*Proceedings of the Madras Government, Revenue Department,
2nd April 1864.*

No. 44. Read the following letter from T. H. L. GORDON, Esq., to J. D. SIM, Esq., Secretary to Government, Revenue Department, Fort Saint George, dated Kilpauk, Madras, 21st March 1864:—

SIR,

1. With reference to the Order of Government dated the 24th November last, No. 2,123, authorizing my removal from the Revenue Survey Department on the ground of unfitness, I have the honor to request that you will be good enough to submit the following circumstances and, I most respectfully beg, that the Government on reviewing the facts connected with, firstly, my Diaries; and secondly, with the Annual Report from Captain Barber, Deputy Superintendent

• Hereto annexed marked A.
† Marked B. and C.

Revenue Survey, (specially* concerning me) for the year ending 1863, and with the letter† from Lieutenant Shortt, First Assistant Superintendent Revenue Survey, will re-consider

their decision, and relieve me from the ignominy, anxiety, and loss, consequent on my removal from their service.

2. The Diaries which formed the subject of remark are for the month of† August 1863.

‡ True copies hereto annexed marked D.

From these it will be noticed that observations of the sun at six Theodolite stations were taken between the 1st and 15th of

that month, both days inclusive. Each station consisting of two lines calls for two observations, technically called *bearings*, and each observation or bearing consists of four Azimuthal and four Altitude readings; the instrument has then to be reversed and read again four times more, making the readings double, or in all sixteen readings of Azimuths and Altitudes for the bearing of one line only, the magnetic bearing of each line composing a station has then to be observed, and the chain measurements of each line, with the forward and backward angles at each station have to be taken and noted. At trijunction stations, or where three lines meet at a station, the observations, magnetic and of the sun, are consequently tripled, unless one of these lines is not *demarkated*. The time occupied at an ordinary station for the work required for the bearing of two lines, is approximately three hours, and for a trijunction of three lines or quarter junction of four lines, three

and half hours. In compliance with a letter§ from Lieutenant

§ Hereto annexed marked E

Shortt, First Assistant Superintendent Revenue Survey, I had

to make a fair copy, with a diagram of my bearings, and send them to him *immediately* after each had been taken. In order that there should be as little delay as possible in going over the ground, I thought it the most judicious method to encamp in a central position at a radius of about six miles from a number of stations at which bearings had to be taken, along the circuit of a Talook, instead of shifting camp from station to station, as much time would have been lost had I done so. In the Tinnevely District it was impossible to have been nearer my work than six miles, as from the nature of the country there is no village or habitation of any kind conveniently at hand to form a camp, to pursue the peculiar duty on which I was engaged. In regard to the

remarks in my Diaries|| for the month of August 1863 under

|| Marked D, hereto annexed as aforesaid.

notice, as well as those of all my other Diaries which I do

not think necessary to encumber the Government with reviewing, as no doubt they have been already forwarded by the Superintendent of Revenue Survey, it will, I humbly trust, be seen

¶ Vide 3rd and 4th columns of Captain Barber's Annual Report for the year 1863 marked A, also letters from Lieutenant Shortt, First Assistant Superintendent marked B. and C.

that the *superlatively*¶ damaging statements made against me as to zeal and energy are incorrect, and more prominently so, when considered in connection with the definition of the details of the duty on which I was engaged as already stated.

3 In regard to the documents generally and marked respectively Z, A, B, C, and D, hereto annexed, I beg most respectfully to bring to the notice of Government and as explaining why I have been unable to forward this letter for their consideration earlier, that, although I applied for the documents marked respectively A, B, and C, (hereto annexed as aforesaid) as references, in order to frame a reply to the statements contained therein, so far back as the 3rd October last, (true copy of my letter hereto annexed marked F.), I did not receive them and was therefore obliged to have recourse to address a letter to the Superintendent of Revenue Survey at Madras (true copy of my letter is hereto annexed marked G), when I received them on the 3rd instant only.

Proceedings of the Madras Government, Revenue Department,
2nd April 1864.

• Marked A as aforesaid.

