Total...	236	240	214	123

1. Ordered that the above Indent be forwarded to Government with reference to paragraph 1 of their Order, No. 1,757, dated 25th September 1863.

2. The total number of glass measures required by the Collectors as a first supply is 240, and the probable number that will be required annually to replace breakages is estimated at 214, which number is in the Board's opinion excessive. Fifty per cent. for breakages is perhaps not an unreasonable proportion for such articles, and it has accordingly been adopted for the present in Column 5 of the Indent.

3. The Collectors of Kurnool and Trichinopoly and the Acting Collector of North Arcot apply for rain-guages as well as glasses as noted in the margin, but no steps can be taken to comply with their request until it shall have been decided by whom the rain-guages are hereafter to be supplied, which point has been referred to the Public Department in Government Order No. 1,574, dated 27th August 1863, Revenue Department.

4. The Collectors concerned are accordingly requested to renew their present applications for rain-guages when the above point has been settled.

No. 326. ORDER THEREON, 15th June 1865, No. 1,327.

Miscellaneous.

The Government deem it proper that the supply of glass measures required for rain-guages should be undertaken by the same Department to which the supply of the guages themselves may be entrusted, and as this point is under consideration in the Public Department this paper will also be referred to that Department.
