Proceedings of the Madras Government, Revenue Department,
2nd June 1860.

No. 34. Read the following Proceedings of the Madras Government in the Military Department, dated 9th May 1860, No. 1,720 :—

Reviewing the Report of the Committee on the re-organization of the Subordinate Medical Department. } Vide Military Proceedings from 1st to 10th May 1860, Nos. 232 to 237.

No. 35. ORDER THEREON, 2nd June 1860, No. 919.

Ordered to be communicated to the Board of Revenue for information.

(Signed) C. G. MASTER,
Deputy Secretary to Government.

PROCEEDINGS OF THE MADRAS GOVERNMENT.

Read the following papers :—

Report of the Committee on the proposed new organization of the Subordinate Medical Establishment, 27th February 1860; to the Secretary to Government, Military Dept., Fort St. George.

We have the honor in obedience to the Order of Government, Military Department, No. 3757, dated 24th October 1859, to submit herewith our views regarding the re-organization of the Subordinate Medical Department.

2. The present numerical strength of all grades of Subordinate Medical Officers is 537 and in addition there are 272 persons employed in the Vaccination Department, making a total of 809. Many Members of the Subordinate Medical Establishment are employed almost exclusively in the Civil Department, others on Military Service. After due deliberation, we have come to the conclusion, that the control and management of the department can be most effectually provided for, by a complete separation of the Civil from the Military Department. We therefore propose 1st, a distinct Military Department sufficient to provide for the wants of the Army according to its present strength, and 2nd, a Civil Medical Department which shall include provision for the numerous Jails, Dispensaries, Collector's Establishments, the Revenue and Geological Surveys, and lastly, for the more efficient extension of Vaccination throughout the Presidency.

Vide accompanying Distribution Statement.

3. The Military Department, it is proposed shall consist of the following grades. The numbers of each grade and the rates of pay are likewise shown.

42	5	Senior Apothecaries	@ Rupees...	250
	37	Apothecaries	@ ,, ...	115-7-0 and 145-14-0
	80	Assistant Apothecaries	@ ,, ...	65 and 80
	40	1st Class Hospital Assistants	@ ,,	50
	80	2nd Class do.	@ ,,	35
	93	3rd Class do.	@ ,,	24½
	Total.			335

4. The present authorised monthly cost of the Subordinate Medical Establishment including eighteen Native Surgeoncies, nine of which have never yet been filled up is in round numbers 32,700 Rupees. This sum includes the pay and allowances of every Subordinate on the Establishment whether drawing pay from the Madras Government or Foreign Departments. To this we have added with the view of carrying out our proposed separation of the Departments the cost of the present Vaccine Establishment averaging 30,000 Rupees per annum or 2,500 Rupees per month.

Cost of present Establishment.....			32,760	3	0
Do. Vaccine Do.			2,544	8	0
			35,304	11	0
Cost of proposed Military Establishment.			19,691	1	0
Remaining for re-distribution in the Civil Department...			15,613	10	0

5. It will be observed that we have omitted the grade of 2nd Apothecary in the above arrangement for the Military Department, and we have been led to do so from the fact that in the other Presidencies, 2nd Apothecaries are employed not on Medical duties, but as Stewards or Custodians of articles of Commissariat supply used in European Regimental Hospitals, duties which in our own Presidency are exclusively performed by Conicopolies of the Commissariat Department. The present rate of promotion in the Apothecary grades is very slow, and this circumstance has influenced us somewhat in recommending the abolition of the intermediate grade. With the proposed numbers of each grade, promotion to the rank of Apothecary will be attained under ordinary circumstances at a much earlier period than is now the case.

6. In deciding upon the relative number of each grade of Subordinates in the Military Department, we have had under our consideration, the question of organising a separate Establishment for the Medical Store Department. The great advantage of such a measure would be,

that of always having trained hands in a Department requiring some special knowledge and training. The lads would enter the Presidency Medical Stores as Apprentices and be promoted in the Department. They would not require any College education except perhaps attendance upon the courses of Pharmacentical Chemistry and Materia Medica. In carrying out the details of the arrangement, we do not propose to add to the present cost of the Store Establishment. The system in question is followed in the Bengal and Bombay Presidencies and we recommend its introduction in the present scheme for the re-organization of our Madras Subordinate Medical Department.