4. In regard to the several statements in the columns of the special Report^a concerning me, I beg most respectfully and with due deference to those who were my immediate superior Officers, viz., the Deputy Superintendent and the First Assistant Superintendent Revenue Survey of No. 4 Party, to offer the following remarks in explanation, in their consecutive order:—First column, the records at present with No. 1

† I had to revise the whole of this Circuit except 20 to 25 stations.

Party at Coimbatore will show that the Grand Circuit of the Nellurnaad Umsham in the Wynad although undertaken for survey and left unfinished, two seasons ago, was closed by me. All but one or two of the Coffee estates in South Wynad which were under my immediate superintendence closed, and their true areas found, and the boundary circuit of one of them the "Walthamstone" estate was, besides my superintending duties, surveyed by me and closed. The northern portion of the Grand Circuit of the Coimbatore Talook was surveyed by me, but it was impossible to say whether the whole circuit closed or not

‡ This applies to the latter clause of the first column "does not execute it with proper care, &c."

as part of the Talook boundary had just been demarcated when I left for Tiunereilly, and therefore it was premature to say whether my part of the work on the northern portion

of the Grand Circuit of the Coimbatore Talook in connection with any one else's work on the southern portion was correct or not; but what I would humbly beg to draw attention to is, the fact that not a single circuit on which I was engaged was returned to me for correction. Second column, the remarks in this column refer to the time I was employed on the Grand Circuit of the Coimbatore Talook, the beforementioned records will show that the time computed from to obtain the average of the angles taken daily by me, was from the month of May 1862, whereas I was

§ Vide Official Memorandum No. 32, hereto annexed, marked H.

not relieved from inspecting Amiens till the 15th July 1862. As to evincing zeal in the execution of my duties generally, I humbly trust that the Government will perceive

from the correctness of my work not only with regard to actual surveying with the Theodolite and chain, but from the correctness of my work with regard to the more important duty (as an Officer in the Department of Revenue Survey) of taking bearings, that the charge of want of zeal is unfounded. The remarks in columns 3, 4 and 5, I most respectfully beg to submit, are gratuitous assumptions; and I most certainly deny having ever made use of language towards my inferiors superlatively coarse, as alleged against me, and to the best of my knowledge and belief, I have not addressed them even in a coarse manner, in any one instance.

5. In conclusion, I beg most respectfully to bring to notice that I passed the full test in the examination in Tamil, prescribed by Government in their Order dated 6th August 1856, for Officers in the Department of Public Works, before I was confirmed in my appointment as Second Assistant Superintendent Revenue Survey. I qualified myself for this examination entirely at my own expense before I entered the Department; and in corroboration of the fact, that I have been materially assisted in acquiring a ready knowledge of the principal instruments in use in

|| Accompanying herewith.

the Department, I humbly beg to submit my Certificate of

Competency from the Lords Commissioners of the Committee of Privy Council for Trade, to obtain which I had to undergo a very rigid examination in the use of nautical instruments, the readings and uses of which bear a close resemblance to the Theodolite, Prismatic Compass, &c. Finally, I humbly beg to submit for the consideration of Government that I am thoroughly convinced I have done my duty as an Officer in the Revenue Survey Department faithfully, diligently and to the best of my ability.

No. 45.

ORDER THEREON, 2nd April 1864, No. 535.

• G. O. 26th November 1863, No. 2,123.

Mr. Gordon's case was carefully considered and the decision of Government thereon was based on an experience of his services extending over a fair time of trial. The Government have now considered his appeal, but see no grounds for altering their original decision.

(Signed) J. D. SIM,

Secretary to Government.

Copy of a letter from the Superintendent Revenue Survey to the Deputy Supt. N. 4 Revenue Survey dated 8th October 1863.

On your mentioning to me in September last that you were desirous of forwarding a report to me for consideration I am glad to hear that you should furnish me with a report on the gentleman's capabilities and that whether such a report would be of service to the Government or not. I am glad to hear that you should furnish me with a report on the gentleman's capabilities and that whether such a report would be of service to the Government or not.

