498 - 500

Dated 23 – 6 – 1865.

Not to be folded or roughly handled

Proceedings of the Madras Government, Revenue Department,
23rd June 1865.

No. 498. Read the following letter from W. HUDLESTON, Esq., Secretary to the Board of Revenue, to J. D. SIM, Esq., Secretary to Government, Revenue Department, dated 2nd September 1863, No. 5,464.

SIR,

1. I am directed by the Board of Revenue to submit their reply to the Government Order, dated 24th June 1863, No. 1,120, Revenue Department, forwarding for report the suggestions of the Statistical Committee, and more particularly those on the forms of Trade and Navigation Returns.

2. The monthly Trade Returns which are now received from the Subordinate Ports are as follow:

I. Imports, Goods and Specie... ... } From Foreign Ports and from External Ports, or British Indian Ports beyond this Presidency.

This Return exhibits the

Quantity,
Weight,
Value,
Rate of duty,
Amount of duty for each description of goods, and also the Port whence received.

II. Exports... ... } Corresponding in form and particulars with the Return of
III. Re-Exports ... } Imports.

IV. Ships and Tonnage— relating to Foreign and External Trade.

Gives particulars of

Nationality.
Number.
Tonnage.
Whence arrived or whither bound.

3. These monthly District Returns are posted as received in general forms, in the Department of External Commerce in the Board's Office, and from them are compiled and submitted to Government the Annual Returns of External Commerce, which comprise,

I. Comparative Statement for two years of the entire Trade of the Presidency with each Foreign and External Port, giving particulars of

Goods,
Quantity,
Value,
Increase or
Decrease,

for the Import, Export, and Re-export Trade.

II. Detailed Statement for one year for each District shewing

Description of goods,
Quantity,
Value,
Rate of duty, and
Gross amount of duty

levied on the Import, Export, and Re-export Trade, with *each* Foreign or External Port.

III. General Statement for one year for the whole Presidency in same form with same details.

IV. Detailed Statement for one year of Ships and Tonnage arrived at and departed from the ports of each District, shewing

Nationality,
Number,
Tonnage,
Whence arrived or whither bound.

V. General Statement for one year of Ships and Tonnage, giving the same particulars for the whole Presidency.

The form of these Returns is such that the total quantity and value of the Trade in any one article, or with any one Port, and the total amount of revenue dependant upon it, are ascertainable at a glance.

4. In lieu of the above Monthly Returns it is now proposed that there shall be submitted from each District Monthly Returns of

Imports, Goods and Specie.
1. Foreign Imports of Free goods shewing
   Quantity,
   Value,
   Port whence shipped.
2. Do. do. of Dutiable goods shewing
   Quantity,
   Tariff value,
   Declared real value,
   Quantity entered for Home consumption, including goods from Bond and particulars of Ports.
3. Coasting Free Import Trade with particulars of
   Quantity,
   Value,
   Ports.

Exports do ... ...
4. Foreign Exports of Free goods shewing
   Quantity,
   Value,
   Ports.
5. Do. do. of Dutiable goods shewing
   Quantity,
   Tariff value,
   Declared value,
   and intended, it is presumed to include Re-exports.
6. Coasting Free Export Trade shewing
   Quantity, and
   Value,
   With particulars of Ports.

Shipping ... ... (Foreign Trade.)
7. Nationality of Shipping, with particulars of number and tonnage.
8. Arrivals and departures, with particulars of whence come and whither bound, number and tonnage.
9. Coasting Trade, arrivals and departures as in No. 8, distinguishing British and Foreign Ships and Dhonies.

It would also appear, although not distinctly so stated, that a Monthly Return of Goods in Bond will be required from each Warehousing Port, but there is none such in this Presidency except Madras itself.

5. From these District Returns are to be compiled by the Chief Customs authority, (*i. e.*, the Board of Revenue in Madras) *Monthly* General Returns for the whole Presidency in eleven forms, of which ten will correspond with the District Returns above described, excluding Bullion and Specie, and the eleventh is a Statement of the value of Bullion and Specie imported and exported, from and to various countries.