7. The Pensions of Subordinates in the Military Department we propose to leave as at present. It will be observed however, that we wish to introduce three grades of Hospital Assistants, those of the 1st Class being men selected from the 2nd grade, on account of their superior attainments or practical experience fitting them for the independent charge of small outposts—such as Paumbum, Trichoor, Ongole, &c. It is also proposed that one of this grade should be attached to each Superintending Surgeon's Department for detachment duty, with small bodies of Native or European Troops. The pay of this grade we consider should be 50 Rupees per mensem, and the pensionary provision for men of this Class should be somewhat more liberal than the present rates for 1st Dressers.

8. In our Distribution Statement for the Military Department, copy of which is appended, we have allotted to each European Regiment one Apothecary, one Assistant Apothecary and a 3rd Class Hospital Assistant, instead of the present Establishment of one 2nd Apothecary—one Assistant Apothecary and one 2nd Dresser—For a Native Corps we have provided one 2nd Class Hospital Assistant and one 3rd Class Hospital Assistant instead of one Assistant Apothecary and one 2nd Dresser. The former will correspond in acquirements, rank and pay with the present 1st Dressers, and the latter with 2nd Dressers—and on mature consideration, we consider the Establishment will be ample both for European and Native Corps.

9. As regards pay, we have not considered it advisable to alter that of the Apothecary grade, but bearing in mind the difficulty of obtaining good men to enter the department, the harassing nature of the duties performed by Subordinates employed on Military duties and the enhanced cost of living, and the inevitable expenses attendant upon marching here and there, in the performance of such duties, we consider that the half batta pay of Assistant Apothecaries should be 65 Rupees per mensem, instead of 55, as at present. Full batta rates of both grades should remain as at present, and the Marching or Field batta of Hospital Assistants of the 2nd and 3rd grades should be the same as now sanctioned for 1st and 2nd Dressers.

10. The scheme can only be carried out gradually, in consequence of the large number of 2nd Apothecaries and Assistant Apothecaries, who would be Supernumeraries to the Establishment. As the men now in the service were entertained on the understanding that they would succeed in due course to the rank of 2nd Apothecaries, it is only fair and just that the Senior Assistant Apothecaries on the list, should succeed to the pay of the 2nd Apothecary grade, on the promotion of the latter to the Apothecary grade.

Of this number 7 have been already absorbed by casualties. The present Establishment of 2nd Apothecaries is 24 in excess of that authorised for this Presidency, that number having been added in 1857, for service in Bengal, under the orders of the Supreme Government. The greater number of these have returned to Madras, their services having been dispensed with by the Bengal Authorities. All these Supernumeraries must be obsorbed before any promotion or corresponding increase of pay can be given to the Senior Assistant Apothecaries on the list.

In carrying out the arrangements connected with the proposed changes, we desire strictly to follow the instructions contained in para. 9 of the Order of Government now under consideration, that "due regard be paid to the just expectations of those who have entered the Service "under the existing system," and as the proposed scheme can only be gradually brought into operation, we do not apprehend any serious difficulty arising with regard to persons already in the Service.

11. Before proceeding to enter upon the detailed arrangements in connection with the Civil Medical Department, it will be necessary to explain the circumstances which have led us to propose the incorporation of the Vaccination Establishment with it.

Nothing perhaps can be more unsatisfactory than the present state of the Vaccination Department. It is conducted by men, who, as a rule have little or no training for the duties, and who have no Medical education whatever. It has been proved of late years that the Returns of the number of cases vaccinated cannot be depended upon, that in many instances they have been wholly, or in great part fictitious. The Vaccinators as a Class are not respected by the people with whom they are brought into contact, and the most serious objection of all is that they are not under any regular or systematic supervision, and consequently more or less doubt must always exist as to the successful performance of the operations actually done.

In the year 1855, five Assistant Apothecaries were appointed Circuit Superintendents of Vaccination in the Districts as per margin, and during the short time they were permitted to remain in those appointments, much was done in the way of checking fraudulent Returns, in combating the prejudices of the people against Vaccination, and in keeping the supply of Symph pure and efficient. At the same time all the objections against the employment of ignorant and non-professional aid, in diffusing the benefit of the prophylactic, and making it popular with the people, were brought clearly to notice by the Circuit Superintendents. (Vide Vaccination Reports for 1856-57-58.)