I have now placed this report before the Government for their consideration and I request you will address the same to the Government.

Knowledge of his Departmental duties	Whether he is a good officer	Whether he is a good officer	Whether he is a good officer	General remarks

Copy of letter from the Deputy Supt. N. 4 Revenue Survey to the Superintendent Revenue Survey dated 10th October 1863.

I have the honor to acknowledge the receipt of your letter of the 10th and in reply to forward the report thereon called for.

Report of J. D. SIM, Esquire, to the Deputy Supt. N. 4 Revenue Survey dated 10th October 1863.

Knowledge of his Departmental duties	Whether he is a good officer	Whether he is a good officer	Whether he is a good officer	General remarks

Copy of letter from the Deputy Superintendent Revenue Survey to the Deputy
Superintendent. N^o 4 Revenue Survey dated 12th Decr 1862. N^o 1041.
I have the honor to request you will communicate the
comparative merits to your 2^d Assistant. Mr. Gordon whose conduct
I regret to learn by the report furnished with your letter N^o 1041 is
unworthy of the satisfaction.

Memorandum N^o 1042.
The Deputy Superintendent deemed it necessary to call on the
Deputy Superintendent of N^o 4 to furnish him with a report
on the qualifications and responsibilities of his 2^d Asst. Mr. Gordon
on being informed that the officer had made
application for promotion.

The report has been furnished and the Deputy Regt
to say that it is unfavorable.
Mr. Gordon it appears has a fair knowledge of his
departmental duties and is physically fit to perform them.
from want of zeal, temper and discretion however so far from being
eligible for promotion he is apparently of little or no value as an
Assistant.

On a former occasion the Deputy Regt remarked that
very small amount of work performed by Mr. Gordon in
the month.

At the instance of Captain McFay and Barber
the Deputy Superintendent was induced to submit Mr. Gordon's name
for promotion to Asst. Deputy although he himself was rather
doubtful of his efficiency. He was aware however that
without some increase of salary Mr. Gordon might find it
difficult to maintain his position with regard and decided that
his promotion would not be a material loss.

That such a result has not been effected is the
Deputy's and disappointment and he feels bound to warn Mr.
Gordon that unless at an early date a report favorable to him
regards zeal, temper and discretion is forthcoming
that for from the head of his party he will feel constrained to
take measures for his removal from the department.

Captain Barber has apparently been too far from
not having reached the Deputy's office in time to
the Deputy Superintendent's office officially.

Deputy's letter to Captain
McFay dated 21st
May 1862 N^o 546
para 3.

Copy

Copy of letter from the Deputy Revenue Survey to the Asst
Deputy Revenue Survey in charge of N^o 4 party dated 9th May
1862. N^o 395.

1. According to my communication to Captain
Barber's address of the 12th December 1862. N^o 1041 I have the honor to
request that you will furnish me with the report this was referred
to regarding the qualifications and conduct of Mr. Gordon's Asst
Deputy Revenue Survey.

2. As this party is about to leave for Timoruly
I beg that you will lose no time in forwarding the report.
Copy of letter from Lieut. C. A. Short to Asst. Deputy Revenue
Survey to the Deputy Revenue Survey dated 9th May 1862.

In reply to your letter of the 7th Instant N^o 358
I regret much to have to inform you that no improvement has
been received by me in the conduct of Mr. Gordon Asst. Deputy
Revenue Survey since the report of Captain Barber Esq. Deputy
Revenue Survey dated 10th Decr 1862. As to his qualifications I have
only to report Captain Barber's words viz. "his knowledge of
departmental work fair. But what I have most to complain
of is his apparent want of zeal and energy. When sent to do
any work he takes much longer time to perform it than there
could be any possible reason for."

Copy of letter from the Deputy Revenue Survey to the Asst
Deputy in charge of N^o 4 party dated 23rd May 1862. N^o 395.

1. It is with deep regret and regret that I have received
your reply to my letter of the 7th Instant N^o 358 giving me a
report on the conduct of your Asst. Mr. Gordon.

