10/10/10

Dr. H. 937/111.

The Assistant Post Surveyor Office

2. H. A. Hancock Dec 28th

Black 20th of May 1862
 Received

Frederick Nichols of Newbury
Jan. 29th 1862

4. In Nellore, the work was interrupted partly by the non-attendance of the Villagers owing to the Jamabundy in progress, and partly by the necessity of employing some of the Gumastas in marking and clearing jungle boundaries. Numerous villages virtually completed appear under the head of "in progress" in consequence of boundary disputes remaining undisturbed. These will be settled as soon as possible.

5. In the Srisa District, the demarcation is equal to the standard and the classification has a little exceeded it, the Establishments having been increased to the full sanctioned strength with the view of completing the field work in the District before the Monsoon sets in.

6. In Hurnool, the out-turn during the month was reduced owing to the Easter Holidays of which the other parties did not avail themselves, to the necessity of employing Gumastas in clearing jungle boundaries and in completing the construction of boundary pillars in the Ramallakota Taluk before quitting it, to the prevalence of sickness in the Party, and to the interruption caused by the Jamabundy. The classification, which has lately commenced, could not be expected to advance very rapidly, the hands being new and the classifiers moreover were obliged to devote a portion of their time to the correction of the

the demarcation in lands about to be irrigated, and which should in the first instance have been demarcated as wet and not as dry land.

7. In Coimbatore, the work was much impeded by the Jamabundy in progress, and the investigations of the Inam Commission.

8. The area entered against the Mynad includes the work in progress in the previous months.

The Settlement operations in this locality have been wound up, and the whole Party transferred to Coimbatore. As soon as the demarcation of the Coimbatore taluk is brought to a close, the Establishments will be transferred to Sinnerelly as directed in Proceedings of Government dated the 25th ultimo No 895.

9. A demarcation staff from the Salem party are now enroute from Trichinopoly to Sinnerelly and as soon as they arrive the demarcation there will be commenced. This party will be increased to its full strength as early as possible.

Survey Department 10. In Salem, the Survey Party accomplished nearly the same amount of work in this month as in the previous one. Some of the hands were employed in office work.

11. The field work in the Godavery District having

having been brought to a close, some of the Amins were employed in testing the villages already surveyed, and others in office work.

12. There is a slight increase in the out-turn of work in the Pilstna and Mellore parties in this month. One-third of the field Establishments in the former was employed in testing and in office. The work in both Districts was impeded by the absence of the Villagers and by the loss of days in travelling.

13. In the Wynad the outturn in this month is more than double that of last month, but owing to the usual difficulties, is greatly below the standard.

14. The amount of work accomplished in Coimbatore is proportionate to the number of Amins employed during the month.
