REVENUE DEPARTMENT.
FORT SAINT GEORGE,
18*th January* 1864.

No. 104.

No. 202.

From

J. D. SIM, Esq.,
Secretary to the Government of Fort Saint George,

To

The Secretary to the Government of India.

SIR,

1. I am directed by the Governor in Council to enclose a list of Establi shments which, in the opinion of this Government, are erroneously charged to Public Works, and for the entry of which in the Revenue Budget, I am now instructed to request sanction.

2. The Public Works grant, I am to observe, is simply an annual assignment from the revenue for the construction, repair, and maintenance of Public Works. The excavation of a channel, its maintenance in working order, and its repair when injured, are all perfectly legitimat charges on this fund, and the salaries, &c., of the Officers and Establishments employed on such duties are also clearly chargeable to it. But here, in the opinion of this Government, the liability of the Public Works Department should end.

3. A work once completed, the realization of the revenue produced by it devolves on the Revenue Department, which should clearly provide the whole Establishment necessary for the purpose. Among these Establishments it is obvious that Superintendents of Irrigation and Navigation, Maistries and Lascars to regulate the distribution of water or serve locks on canals and all servants maintained for similar purposes should be included. The employment of such Officers is necessary to admit of the revenue being realized, and they ought, therefore, to be charged against Income. To enter in the Budget of Revenue the income derived from such a work as the Godavery Anicut and to leave out the charges incidental to the realization of that revenue is not only erroneous, but has the effect of making the revenue appear larger than it really is.

4. The mistake of charging these servants to the grant for Public Works has doubtless originated from a misconception of the nature of their employment. In case of emergency such servants would no doubt aid in closing breaches and other similar work, but this is not the duty for which they are primarily entertained, and it is a liability which every District Officer from the Collector downwards shares with them. Officers for the distribution of water are attached to almost every village possessing means of irrigation, but these Officers are not charged to the Public Works grant, and it is not clear why a different course should be followed in regard to the works entered in the enclosed list, merely because when they were finished a separate Department of Public Works had, for administrative purposes, been formed. But for this change they would undoubtedly have constituted a charge on the Revenue.

5. If the question now submitted were merely a matter of account, the Government would not trouble the Supreme Government with this reference, though even in such a case they would regret the deviation from sound principle. But the effect of the arrangement is to deprive the Presidency of nearly a lac of Rupees out of the sum which the Government of India allot out of the annual revenues for the improvement of the country, and which is very far short of the amount the Government could profitably expend, and the development of the resources of the Presidency urgently require.

6. From the number and nature of the works on which the revenue from irrigated lands (Rupees 1,70,00,000 in 1862-63) is dependent, a very considerable portion of the annual Public Works allotment must be devoted to their maintenance, and forms in fact a direct charge on the Nunjah revenue. After providing with the utmost economy for Repairs, Establishments and Civil and Military requirements, the Government have little left for those new works without which the progress of the country would be stopped.

	Rs.
Establishments.	16,58,465
Revenue buildings	74,304
Public do.	3,15,531
Judicial do.	1,78,954
Military expenditure	3,38,033
Repairs.	22,38,294
Stores.	1,50,000
Total...	49,53,581
Balance available for developing the resources of the country.	14,32,595
Total actual expenditure in 1862-63. ...	63,86,176
Add amount unspent, ...	57,831
Total Imperial Grant...	64,44,007

7. The marginal abstract gives the disposition of the Imperial grant for 1862-63, and shows that in that year the Government had but 14½ lacs available for new works. This is equivalent to a little more than 2 per cent. on the revenue, and was all that the Government could afford to expend on a Presidency which by universal consent especially needs liberal treatment, and as actual experience shows amply repays it. The reduction of Establishments now places a somewhat larger sum at their disposal, but the insufficiency of even double the amount is self-evident, when the extent of the country, the importance of irrigation and the returns received from judicious expenditure are considered.

8. Moreover, if the present system is continued, the extension of Public Works Establishments will be unlimited, for each work as completed will need its own staff of servants, and the amount available for new works will yearly be diminished to a corresponding extent.

9. Under these circumstances, the Supreme Government will readily understand the anxiety of His Excellency in Council that the small amount which the exigencies of the State admit of being invested in projects, so profitable to the Exchequer, and so vitally important to the people, should not be lessened by being diverted from its legitimate purpose.

10. The charges for the current year may be passed against savings in the current year's Budget Estimate B. I.—and I am to request early sanction for this arrangement, and for the entry of the requisite amount in the Budget of 1864-65, which in confident expectation of a favorable reply, the Government have directed. The enclosed list furnishes full information regarding each Establishment, and in respect to the first entered in it, I am to request a reference to the enclosed Order of Government, dated 12th instant, No. 68A.

I have the honor to be,
Sir,
Your most obedient servant,
(Signed) J. D. SIM,
Secretary to Government.

Exd S. T. Augustin.

