287-288

Dated

17-10-1860.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
17th October 1860.*

No. 287. Read the following :—

EXPLANATORY MEMORANDUM.

(*Vide Order of Government dated 8th June 1860, No. 947.*)

Demarcation, ... 87 Classification, 162 249 Average.... ... 125	1. The Trichinopoly and Salem Settlement party having completed the Trichinopoly Tálúqs, the large portion of the Establishment employed in them has been transferred to Salem, and some time was necessarily lost in the change. The Demarcation fell short of the standard, but the Classification which was not completed along with the Demarcation and not interrupted to the same extent by the changes far exceeded it, and the average of the two fulfils the requirements for the month.
---	--

2. The Godavery Settlement party was drawing its field work towards a close for that District and being gradually brought into Office, so that the returns give only about half of the full quantity.

3. The Kistna Settlement party did somewhat more than the full quantity of Demarcation, but the amount of Classification brought to account as completed, falls short by about 37 square miles, but the greater part of the 62 square miles entered as in progress is actually done, though not brought to account as the villages were not quite completed. Cholera was also very sever in some localities in hand and hindered the work.

4. The small detachment of the Wainád Settlement party, which returned there in June has had to contend with the heavy rains and has done little in the absence of the Deputy Director on leave. It is now returning again to the plains for the sickly month of September, as contemplated in the arrangements sanctioned for the season's work.

5. The Trichinopoly Survey party measured about 20 square miles more than the monthly standard, notwithstanding that several Amíns were withdrawn from want of demarcated villages. They were, however, usefully employed in measuring the details of the Survey fields. The proper adjustment of the Demarcation to the Survey waits for the orders of Government on my proposal, dated 25th June last, No. 661, for increasing the Demarcation and Classification staff in proportion to the enlarged Survey parties.

6. The Godavery party measured 73 square miles, very nearly the extent of the previous month. The whole number of Amíns was not employed in field work, as the Surveyors, from sickness and absence of some of their number, could not have kept pace with them. The work was also retarded by jungle and thorny fences, and also by rain and the overflow of the river.

7. The Kistna Survey party did 61 square miles or about 10 miles more than in the previous month. The work was retarded by the heavy rains and the withdrawal of the Amíns from field work. The rate of work per diem for the days actually employed was very good, being above the standard of 60 acres, both for this and the Godavery party.

8. The small Wainád branch employed in Salem did an amount of work proportionate to its strength.

(Signed) H. NEWILL,
Director of Revenue Settlement.