2. It appears Mr. Gordon still fails to give
satisfactory and displays neither zeal nor energy. A vigorous
performance of my duty would necessitate my representing to
Government this officers shortcomings and recommending his
removal from the department. I am however loth to take the
extreme step and am willing to give him more opportunity
of retrieving his character. I permit however my fear that
for the future Mr. Gordon should keep a diary showing
where he may be each day how employed and the amount of
work performed. This diary he will send in to you weekly and
at the close of each month you will submit it to me with such
remarks as you may consider requisite.

3. I have the honor to request you will lose no time
in

communicating to Mr Gordon the expression of my displeasure
his conduct and my determination to relieve the Department of
me if a marked improvement is not observed. you will also
instruct him with a heading for his diary and instruct him
to commence it without delay.

Copy of letter from the Asst Supt Revenue Survey
in Charge of No 4 party to the Supt Rev Survey dated
19th July 1863. No 13.

I have the honor to enclose weekly diaries
of Mr Gordon Asst Supt Revenue Survey up to the 5th
inst with my remarks thereon.

Diaries omitted.

Copy of letter from the Asst Supt Rev Survey in charge
of No 4 party to the Supt Rev Survey dated 11 August 1863
No 21.

I have the honor to enclose weekly diaries from
1st ultimo to 1st instant of Mr Gordon Asst Supt Revenue
Survey with my remarks thereon. From the diaries of this officer
for June and July you will be able to judge whether the reports
of his zeal and fitness are well founded or not.

Diaries omitted.

Copy of Memo from the Supt Rev Survey to the Depts
Supt & Revenue Survey dated 19 August 1863. No 140.

The Superintendent has received from the
officer in charge of the Annville Survey diaries kept by
Mr Gordon Asst Supt Superintendent Revenue Survey in
conformance with the Superintendent's instructions extending
over a period of two months from 5 June to 1st Aug 1863.

On the receipt of these for June the Supt resolved
to wait before pronouncing any opinion in hopes that the
work performed during July might prove Mr Gordon's
services of some value and that he was possessed of some
zeal. The perusal of the diaries for July however has caused
the Superintendent much disappointment.

It appears that Mr Gordon arriving on the
1st June had not the stand of his theodolite repaired till
the 9th. It was his duty to see that no such unusual delay
occurred at any rate that 5 days were not thus lost.

On the 10th although it was the 6th day after
arrival he had not apparently found time to collect his
pens and instruments notwithstanding that he had received
instructions to start from Annville on the 9th.

5. During the remainder of the month the Asst Supt
to have taken the bearing by observation of lines and until he
received specific orders to do so appears to have considered it
unnecessary to examine the work of his subordinates in the
night court hood. His diary from the middle till the end of the
month is little but a record of obstacles to work instrument
again out of order, rain, fever and stomatitis. As to his detention
at Annville for want of bullets the Superintendent considers
him responsible for it as he should, as was quite possible,
have given ample notice before hand that he required
them.

6. From the 16 to the 19 July only 9 bearings were
taken and some inspection performed.

7. From the 20 to the 26 in one day only some inspection
of work was made during the remainder Mr Gordon reports
that he was suffering from severe diarrhoea, severe fever and
faint all over his body.

8. From the 29 to the 31 August four bearings
were taken.

9. The Superintendent is disposed to make liberal
allowance for delays which may occur to the most zealous officer,
but many of those set down by Mr Gordon were not unusual.
Stable and the maximum of work he performed on any day that
may be called a working day it was a total want of zeal and
energy without which no Asst Supt can be useful to the
Department.

10. Mr Gordon's frequent and various ailments
moreover induce the belief that his health is not sufficiently
good to enable him to bear the fatigue necessarily encountered
by an officer who performs his duty efficiently.

11. After due consideration therefore the Superintendent
directs the Deputy Supt No 4 party to intimate to Mr Gordon
his determination to recommend his removal from the Department
if the diaries for August do not show a marked improvement, even
in the event of such improvement taking place it will still be
the Superintendent's duty to take the steps should a general
review of Mr Gordon's services at a later date demonstrate
that he is inefficient and incapable.
