*Proceedings of the Madras Government, Revenue Department,
14th September 1863.*

No. 187. Read the following Proceedings of the Board of Revenue, dated 2nd September 1863:—

Read the following letter from the Honorable R. S. ELLIS, C.B., Collector of Madras, to W. HUDLESTON, Esq., Secretary to the Board of Revenue, dated Saidapet, 29th August 1863, No. 332.

SIR,

* Communicated by the Board in No. 5,097, of the 15th August 1863.

1. With reference to Government Proceedings,* dated 13th August 1863, I have the honor to suggest:—

- 1st. That the number of Deer in Guindy Park might with advantage be reduced.
- 2nd. That the Deer should be restricted to a portion of the Park and that this Deer Park should be surrounded by a light iron fence consisting of iron uprights with wires passing through them. Such a fence would be permanent and ornamental and would effectually prevent the Deer from wandering. This kind of enclosure will be expensive, but will I think be more economical than a wooden fence, which would require constant repair.
2. The enclosed portion of the Park would require gates wherever the iron and wire fencing crossed the present drives.
3. Until some such protection is afforded, I think it will be very desirable to make the experiment suggested by Colonel Denison in paragraph 7 of his letter, and employ six watchmen at night during the season of cultivation.
4. It would also be desirable to repair the fences, round the portion of the Park adjoining the cultivation, which are now much damaged.

Submitted to Government with reference to their Order quoted by the Collector.

No. 188. ORDER THEREON, 14th September 1863, No. 1,693.

1. In addition to the plan called for in paragraph 2 of the Proceedings of Government, 13th August 1863, No. 1,492, the Governor in Council directs that orders be issued from the Public Works Department for the preparation and early submission of estimates of the cost of enclosing half of the Park or about 1,000 Acres in the mode now suggested by the Collector and also of making a good hedge round the same area.
 2. Meanwhile, six night watchmen at Rupees 5 each may, as proposed, be employed during the season of cultivation as an experimental measure; the bills for their pay being forwarded to the Private Secretary of His Excellency the Governor.

submitting a letter
from the collector of
all dues regarding
how the destruction
of the Crofs by the
deer at Grouchy Park,
might be prevented.

With undecayed

1693-1693

The usual mode of entering a Park without
leave or depositing a piece of some kind
here and there. There is a piece about eight
hundred yards round perhaps $\frac{1}{2}$ of the circumference
of the Park but the entry, a good piece
of the interior, and some smaller very great
and the entry entering space sufficient
in the Park now with the Park in the mode
proposed would also be great. I strongly
recommend however to be extremely with
entry entering day for the Park about
1000 acres with more proposed - and
also of making a good site, and at the
same time to be. ~~Water~~ might be
with some.

Stimulus can be called for, but it is not desirable
that much expense should be incurred in erect-
ing the outposts - The Watchers will therefore be
employed by the Civil Secretary from his funds. The
actual men & number can be kept in hand, it is
the Watchdog who is the running. The dog