12. The system of Superintendence above referred to, should, we consider, be brought into operation in all the Collectorates in the Madras Presidency—but instead of Assistant Apothecaries we propose that Sub-Assistant Surgeons be entrusted with these responsible duties, and that instead of having a Vaccination attached permanently to each Talúq, without supervision or control, the Sub-Assistant Surgeon should have a certain number of each grade of Hospital Assistants under his orders, with whom he would perambulate the District, visiting Talúq after Talúq, and vaccinating all the people willing to have the operation performed. In this manner, we are of opinion that a small number of Subordinates will do more work than the present large Vaccination Establishment, and that the work would be better performed and more acceptable to the inhabitants of the country, who are at present either actively or passively hostile to Vaccination as now conducted.

13. It is proposed that the Civil Medical Department should consist of Sub-Assistant Surgeons in substitution of the present grade of Native Surgeons—of Civil Apothecaries for duty in the Civil Institutions at the Presidency, and of 1st, 2nd, and 3rd Class Hospital Assistants as in the Military Department, but we affirm as a principle, that the rates of pay in the Civil should be on a lower scale than the Military, for the reason, that the men will seldom be removed from their Districts, nor will they be liable to the hardships and inconvenience and extra expenses incidental to Military service. They will moreover be in a position occasionally to claim remuneration for attendance upon wealthy Natives and enjoy other advantages which will compensate for the lower rates of pay.

14. The present sanctioned Establishment of Native Surgeons is eighteen but there are only nine actually employed, the candidates for this grade never having been sufficient to fill the vacancies. It is proposed that the nine Native Surgeons be incorporated in the Sub-Assistant Surgeon's grade, and that the latter be immediately completed to eighteen by selecting men after examination from the Apothecary grades, who have served not less than ten years. The number is required to bring into operation the new scheme regarding the supervision of Vaccination in the Collectorates.

15. The proposed number of Sub-Assistant Surgeons for the whole Presidency is thirty-six but the full Establishment cannot be immediately completed without incurring an increase of expense. As the Apothecaries now employed in the Civil Department became incapacitated, their places will be filled by Sub-Assistant Surgeons, and in this manner no temporary increase of expenditure will be necessary.

The Sub-Assistant Surgeons we think should be of three Classes, viz. :—

6 1st Class on 250 Rupees per mensem.
12 2nd do. „ 175 „ do.
18 3rd do. „ 125 „ do.

The Native Surgeons now on the Establishment are paid at the following rates ; conditional on passing a satisfactory examination at the termination of each period of service, viz. :—

Under 7 years service 100 Rupees per mensem.
Above 7 & under 14 150 „ do.
Above 14 years 200 „ do.

As regards the individuals now employed as Native Surgeons, we do not propose any alteration in their present rates of pay or periods of service. Their designation will simply be altered from "Native Surgeons" to "Sub-Assistant Surgeons."

16. As regards the Class of persons to fill the appointments in the grade of Sub-Assistant Surgeons, we are of opinion that two-thirds of the number required should be selected from the Apothecaries or Assistant Apothecaries, on the score of approved service of not less than ten years duration, and who previous to their appointment should be required to pass a thoroughly practical examination at the Medical College, and the remainder one-third from young men educated in the Senior Department of the Medical College, and who shall have gone through a course of instruction sufficiently extended to qualify them for the independent practice of their profession.

17. Those Sub-Assistant Surgeons who may be appointed Superintendents of Vaccination in the various Collectorates would be required to move about in the Districts for nine or ten months in each year with their respective Establishments. While travelling on duty they should draw an allowance of four Annas per mile, for the distance travelled, and one Rupee per diem travelling allowance, these rates being usually paid to officials of corresponding rank in the Educational and Public Works Departments.

The Sub-Assistant Surgeon and his Assistants would afford Medical advice freely to all applicants, and each party would be provided with a supply of Medicines for distribution to those requiring such assistance. It is believed that the Native population would under this arrangement hail the visit of the Vaccinator with pleasure, instead of fear or aversion, as is now often the case.

