From,

Thos. Lowe Esq^r

Ap. Zillah Surgeon of Salem,

To, H. A. Brett Esq^r

Collector of Salem,

Sir,

In reply to your letter N^o 406 of
10th Aug^r 1861 with the enclosure of Proceedings
of Madras Government dated 10th May 1861,
I have the honor to inform you that I
have examined Appasawmy Mudaliar and
that I am of the same opinion as the Medical
Officers who formerly reported upon this
Officer's health.

2. That considering the effect of
the climate of Salem upon persons suffering
from organic disease I am of opinion that

Appasawmy

No 5116

Proceedings of the Board of Revenue.

dated 21st September 1861.

Read the following.

No 174

From

W. A. Brett Esq^r

Collector of Salem

To

W. Woodleston Esq^r

Secretary to the Board of Revenue.

Sir,

With reference to the Board's Proceedings dated the 14th December 1860, No 5865, communicating the Government Order dated the 10th January 1861, No 58, directing that Appasawmy Mudaliar, the Deputy Collector in charge of the Treasury, should apply for leave of absence for the benefit of his health, and that if change of air and relief from business prove unavailing, the propriety of his transfer to the Pension list should be considered,

In a letter from the

Collector of Salem to the

Secretary to the Board

of Revenue dated the 14th

Sept^r 1861

Dec 22nd 1861

Let 5986 of 1861

Let 19 of 1861

Copy of certificate granted

to Appasawmy Mudaliar

on the state of his health

Appasawmy Mudaliar should not stay in Salem.

It would appear that his leave of absence for the benefit of his health has not been attended with the success sought.

I have &c

Secy of Treas^r Lowe.

Ag. Julia Surgeon Salem.

True copy

At this to
Collector.

Salem
18th Sept^r
1861

I have the honor to submit the copy of a letter from the Zillah Surgeon of Salem dated the 10th Instant N^o 45, expressing his opinion that Appaswamy Mudaliar should not stay in Salem, and that the leave of absence granted to Appaswamy Mudaliar for the benefit of his health had not, it would appear met with the success sought.

2. In consequence of this opinion given by the Zillah Surgeon, I beg to suggest that the Zillah Surgeon's letter should be submitted to Government for any further orders that they may think proper to pass on the subject.

3. Appaswamy Mudaliar does not wish to be transferred to the Pension list. He wishes to be transferred to another District, in the hope that some other District might agree with his health better than Salem.

Salem Collector's office

Salem 17 September 1861

I have &c

Wm. A. Brett
Collector

Ordered to be submitted to Government with reference to their Proceedings of 10th January 1861. N^o 58. Revenue Department quoted by the Collector.

No. 9. Read the following Proceedings of the Board of Revenue, dated 28th November 1861, No. 6,593.

SIR,

3. I give in the margin a sketch of the positions on the map of the stations where gauges are kept in the Northern Division of this District. And dividing these stations into three lines, running north and south, the Board will observe that the corresponding stations on each line show a fall of rain in certain fixed proportions. For instance, the north-most stations on each line are Padarti, Ongole, Darisi; Padarti being on the coast, Ongole 10 miles inland, and Darisi about 45; and at these three stations, the registered fall is, Padarti 14·91, Ongole 7;

Darisi 3.75; or twice as much on the coast as ten miles inland, and four times, as 45 miles inland. Again, taking a line from east to west, about half a degree south, we have the stations of Pakala, Kandukuru, and Kanigiri, with much the same relative positions and distances as the above, and it might be said precisely the same proportions, viz., Pakala 15.35, Kandukuru 8.55 and

*Proceedings of the Madras Government, Revenue Department,
4th January 1862.*

Kanigiri 2.65. And if we take the southern-most line of this Northern Division, which is pretty much on the 15° of latitude, we have, with a greatly decreased force, still the same proportions, viz., Ramapatam 7.2, Kanali 3.4, and Udayagiri 1.6, the relative positions and distances being again much the same as in the preceding groups, though in this instance the extreme inland station is south of the other two, whilst in the two former groups, it is in both cases a little to the north.

4. Of course the preceding figures may be all a mere coincidence; and it is quite possible the measures may be all alike erroneous, either of which suppositions would equally negative any inference to be drawn from the above singularly marked proportions; but I am not aware that the measures are erroneous. They were all prepared under the supervision of my predecessor Mr. Elton, who took much interest in every thing that could tend to throw a light on meteorology; whilst those who keep the accounts have been carefully instructed, and have very simple accounts to keep. And under these circumstances, I cannot but look on the rain report now submitted as a correct and reliable document, and as such throwing considerable light on the laws that regulated the very heavy fall of rain in the north of this District on the 20th ultimo.

Ordered to be submitted for the information of Government, and that copy be communicated to the Chief Engineer, the Conservator of Forests, the Government Astronomer, and the Inspector General Medical Department.

ORDER THEREON, 4th January 1862, No. 5.

Communicated to the Government Astronomer.

(Signed) C. G. MASTER,

Deputy Secretary to Government.

No. 6,593.