6. These General Statements which are to be sent to Calcutta are to exhibit the returns for three years in comparison, and from *these* will be *excluded* the Trade between Ports of the Presidency to which they refer.

7. It will be observed that the chief points of difference between the present and proposed systems irrespective of the increase in number, are that the proposed forms altogether omit the items relating to the rate and amount of duty, and for the first time provide for obtaining the statistics of the interport Trade between Ports of the same Presidency.

8. The Board are of opinion that the omission of the items relating to the duty is a defect in the proposed Returns; for although these Monthly Returns are to be compiled by the Financial Department into a General Annual Return for the whole of British India, it is evident that the amount of revenue actually depending on any one item cannot be with safety estimated and entered by calculation from the legal rate, at least so long as the system of Drawback is maintained, and the Board consider that exact information on the above point is a very highly important item of the Statistics of Trade.

9. With this slight addition, the Board consider that the proposed Returns are calculated to afford all the information supplied by the present Returns, with the addition of much which the present Returns do not afford. For facility of reference, the proposed Presidency Returns are in some respects inferior to the existing Annual Returns, but it is probable that the Imperial Annual Returns would be different in form from the Monthly Returns, and would at least retain all existing conveniences of arrangement.

10. Assuming, as the Board do, that the proposed Returns are to be *in substitution for*, and not in addition to, the existing Monthly and Annual Returns of External Trade, the Board are in favor of their adoption with the addition of the particulars of duty, and consider that the Returns can probably be made punctually with very slight addition to the existing Establishment, although, as will be seen from the above analysis, they are more numerous and detailed than those now in use. But if they are to be required *in addition* to the present Returns, then a very considerable increase to the Establishment will be indispensably necessary.

11. One point, however, needs to be noticed. The Statistical Committee in paragraph 19 of their Report, calculate on the Returns from each Presidency being furnished to the Financial Department of the Supreme Government (as the Board understand) within a month of the expiration of each monthly period. It appears to the Board that this is not possible.

12. The Statements at the several minor Ports in each District cannot be closed till the end of the month to which they refer, and these have then to be transferred to the chief Port of the District to be there embodied in the District Return, which has to be transmitted to the Presidency when the General Monthly Report has to be compiled. It seems scarcely possible that under the most favorable circumstances, the General Monthly Returns could be ready for despatch much before the close of the month following that to which the Returns will refer, and unless opportunity for despatching them by Steamer to Calcutta should offer at the particular time they could not reach the Financial Department until about the middle of the second month.

NOTE.—In paragraph 15, the Statistical Committee propose that the subsidiary Returns shall be rendered by each Subordinate Customs House direct to the Chief Customs authority. It is presumed that this is intended to apply only to the District Customs Houses and not to the numerous petty ports subordinate to the main port of each District. Any other course will probably be found altogether impracticable with the existing Establishments and excessively expensive to carry out.

13. The other forms referred for the opinion of the Board are intended for the Appendices to the Annual Administration Report, and would not, it is presumed, affect the departmental returns submitted to the local Government.

14. These forms omit some minor details for which the forms now in use in the Revenue Department provide, and which the Board consider it desirable to retain in their departmental returns to the Local Government. The new forms also include many details, which it is probable cannot be furnished for some years to come.

15. But every attempt to increase our detailed information, and to reduce it to accuracy should be made, and the Board do not doubt that very valuable results may ultimately be obtained by efforts in the direction indicated in the forms. The Board would advocate their adoption.

No. 499. ORDER THEREON, 23rd June 1865, No. 1,412.

Separate Revenue, No. 72.
Customs.

1. The Government agree with the Board that the Trade Returns should show the rate of duty and the amount of duty actually levied, in respect to all dutiable articles. This information of course exists in the books of every Customs House, and its entry in these returns will involve very trifling labor, while it will render them more complete, and adapt them to revenual as well as statistical purposes.