Penitentiary.
Government House.
Male Asylum.
Female Asylum.
Lunatic Asylum.
Port and Marine Departments.
Civil Dispensary attached to the General Hospital.

18. The Civil Institutions at the Presidency named in the margin, require some special provision. The duties are distinctly Civil, and they are not of sufficient importance to require men of the Class of Sub-Assistant Surgeon, to fill them. We do not propose to interfere in any way with the present incumbents of those appointments, but as provision must be made to replace them, we think that each Institution should be provided with a resident Apothecary, and that the salary attached to these appointments should be fixed at 60 Rupees per mensem, in addition to free quarters. The men selected for these appointments to be educated as Assistant Apothecaries in the Medical Department, and like them should be eligible after ten years service to compete for Sub-Assistant Surgeoncies.

19. The proposed number of 1st Class Hospital Assistants in the Civil Department, is comparatively small. They should be employed in small independent Civil charges or to superintend Vaccinators in small Districts to which no Sub-Assistant Surgeon is appointed. Like the corresponding Class in the Military Department, they should be selected from the 2nd grade on account of superior attainments or qualifications.

The proposed stipend is 35 Rupees per mensem with 3/10ths of salary additional for travelling batta, when actually moving about in the District.

20. Hospital Assistants of the 2nd Class are allotted chiefly to Collector's Establishments Revenue Survey, Jails, Dispensaries, &c.

Proposed stipend 28 Rupees, with travelling batta at the rate of 3/10th of salary, when actually proceeding on duty, with Collector's Establishments, &c.

21. The 3rd Class, it is proposed to employ for the most part, in the Vaccination Department ; wherever more than one Assistant is required in Civil Dispensaries, a 3rd Class man has been allotted to the vacancy. As with the same grade in the Military Department, they would receive their professional training in what is now the Primary Medical School, but which we shall propose hereafter to be the 3rd or Junior Department of the Medical College. After a course of two years instruction, they would pass out of the College as Hospital Assistants of the 3rd Class, and commence their duties or stipends of 20 Rupees per mensem, and 3/10ths of salary as travelling batta, when on duty in the District.

22. The strength of the Civil Medical Establishment requisite for the performance of all duties likely to devolve on it, including Vaccination throughout the Provinces will be about 374. This number includes all subordinates attached to Mysore, Nagpore and Pegu Commissions, Straits Settlements, Educational Department, Revenue Survey and Settlement Establishments, &c. The proposed strength of the different grades is as follows :—

Sub-Assistant Surgeons	36
Resident Apothecaries for Institutions at the Presidency	13
1st Class Hospital Assistants	60
2nd do. do.	120
3rd do. do.	145
Total	374

23. As regards the financial view of the question, the scheme appears to be practicable. In para. 4, it was stated that the balance available for the Civil Department was 15,613-10-0, and the cost of the proposed Establishment is 14,990 as shewn in the following table :—

6	Sub-Assistant Surgeons at Rupees			250 each	1500
12	Do.	do.	„	175 „	2100
18	Do.	do.	„	125 „	2250
60,	First Class Hospital Assistants at Rs.			35 „	2100
120,	Second do.	do.	„	28 „	3360
145,	Third do.	do.	„	20 „	2900
13	Resident Apothecaries for the Presidency		Rs.	60 „	780
				Total	14,990

24. In accordance with the views expressed by the Honorable the Governor in Council, all grades of the Civil and Medical Subordinate Establishments, should be open to all Candidates irrespective of caste or race, and it will be observed that our plan provides for Candidates who enter the lowest grades of either Department, rising to the highest appointments obtainable, viz., Sub-Assistant Surgeon and Senior Apothecary respectively, should they exhibit unusual abilities, or fitness for promotion.

25. An important point must not be lost sight of in deciding upon the number of Sub-Assistant Surgeons to be allotted to this Presidency. It is this, the stronger the Establishment, the less necessity will there be to indent upon the Commissioned ranks of the Medical Department, to fill small, and comparatively unimportant Civil charges. In the accompanying Distribution List, Sub-Assistant Surgeons have been allotted to "*Tavoy*" and "*Mergui*," in order that the Assistant Surgeons now holding those appointments may be withdrawn. In some few years hence when the new organization has been brought into operation, there will be no difficulty in reducing the number of Assistant Surgeons by at least *ten*, replacing them by Sub-Assistant Surgeons for Civil duties.