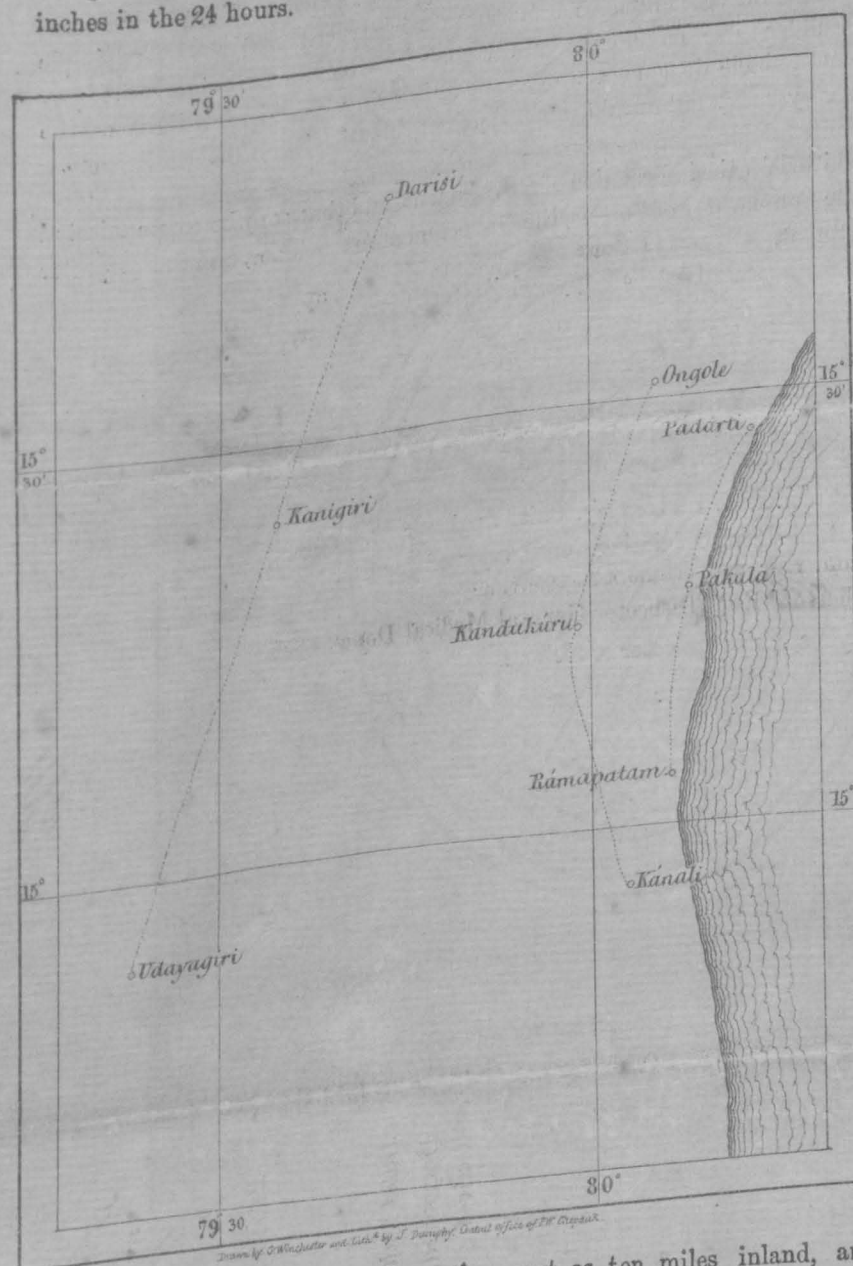

PROCEEDINGS OF THE BOARD OF REVENUE, dated 28th November 1861.

Read the following letter from J. W. B. DYKES, Esq., Collector of Nellore, to W. HUDLESTON, Esq., Secretary to the Board of Revenue, Chepauk, dated 9th November 1861, No. 233:—

1. The rain report for October, which I have the honor to forward herewith, calls for special remark, as the fall on the 20th at Pakala is registered at 15.35 inches.

2. When two years ago, the fall of rain at Nellore was registered at 14 inches, considerable doubt was expressed as to the accuracy of the measurement, though the gauges kept by both the Revenue and Public Works Departments gave pretty nearly the same results; and this being the case, it is probable, that still less credence will be given to a fall of upwards of 15 inches in the 24 hours.

3. I give in the margin a sketch of the positions on the map of the stations where gauges are kept in the Northern Division of this District. And dividing these stations into three lines, running north and south, the Board will observe that the corresponding stations on each line show a fall of rain in certain fixed proportions. For instance, the northern-most stations on each line are Padarti, Ongole, Darisi; Padarti being on the coast, Ongole 10 miles inland, and Darisi about 45; and at these three stations, the registered fall is, Padarti 14.91, Ongole 7;

Darisi 3.75; or twice as much on the coast as ten miles inland, and four times, as 45 miles inland. Again, taking a line from east to west, about half a degree south, we have the stations of Pakala, Kandukuru, and Kanigiri, with much the same relative positions and distances

4. Of course the preceding figures may be all a mere coincidence; and it is quite possible the measures may be all alike erroneous, either of which suppositions would equally negative any inference to be drawn from the above singularly marked proportions; but I am not aware that the measures are erroneous. They were all prepared under the supervision of my predecessor Mr. Elton, who took much interest in every thing that could tend to throw a light on meteorology; whilst those who keep the accounts have been carefully instructed, and have very simple accounts to keep. And under these circumstances, I cannot but look on the rain report now submitted as a correct and reliable document, and as such throwing considerable light on the laws that regulated the very heavy fall of rain in the north of this District on the 20th ultimo.
