~~Mis.~~

1187-182

Dated 17/7-55 - 19/8/64

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
17th May 1864.*

No. 181. Read the following Proceedings of the Board of Revenue, dated 28th April 1864,
No. 2,574.

Read the following letter from the Officiating Director of Revenue Settlement, dated Madras,
15th April 1864, No. 474-19:—

1. Referring to paragraph 12 of the Proceedings of Government dated 5th instant, No. 577, I have the honor to forward for submission to them an original letter from the Deputy Director of Revenue Settlement in Trichinopoly, dated 11th April, No. 40, giving cover to a specimen Settlement Register.

2. Mr. Puckle strongly recommends that all the Registers should be printed and in diglott, and he states that Messrs. Graves & Co. have offered to contract for the performance of the work on very reasonable terms. He estimates that thirty copies printed in diglott will cost for the whole District Rupees 50,000, while the cost of writing four copies also in diglott would amount to half that sum, and of the difference of cost, he calculates that one-half, or Rupees 12,500 will be recovered by the sale of spare copies of the Registers to private parties. The advantages arising from the adoption of printing so clearly pointed out by Mr. Puckle, are undoubted, and even if the additional expenditure involved was greater, I should consider them cheaply purchased. I recommend that his proposal be sanctioned.

3. Mr Puckle however, makes no provision for the cost of writing the first Register. He can hardly intend that the type should be set from the Registers already written, which will contain innumerable erasures, corrections, and interpolations. If a fair copy has to be written, it will cost, according to Mr. Puckle's calculations, Rupees 6,250.

4. I think the price proposed to be charged for a single copy of a Register too high: a lower rate will probably lead to larger sales. Mr. Puckle should be vested with discretion to print a larger or smaller number of copies with reference to the probable demand, as proposed in paragraph 6 of his letter.

5. Mr. Puckle states that Messrs. Graves & Co. are prepared to supply machine-laid "Fort Saint George Gazette," 26th January 1864, page 142. Foolscap at Rupees 5 per Ream. According to the price list published by the Superintendent of Stationery, similar paper supplied by him costs 4 Annas $4\frac{1}{2}$ Pies per Quire, or Rupees 5-7-0 per Ream. By the Order of Government noted in the margin, it was directed that hand-made Foolscap should be used for the Settlement Registers, but this was on the supposition that they would be written. I recommend that a few copies be printed on hand-made Foolscap, and the rest on good strong printing paper.

6. It will be pointed out to Mr. Puckle that the English terms should be used in Columns 4 and 5, and not the Tamil terms in English characters. It will also be pointed out to him that under the Order of the Government of India in the Financial Department, dated 3rd January 1861, No. 2, the use of "Pies" should be avoided in calculating the assessment payable on each field, the amount being struck out if below 6 Pies, and 1 Anna being entered if otherwise. Thus the sub-division of Column 10 for "Pies" may be dispensed with, and four similar sub-divisions will be got rid of in Abstract Statement No. 2.

ENCLOSURE No. 1.

From R. K. PUCKLE, Esq., Deputy Director of Revenue Settlement, to R. E. MASTER, Esq.,
Officiating Director of Revenue Settlement, dated Trichinopoly, 11th April 1864, No. 40.

1. As required in paragraph 12 of Proceedings of Madras Government, dated 5th instant, I have the honor to forward herewith a specimen Register, and to request instructions as to whether the Registers are to be printed, or written; and whether the entries in all Registers may be made in diglott; or whether distinct English and Tamil copies should be written, or struck off

*Proceedings of the Madras Government, Revenue Department,
17th May 1864.*

2. The advantages of printing are obvious; and the diglott form is far preferable to distinct forms in English and Tamil; but the cost of printing Registers for 1,254 villages is a heavy charge on the department, though not so heavy in reality as at first sight it would seem to be; for at least one-third of the cost of printing is likely to be recovered, by the sale of Registers; the labour of supervision, and the cost of copying, will be saved entirely; the records will be neater, and more concise and permanent; they cannot possibly be tampered with when issued; they will doubtless find more purchasers; and a larger number of copies will be available for official use.