KISTNA DISTRICT.							
Conservancy Establishment.							
Anicut Establishment.							
1 Superintendent	100	0	0	1,200	0	0	The first Establishment for this District was sanctioned in consequence of the following representation. The Civil Engineer states that the demand for water for the extension of irrigation is so pressing, that the most injurious expedients are resorted to by the Ryots for securing a supply, such as throwing dams across the channels in some cases, and cutting the banks in others. By these means water is irregularly appropriated by the people through whose lands it passes, to the injury of the more remote villages and to the loss of Government. There being no Establishment to watch and protect the works, these proceedings remain unchecked, and are often not even known until much mischief has been done and loss occasioned. The Civil Engineer therefore earnestly advocates the immediate entertainment of an Establishment for the above purpose, and for regulating the supply of each village according to its real wants and the general interests.

Revenue Despatch

No. 1014.

To

The Secretary to the
Government of India

Sir,

I am directed by
Hon. Governor in Council
to enclose a list of Es-
tablishments which, in
the opinion of this Go-
vernment are erroneous-
ly charged to Public
Works and for the
outing of which in the
Revenue Budget I am
now instructed to re-
quest sanction.

The Public Works
Grant is simply an
annual assignment from
the

the Revenue for the Construction, Repair and maintenance of Public Works. The Excavation of a Channel, its maintenance in working order and its Repair when injured, are all perfectly legitimate charges on this Fund and the Salaries & Wages of the Officers and Establishments employed on such duties are also clearly chargeable to it. But here in the opinion of this Government the liability of the P.W.D. should end.—

At the work once completed, the realization of the Revenue produced by it, devolves on the Revenue Department, which should clearly provide the whole establishment necessary for the purpose. Amongst these establishments it is obvious that Superintendents of Irrigation, Overseers and Peons to regulate the distribution of Water and all Servants maintained for similar purposes should be included. The employment of such officers is necessary to the end of the Revenue being realised and they ought therefore clearly to be charged against Income. To enter in the Budget of Revenue the income derived from such

such a work as the Godavery
annicut and to leave out
the charges incidental to the
realization of the Revenue
is not only erroneous but
has the effect of making
the Revenue appear larger
than it really is. The
mistake of charging
these servants to the
grant for Public
Works has doubt-
less originated from
a misconception
of the nature
of their employment

Of

Of course in case of
emergency they would
aid in closing breaches
and other similar
work - but this is
not the duty for which
they are primarily
entertained and it
is a liability which
every District officer
from the Collr. down-
wards - shares with
them - Officers for
the distribution of
water are attached
to every village pos-
sessing means of
irrigation - but these
officers are not
charged to the P.W.
fund - and it is
not clear why a dis-
trict canal should
be

be followed, merely because in some important matter it is desirable to have a superior and better paid agency.—

If the question now submitted were merely a matter of account, the Govt. would not hesitate the Supreme Govt. with this reference, tho' even in such a case they would regret the deviation from a sound and sensible principle— But the effect of the arrangement is to deprive the Presidency of nearly a lac of Rupees out of the sum which the Govt.

Govt. of India allot out of the annual revenues for the improvement of the country and which in many instances short of the amount the Govt. could profitably expend, and the diversion of the revenues of the Presidency would greatly require.—

Again providing with the returned revenue— for labor, more perhaps, merely for improvements for repairing the existing works, and meeting establishments and the Military charges the Govt. allot, so

Govt

sum of Rs
yearly for the same
months - without which
the progress of the
Country would be
stopped. —

This summa amounts
on the Revenue of 1863/4
to per cent.
and in all Mind the
Govt can afford to
expend on a Provi-
dency which by uni-
versal consent spe-
cially needs liberal
treatment, and by
actual experience
shews ~~that it~~ amply
repays it. Under
such circumstances
the Supreme Govt
will possibly understand
the

the anxiety of H.E.
in Council that the
small sum which
the exigencies of the
State admit of being
invested in projects
so profitable to the
Exchequer and so
vitally important
to the people should
not be diverted from
their legitimate pur-
pose. —

The charges for
the current year
may be secured
against Savings in
the Current year's
Budget Estimate
B
and I am to request
early sanction for
them

I

this arrangement
and for the addition
of the requisite amount
in the Estimates of
1864/65.——

Fort St. George
18th. July 1864.

The Civil Engineer states that the demand for water for the ordinary irrigation is so pressing, that the most injurious expedients are resorted to by the Ryots for securing a supply, such as throwing dams across the Channels in some cases, and cutting the banks in others. By Abkaree means water is irregularly appropriated by the People thro' whose lands it passes, to the injury of the more remote Villages, and to the loss of Cost. There being no Establishment to watch and protect the works, these Proceedings are sometimes unchecked, and are often not even known until much mischief has been done and loss occasioned. The Civil Engr. therefore recommends the adoption of the immediate entertainment of an
