Proceedings of the Madras Government, Revenue Department,
18th August 1862.

No. 229. *PROCEEDINGS OF THE MADRAS GOVERNMENT.*

Dated 18th August 1862, No. 1,752.

With reference to the Government Proceedings of this date by which the rate of water cess has been temporarily fixed, as noted marginally, for water supplied by the Irrigation Company in Kurnool, His Excellency the Governor in Council observes that the whole question as to the rate of water cess, regarding which the Chief Engineer and the Consulting Engineer are at variance, turns upon the value of the crop due to the application of the water. The determination of this value can only be arrived at, with some approximation to accuracy, by actual experiment, and the Governor in Council thinks that it is desirable that the Collector of Kurnool should be directed to purchase, while standing, the whole of the crop upon 10 acres of each kind of Nunjah land, to have these crops reaped and threshed, and an accurate record kept of their quantity, and quality, selling price, &c. A similar experiment should also be made on dry lands. The experiments made in Kurnool, may also be extended to other Districts in which the question of the value of the water supplied by irrigation works arises, so as to afford reliable data, for the determination of the rates of water cess.

	Rs.
For the 1st crop	4
Do. 2nd do.	2
Do. two crops	5

(Signed) T. PYCROFT,
Chief Secretary.