3. It was originally intended to prepare two English, and two Tamil copies, for the Board of Revenue and Collector, the Tahsildar and Curnum respectively. This number will however be wholly insufficient, as no allowance has been made for a reserve in case of accident; for an office copy for the Deputy Director; or for a copy to be supplied to the Superintendent of Survey, to enable him to correct the Maps.

4. It must be very desirable that the Sub-Collector, or Head Assistant, should have a Register of each village in his Talooks; and also that the Engineer, the Civil Judge, and District Moonsiffs, should each be supplied with an office copy.

Board of Revenue.	Civil Court.
Collector.	District Moonsiff.
Sub-Collector.	Engineer.
Tahsildar.	Survey Superintendent.
Curnum.	Deputy Director.

5. Thirty copies of the Registers can be struck off at the same price as a single one; and if ten* were issued officially, twenty copies would remain for private sale, and to re-place those worn out or destroyed.

6. Twenty spare copies would be more than we should require in certain cases, and the number to be printed might be regulated by the probable demand. In some rich villages, each Mirassidar would wish to secure a Map and Register (if the latter can be supplied, as I think it can, at less than 2 Rupees a copy), and in such cases forty or fifty copies would be required.

7. The accompanying Register was printed by Messrs. L. C. Graves & Co. at their Press at Trichinopoly, and they are willing to undertake this work in diglott, at the very low charge of 12 Annas a page.

8. Their usual charge for Long Primer form printing is 2-8-0 per page, and the reduced charge of 12 Annas is made for this special work, in consideration of the continuous employment that will be afforded to the Press in this District alone, and the probability of its being employed on similar work of each District settled in Southern India; the specimen Register contains eight pages for which 6 Rupees are charged, and an additional 12 Annas for the descriptive memoir prefixed, or a total of 6-12-0 for thirty copies, or for any number up to three hundred; binding and paper, are separate charges; that for binding being only a few Annas per copy; and the Firm will contract to supply machine-laid Foolscap at 5 Rupees a Ream.

9. The District contains 1,254 villages; each of which will require Abstract Statement Nos. 1 and 2, and also a descriptive memoir. On a rough calculation there are 8 lacs of survey numbers (including interstitial fields), and if 25 numbers be exhibited in a page at 1-8-0, the cost of printing the body of the Registers amounts to 48,000 Rupees, or with abstracts and descriptive memoirs, to, say, half a lac of Rupees.

10. The cost of writing four copies of the Registers (two each in English and two in Tamil) would be at 6 Annas a page, 12,500 Rupees (including abstracts), at this calculation four copies can be written in diglott at a cost of 25,000 Rupees, or at one-half of the sum for which thirty can be printed.

11. These four copies as mentioned above will not be sufficient for our purpose. The work will require strict supervision, and will necessitate a considerable addition to our already unwieldy establishment; manuscript is inferior to printing in every respect; the cost of four copies in diglott is equal to half that of thirty in print; and of the 25,000 Rupees that represent the difference of cost between printing and writing in diglott, we may reasonably expect to recover half the amount or 12,500 Rupees by the private sale of Registers.

*Proceedings of the Madras Government, Revenue Department,
17th May 1864.*

12. Thus the additional charge involved will be but 12,500 Rupees or 10 Rupees per village, a mere fraction of the amount already expended on the Survey and Settlement of the District; and a very small sum to pay for the advantages to be gained by printing these valuable records.

13. For the very existence of such records in public offices, and in the hands of individuals, will tend to expedite the transaction of public business, and to reduce litigation, titles will be confirmed in the course of time, by the mere fact of the registry having passed unchallenged for a certain number of years, and landed property paying rent to Government will rise in value, in the same proportion as the Inám lands, which are now said to be worth 50 per cent. more than they were before their recent registry.

14. If the Government will sanction printing the Registers, Messrs. Graves & Co. will send immediately to Madras for more hands, an additional press, and a fresh fount of type, and will undertake to turn out an average of four villages or 200 pages of printing work per diem, and thus ensure the completion of the District in 320 days or by the end of the approaching Fusly.