2. The Government do not see the advantage of consolidated monthly returns for all India being published by the Financial Department of the Supreme Government. They are sure to be too late for any practical purpose, and will probably involve considerable expense for extra establishments. The better plan would be for each Presidency to publish its own monthly Statements and for the Finance Department to issue an annual consolidated return for all India.

3. The preparation of an Annual Return for each Presidency from these proposed monthly returns, will of course be required by each Government for statistical and revenue purposes. Copy might be furnished to the Supreme Government in lieu of the present Trade Statements, and it would be a very simple matter to embody them in a single set of Statements for all India.

4. It will be brought to the notice of the Supreme Government that the monthly returns cannot be expected to reach Calcutta earlier than the middle of the second month after that to which they relate.

5. The Government have no doubt that the new forms are intended to be in substitution of those now rendered, otherwise the same information would be twice furnished and large additional establishments would be necessary.

6. The navigation returns need no remark.

7. As to the statements styled "Statistics of Physical, Political, and Fiscal Geography" the Government will remark briefly seriatim.

A. Physical Geography.

8. The Government would prefer the following classification :—

Total area,—Square miles.

1	2		3		4	5
Total culturable area.	Area cultivated or occupied.		Culturable waste.		Per-centage of cultivation.	Per-centage of waste.
	1862-63.	1863-64.	1862-63.	1863-64.	1863-64.	1863-64.

N. B.—In this Presidency this Statement could not be accurately rendered. Zemindary accounts are untrustworthy and in Malabar and Canara cultivation Statements are not kept.

Character of the Surface.—Columns 5 and 6 would necessitate surveys.

Climate.—Arrangements would be necessary to procure information as to temperature.

Soils and Crops.—This statement is much too brief to be of any practical use; column 2 could not be supplied without a survey; column 3 is inapplicable.

Taxes other than land.—This table seems misplaced. No distinction between Judicial and Commercial Stamps is practicable.

B. Political relations, Native States, Native Chiefs, Character of Native rule.—No remark.

C. Political Divisions.—No remark.

D. Population.—No remark.

E. Land Revenue.—The term Revenue should be understood to mean actual collections, current and arrear, within the year.

Varieties of Tenure.—The column headed "personal income" could not be filled up except by mere guess.

Litigation.—No remark.

Survey and Settlement.—Too brief to be of any use.

A. Agricultural.—The area under each crop may be given, though with difficulty. The number of cattle could not.

Rent and Wages.—Private rents cannot be ascertained. Produce varies too much for entry in such form.

B. Mines and Quarries.—No remark.

C. Manufactures.—Needs an annual census.

Other manufactures.— Do. do.

E. Public Works.—No remark.

F. Railways.— Do.

G. Prices of Produce.—Do.

Prices of Manufactured goods.—Do.

Prices of Labor.—Do.

Coinage.—Do.

REVENUE DEPARTMENT.
FORT SAINT GEORGE,
23*rd June* 1865.

No. 500. No. 1,413.

From

W. HUDLESTON, Esq.,
Acting Secretary to the Government of Fort Saint George,

To

THE SECRETARY TO THE GOVERNMENT OF INDIA, HOME DEPARTMENT.

SIR,

Separate Revenue, No. 28.
Customs.

1. I am directed to forward, for the information of the Supreme Government, the accompanying copy of a letter from the Madras Board of Revenue, and extract from the Proceedings of this Government on the subject of the proposed forms for statistical returns received with the letter from your Department, dated 8th June 1863, No. 3,645.

2. The Government regret that by an oversight the transmission of these papers has been so long delayed.

I have the honor to be,
Sir,
Your most obedient servant,
(Signed) W. HUDLESTON,
Acting Secretary to Government.

acco

red
n

Ed. S. T. Augustin.

To E. H. LUSHINGTON, Esquire,

Secretary to the Government of India,

Financial Department.

Sir,

By the Financial Resolution, dated 6th June 1862, we were requested to enquire into the means of methodizing the compilation and publication of Financial and Commercial Statistics, and of the Statistical Tables appertaining to Civil Government, which occur in the Annual Administration Reports of the different Local Governments. We now submit our first Report on the subject.