26. With the view of furnishing the means of instruction for the various grades of Medical subordinates above provided for, we would suggest that the Medical College should be divided into the following Departments.

1st. The *Senior Department*—in which young men who have received a fairgeneral education, and who desire to obtain the appointment of Sub-Assistant Surgeon without passing through the grade of Hospital Assistant or Apothecary, or to qualify for a Degree in Medicine at the Madras University, or elsewhere, should receive instruction. All Candidates for admission into this Department, should be required to pass a preliminary examination sufficient to test their natural intelligence and habits of industry, and their ability to profit by the Lectures of the Professors. To this Department should be attached five Scholarships of the value of 20 Rupees each per mensem.

Each Scholarship should be tenable for five years, the prescribed period of instruction, subject to the provision that it shall be liable to be withdrawn in the event of the holder failing to show satisfactory progress at the annual examination. Candidates failing to obtain Scholarships, but who may pass the preliminary examination, should be admitted as free Students, and at the conclusion of the course, the appointment to vacancies in the grade of Sub-Assistant Surgeon should be determined by the result of the final examination, the appointment being conferred on the most proficient Students, whether free Students, or Scholarship holders—Scholarship holders if promoted to the grade of Sub-Assistant Surgeon, should be bound to render service in that capacity for a definite number of years, say 7.

27. *Second Department.*—The Second Department should comprise all the Students qualifying for the grade of Assistant Apothecary, who should be admitted into the Service as at present, as paid or unpaid Candidates, and on the result of a competitive examination, as provided for in the G. O. C. C. under date 9th May 1859, provision should be made for these Students doing duty in an Hospital for at least one year previous to their admission into the College. The course of instruction in this Department of the College should be that proposed by the Principal in his letter dated 9th February 1859, or such modification of it as may be deemed proper, and should be completed in three years. It should be conducted as at present by the Professors. The stipends for pupils of this Department should remain as at present, but no person should be promoted from paid Candidate to Junior Apprentice or from Junior to Senior Apprentice, unless he satisfied the Principal of the College as to his making the best use of the opportunities afforded him.

Admission into this Department should be open to Hospital Assistant of not less than 5 years standing who may obtain leave from the Director General to attend the College, with a view of qualifying for the grade of Assistant Apothecary.

28. *Third or Junior Department.*—The third Department should take the place of the present Primary Medical School, the teachers of which and the present pupils should be moved without delay to the Medical College premises. In this Department, Candidates for the grade of Hospital Assistant should be instructed. Their instruction should be carried on as at present by Medical Subordinates aided by an English teacher, but acting under the supervision of the Principal and Professors, each Professor superintending the instruction in the branch of study which is most analogous to the subject taught by him in the senior and second departments and examining the pupils once a week, and the Principal exercising a general supervision over the whole. The proposed stipend for pupils in this department is 7 Rupees a month, and the period of Collegiate instruction to be confined to two years. We would demand from Candidates for admission into this department the standard prescribed in the G. O. C. C. 9th May last, in English and Arithmetic.

29. As a consequence of the reduced strength of the superior, and increase of the inferior grades, the respective numbers of Medical Apprentices, Paid Candidates and Native Medical Pupils will be altered somewhat. The numbers on the higher rates of pay assigned to Medical Apprentices and Paid Candidates will diminish, and on the other hand the Junior department will require a considerable augmentation.

The Principal of the Medical College will be called upon to furnish a statement founded on the proposed members of the respective grades, shewing the alterations, financial and otherwise, which the adoption of our suggestions will entail.

30. To bring the principles above referred to into operation, without injury to the prospects of those now in the Service, is the only difficulty. We would desire to express our decided conviction that the pay, prospects of promotion and pension of present incumbents, should be scrupulously respected, whichever department they may be called upon to serve in. Medical Subordinates of 10 years service and upwards might be offered the privilege of choosing Military or Civil Service, and of confining themselves to the branch chosen for the remainder of their period of service—sickly or delicate men, unfit for active military life, might be at once transferred to the Civil Department.