1. Ordered that the above letter be submitted for the decision of Government.

2. The Board on a former proposal by the Collector of Nellore that he should print the Registers for his District, objected that the original must be in MS., and signed by the responsible Officer, and that the necessity for multiplying copies was not apparent.

3. They fully admit all the advantages that printing would secure, and view it simply as a matter of cost.

4. Mr. Master points out that Mr. Puckle has not provided for the cost of preparing the fair copy for the Press; but as this would be an item on both sides of the account in comparing the cost of printing with that of manuscript, the charge estimated by Mr. Puckle of Rupees 50,000 for thirty copies, of which Rupees 12,500 are estimated to be recovered by sale of spare copies, may be set against the cost of preparing in MS. at least four copies in Diglott, which Mr. Puckle estimates to cost 25,000 Rupees, with the great probability, or almost certainty that this number will not be ultimately sufficient.

5. The Board are willing to accept the printed copy signed by the responsible Officer, as an equally genuine and authentic document with the MS. original, which will of course be spoiled in the Press, and considering the great facilities for multiplying copies which printing will afford, the increased number of copies required for official purposes, the great advantages of having the Registers in print, and the demand for copies on private account which Mr. Puckle states to exist, the Board advocate the adoption of his proposal.

6. They are of opinion that the question of cost should be referred to some professional Printer, before the offer submitted by Mr. Puckle be accepted, and they are disposed to think that tenders for printing should be called for, as with the facilities afforded by the Rail and the Coast Steamers, there would seem to be no insuperable difficulty in the way of printing the Registers in Madras, if economy of cost could thereby be secured.

7. They observe that the forms will be or may be stereotyped, and that in the Register submitted by Mr. Puckle, there is a very large proportion of needless repetition, which might easily be avoided, and the cost thus reduced.

No. 182.

ORDER THEREON, 17th May 1864, No. 841.

1. The Government concur with the Board as to the desirability of having the Registers printed. They will be most valuable as records of title, and as five copies are the least that will suffice, printing will be cheaper as well as preferable.

2. Messrs. Graves & Co. offer to print the Registers at 12 Annas per page, exclusive of paper, but the work can be done in the Government Press at 5 or 6 Annas. Taking the latter price, the cost of printing, according to Mr. Puckle's Estimate of the number of pages, would be

3

Proceedings of the Madras Government, Revenue Department,
17th May 1864.

under Rupees 25,000 while the cost of writing only four copies would, Mr. Puckle states, be Rupees 25,000. As, however, five copies would certainly be required, the cost of writing would slightly exceed 30,000 Rupees. Moreover, if the Registers be printed, a considerable portion of the cost may be recovered by the sale of spare copies which can be struck off at no more than the cost of the paper used.

3. If Messrs. Graves & Co. will undertake the work at the rate of 6 Annas per page, a contract, in such form as the Board may approve, may be concluded with them.

4. The Register should be printed in larger type (Pica), on superior stout white printing paper, which can, the Superintendent states, be procured from the Stationery Office at Rupees 12-5-0 per Ream. In this item also there will be a considerable saving by printing instead of writing the Registers.

5. The Register submitted by Mr. Puckle contains, as the Board remark, much needless repetition, which as shown in the accompanying Form, may easily be avoided. Abbreviations may also be used with advantage, as P. for Poonjah, &c.

6. The Government do not see the use of the Abstract Statements being printed. No. 1 shows the cultivation and waste in each Taram, and No. 2, the extent and assessment of the cultivated area, but as these will vary every year, little will be gained by printing the details of one year only. It seems to the Government that a single abstract showing the entire cultivable area under each rate would be much more useful. A Form is attached to show the kind of abstract intended.

7. The descriptive Memoir is very brief. The object of a Memoir is to place on record statistics of population, local peculiarities, circumstances which influenced the Settlement when exceptional, and generally such information as will hereafter be of use in the administration of the District. The Memoir submitted does not meet these requirements, and Mr. Puckle should be instructed to record such useful and reliable information connected with each village as he has collected in the course of his Settlement enquiries. These Memoirs, however, need not be printed.

