Dated 23-3-1884

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
23rd March 1864.*

No. 305. Read the following letter from the Governor General of Netherlands India, dated Batavia, the 9th February 1864, No. 42 :—

1. Dr. F. Junghuhn, the appointed. Inspector of Natural Researches and in charge also of Kino culture at *Java*, having brought to my notice the successful cultivation of certain Kino plants at *Ootacamund*, it is considered very desirable to cultivate also this plant at *Java*.

2. The above kind is called the *Chinchona Condaminea* of Boorgs-land, whereof there were 4,193 plants cultivated at *Ootacamund* in February 1862, from seed collected at *Paris* by Mr. R. Spruce.

3. From communications received from Dr. Junghuhn, it is stated that these plants were since very largely increased from layers, and are known as *Condaminea Crispa*, of *C. Chahuarguera* and *C. Uritusinga*, the second quality of which contained a larger portion of quinine than of those of the first kind, and the third quality still more than those of the second.

4. The fact of the Kino culture having been brought over from *South America* to *British India*, induces me to solicit the assistance of your Excellency to comply with the wishes of Mr. Junghuhn for introducing the *Chinchona Condaminea* into our Colonies.

5. May I therefore be permitted the favor of requesting your Excellency to support me in my present views, and to do me the favor of previously informing me of the number of plants of the above class, particularly those of the *C. Uritusinga* and *C. Chahuarguera* nursed from layers as well as from seed, as a guide for me.

6. It is my intention to send a person over to *Ootacamund* for the purpose of obtaining correct information, regarding the method of packing the boxes and bringing over the plants to *Java*.

7. Your Excellency would also greatly oblige me by informing me at what period of the year, these plants could be best safely transmitted, as I have been informed that the easterly winds in the *Madras* roads are not to be despised.

8. On my part, I declare to be ready, as far as concerns the cultivation of Kino at *Java*, to forward to *Madras* packing boxes for the purpose of being filled with plants of the *Chinchona Lanceolata*, *Lanceifolia* and *Calisaya*, in exchange for the Chinese raw Indigo plants (*Rhamuns*, *Utilis* and *Colorofarns*) by which benevolent act of our mutual Governments, the so much desired cultivation of Kino in our Indian shores will be secured.

9. The great importance placed by Your Excellency on this matter, is a guarantee I trust to my proposal being favorably accepted.

A true translation from the original Dutch language.

(Signed) B. C. REGEL,

Dutch Interpreter to the High Court, Madras.

No. 306. ORDER THEREON, 23rd March 1864, No. 514.

1. Communicated to the Superintendent of the Chinchona Plantations, who will be requested to furnish the information required in this letter.

2. Mr. McIvor will at the same time state what plants he considers it desirable to obtain from *Jaya* for cultivation on the Neilgherries.

(True Extract.)

(Signed) J. D. SIM,

Secretary to Government.

To the Superintendent Government Chinchona Plantations.

Kabinet Attaria, den 9: Februarij 1864.
N: 42.

De Inspektie is bestemd voor na:
tuurkundige onderzoekingen tusschen beland
met de lading der Kinkabullen op Java
De H. J. J. J. J. heeft mijne aandacht
gevestigd op de omstandigheid, dat onder
de Kina- aanplantingen te Potacamin
een soort voorschand is, die het zeer
verschillende zijn ook op Java te
kultiveren.

Deze is de Cinchona Condaminea
Heim boldt in Potacamin, waarvan
in Februarij 1862 te Potacamin 4193
stukken werden aangeplant, opgekweekt
en zaden, die door den Heer R. Speiser
in Potacamin verzameld waren.

Volgens mededeeling van H. J. J. J.
heeft men de planten sedert zeer on-
menigvuldig door afleggen stijgen
en
