If Mr Arbuthnot continues subject to fever, or his general health shews the effect of former attacks I maintain the opinion that a change to Europe is necessary.