(True Extract.)

(Signed) J. D. SIM,

Secretary to Government.

DESCRIPTIVE MEMOIR

This village is situated 3 miles to the east of Lalgudi Casbar on the main road to Udayarpalayam. The soil is light and sandy; and it is partly irrigated direct from the Ayan vaykal, and partly from surplus water raised by the pacottah. The Nangai lands are placed in the 2nd group; and the Punjai in the 1st. There is no cultivable waste or Inam land in the village.

R. K. PUCKLE,

Deputy Director of Revenue Settlement.

no 3763
Rev. Secy

L. W. 588-
S. B. 15-4-64-

Rev.
1158/64.

2
In No 2075 of 1864

11th May 1864
to 8/10
10/10/1864

Revenue dep.
No. 814-
Method of Government
to the 17th May 1864-
of the Bd. 17th May 1864
Revenue - Present 28th April 1864
No 257/14

He put on cur with
the Bd as to the de-
sirability of having
Registers printed.
They will be much
valuable as records
of title, and as pre-
serving all the least
valuable will be piece
mounting will be
heaped as well as
be feasible.

papers to Co. Mr.
to print the Register
at 12 annas per
page, exclusive of
paper. But the work
can be done in the
Print Press at 10 or
12 annas. Taking 1

I think it would be dear
to print this and to attract
as much as possible. That
is useful & the description
memor equally so, unless
carried to an extent which
would make it too expensive.

W

pp
I think that the type
might be larger - also
that abbreviations
might be used - These
I must leave for
Pungah - N for Nungah
P for Pungah -

after price, the
 cost of printing,
 according to Mr.
 Pickle's estimate
 of the number of
 pages, would be
 under Rs. ^{25,000} 30,000.
 While the cost of
 writing only four
 copies would, Mr.
 Pickle states, be
 Rs. 25,000 - as, how-
 ever, 5 copies would
 certainly be required
 the cost of writing
 would slightly exceed
 30,000 Rs. - Hence
 if the Registers be
 printed, a consi-
 derable portion of
 the cost may be
 recovered by the
 sale of spare copies
 which can be the

and for
 can - in fact
 the cost would
 be equivalent to the
 oblation - as

$$P = \text{Punjab}$$

$$L = 45000$$

$$R = \text{Soury Raper}$$

to complete more
 than the cost of
 the paper used.

3. If Messrs. par
 Ho will under-
 take the work at
 the rate of Rs. 10
 per page, a contract
 in such form as
 the H. G. may approve,
 may be concluded
 with them -

4. The Registers should
 be printed ^{in larger type} on the
 best stout white
 printing paper, which
 can, the H. G. states,
 be procured from
 the Stationery Office
 at Rs. 12-5-0 per Ream.
 In this item also
 there will be a con-
 siderable saving by
 the ~~publishers~~
 printers instead of

in larger type

Writing - Registers.

The Register submitted
by Mr Puckle ^{contains}
as the H^{on} remarks
much needless re-
petition, which
as shown in the ac-
companying ^{form}
may ~~be avoided~~ easily
avoided. Abbreviations
b. The fut. do not
see the use of the
Abstract States, as
being printed. No.
shows the cultivated
& Waste in each
Tahiti, & No 2, the
Extent & Assessment
of the cultivated area
but as these will
vary every year,
little will be gained
by printing the de-
tails of one year
only - It seems

may also be used with
advantage as for
Bonjah &c -

The fut. that a

Simple Abstract
^{enumerating cultivated}
showing the area
under each rate
should be much
more useful. A
table to show the kind of
crops, is ~~from~~
abstract entitled -
The Income

7. The description
memorandum is very
brief - It is a
memoir
to place on re-
cord statistics of
population, local
peculiarities, &
circumstances which
influence the settle-
ment as far as
possible to be
informed as well
as the use
the administration
of the Dist. The Memoir

submitted does
not meet these
requirements &
Mr. Packle should
be instructed to
place in record
such ^{useful reliable information} ~~information~~ con-
nected with each
village as he has col-
lected in the course
of his settlement
inquiries. These may