31. The Civil Establishment should be gradually completed, by filling up the grade of 3rd Class Hospital Assistant, so as to bring the new Vaccine Department into operation. Of the present Vaccinators one half might be immediately discharged without serious diminution of the work, and the remainder should be set to work under the Sub-Assistant Surgeons in the manner proposed in para. 17. If any of these prove themselves particularly useful, they might be entertained temporarily as 3rd Class Hospital Assistants, but they would not be eligible to rise in the department. Vaccinators are not entitled to any pension, for length of service, but in the event of the Establishment being suddenly reduced, we would recommend the grant of one or two months pay, on discharging the men no longer required.

32. The present appears to be a good opportunity for carrying out the recommendation made to and approved of by Government* regarding the control of Medical Subordinates in the Civil Department. As the case now stands, a Dresser attached to a Collectorate is not under the orders of the Civil Surgeon. He has in fact no Medical superior, and occasionally it has happened that Collectors have resented any interference on the part of Civil Surgeons with the Medical Subordinates under their orders. We think it highly desirable that every Medical Subordinate in a District, should be amenable to the control of the Zillah Surgeon, or Chief Medical Authority in the District. Although a certain Establishment is allotted for each Collector, Sub Collector, Jail and Dispensary, it would conduce to the efficiency of the Department, if the various Hospital Assistants were posted to the Collectorate, and distributed at the discretion of the Zillah Surgeon.

* Proceedings of Madras Government and Order thereon, Military Department, No. 1672 of the 9th May 1859.

33. It must not be forgotten that a staff of trained hands such as we have allotted for each Collectorate would be particularly useful in combating the progress of Epidemic diseases affecting particular localities. In addition their duties as Vaccinators they would be qualified on emergencies arising to visit localities infected with Cholera, Fever, Small Pox, and to administer relief to the sufferers, thus conferring incalculable amount of good upon the population generally.

34. As regards the Pensions of Sub-Assistant Surgeons and Civil Hospital Assistants, we would propose that the Uncovenanted Civil Service Rules regarding leave of absence and Pensionary provisions be made applicable to them—any service they may have had in the Military Department, being allowed as a matter of course, to count for retirement. A considerable saving would be effected by the adoption of these rules.

35. A draft G. O. embodying the foregoing suggestion will be prepared and submitted to Government, should our recommendation regarding the division of the department into Military and Civil, and the incorporation with the latter of the present Vaccine Establishment, meet with the sanction and approval of the Honorable the Governor in Council.

36. We beg to state in conclusion, that the Principal of the Medical College and Officiating Secretary to the Director General Medical Department have been taken into our consultation, and have afforded us very valuable assistance in drawing up the foregoing scheme.

ORDER, No. 1720, *9th May* 1860.

The Governor in Council has perused with great satisfaction, the clear, concise and well considered Report which the Committee have submitted, on the re-organization of the Subordinate Medical Department, and desires to convey to them the acknowledgments of Government for the able manner in which this duty has been performed.

2. The thanks of Government are also due to the Principal of the Medical College and Officiating Secretary to the Principal Inspector General Medical Department, for the valuable assistance they have rendered the Committee in their labors.

3. The Governor in Council fully approves of the well digested Plan for the separation of the Civil and Military Branches of the Subordinate Medical Establishment, and of the general arrangements proposed in connection therewith, as well as of the incorporation of the Vaccine Department with the Subordinate Medical Service.

4. But His Honor is unable to concur in the recommendation contained in the concluding part of the 26th paragraph of the Report, that Scholarshipholders, if promoted to the grade of Sub Assistant Surgeon, should be bound to render service in that capacity for a definite period. It is observed that no such conditions attach to Scholarships in England, and Government do not consider it expedient to impose them in this country.

5. The Committee are requested to prepare, in communication with the Principal of the Medical College, a draft G. O., embodying the several suggestions contained in the Report, with the exception above noticed, and to submit the same to Government, in communication with the Military Auditor General and Civil Auditor, with a view to the aggregate cost of the entire arrangements being limited to the gross amount at present sanctioned for the maintenance of the Subordinate Medical and Vaccine Establishments collectively.

(True Extract.)

Secretary to Government.

To the Principal Inspector General Medical Department.
" Director of Public Instruction.
" Adjutant General.
