

Explanatory Memo.

- Settlement 1. The small out-turn in Salem is owing to the field work drawing to a close.
2. The extent of Demarcation accomplished in Mellore in this month, is in excess of the work of the previous one. The Gammahandy is still in progress, but the Assistant Director in Charge of this Party has, in communication with the Sub Collector, arranged, that the settlement operation should be as little interfered with as possible.
3. In the Tuticora District, the Standard has been more than fully attained, both in Demarcation and Classification. The former was facilitated in the Palnada by the ease with which stones were procured for marks.
4. In the Tummal District the work has been impeded by the difficulty of clearing lines through the jungle, and by the necessity of altering the

the former demarcation in consequence of the irrigation Canal passing through it.

5. In the Wynaad, the work is being wound up, and the area in progress will be brought to account in the next Return. In Coimbatore, the out-turn is proportionate to the establishment employed in field work.

6. A Supplemental Report for January containing the particulars of the work during that month in Coimbatore and Wynaad, is forwarded as promised in para 5 of last month's Memo.

7. In the Salem District, there is a slight increase in the amount of work turned out by the Survey Party in this month, notwithstanding the unhealthy climate of the Shevaroy Hills. Some of the Amins were also employed in the Office.

8. In the Godavary, Krishna and Nellore Parties, the field Establishments were employed chiefly in testing former measurements and in Office, and consequently the

the out-turn is small.

9. The Wynaad Survey Party is chiefly employed in measuring the Coffee Estates. The out-turn in Coimbatore is in proportion to the number of Amins employed.