2. The Financial Statistics, Forms for which accompany, might embrace—

I. Comparative Returns of annual results for several years; as aids in ascertaining the financial position of the Government, checking estimates, controlling expenditure, and economizing resources.

II. A comparison of monthly results for two or three years; as an aid in regulating financial operations during the year.

III. Periodical Returns for publication in the *Calcutta Gazette*, or in some other form.

3. We annex a List, marked A., of a set of Returns for the Annual Series, which would embrace the following subjects:—

I. Revenues and Charges of India, and of the several Presidencies and Provinces.

II. Cash Requirements.

III. Local Funds.

IV. Receipts and Expenditure of Railways.

4. The Tables connected with the last subject (IV.) may show with sufficient clearness the extent and progress of expenditure of Indian Railways. Those for Local Funds do not call for remark. The Statistics of Cash Requirements will suggest measures for economizing cash balances.

5. The Tables of Revenue and Charge shew, in a principal series, the totals for India and for each Presidency and Province, and, in a subsidiary series, the items composing those totals. The details in this latter series do not, as regards Revenue, go farther than the amount of each principal item, and the aggregate amount of all minor items for each Presidency and Province, except as regards Salt and Opium, in respect to which additional Tables are supplied of the quantities and of the price or rates of duty, which yielded the year's revenue.

6. The detail relating to Charges is carried one step farther than that relating to Revenue. From the year 1861-62, inclusive, there will be no difficulty in compiling them in the proposed forms, which are those of the Budget.

7. Before 1861-62, however, the Charges were arranged in the Actual Accounts in a manner somewhat different from that in which they now appear in the Budget. Owing to this, and to the transfers of various Districts, from the Presidencies or Provinces in which they were formerly included, to other Administrations, difficulties will occur in comparing the Statistics up to 1860-61 (as they now stand in the annual Accounts and official Abstracts) with those of subsequent years. At the same time, such a comparison will be useful, and steps should be taken for carrying it back at least to 1856-57, the year antecedent to the mutiny, and if practicable to 1850-51 (inclusive), as that year is the starting point for much of the valuable information contained in the present Weekly Tables of Financial Statistics.

8. In the form proposed the annual volume of Financial Statistics would show the amount, the relative importance, and the progress of the chief items of revenue, and afford *data* for criticising the principal charges in each Department of the service. The materials for an intelligent review of this nature are perhaps all that need be provided for general information. To attempt more would increase the size and expense of the volume without adding much to its practical value. The volume would be confined to the statistics of past years; the similar information for the current year being collected as hitherto in the Weekly Table of Financial Statistics, which guides the Financial Department in determining from month to month, and from week to week, how far the anticipations of the Budget Estimate, as to Revenue and Charge, are being realized, and the Cash Requirements of the year are being met. The volume might be published as soon as practicable after receipt of the Parliamentary Return of the Home Charges for the expired year.

9. In addition the following might be published for general information as soon as they become available :—

Annual.

I. Budget Estimate of Revenues and Charges, viz. :—
   - A The Financial Statement introductory to the year's Budget.
   - B The local appropriation of the Revenues and Charges of the Budget, to Presidencies and Provinces.
   - C The details of the Budget in the same form as the Accounts rendered to Parliament.
   - D The Estimate of Home Charges.

II. Regular Estimate in the Parliamentary Form as sent to England.

III. The Actual Receipts and Disbursements of the year last completed, in the Parliamentary Form, viz. :—

   - A For India; and for each Presidency and Province.
   - B Home Charges.

Quarterly.

IV. Comparative Statement, in the accompanying Form B, of Income and Expenditure for the expired quarters of the current year, and for corresponding quarters of the previous year.

V. Statements of the Receipts from Income Tax and Stamps in each Presidency and Province, compared with the Receipts in the corresponding quarter of the previous year.

VI. Financial position of the Railway Companies *quoad* the Government.

VII. Statements, in the accompanying Form C, of the Receipts from Passengers and Goods Traffic in each Railway in India in each month of the expired quarter.

Monthly.

VIII. Cash Balance in each Presidency and Province at the end of the month last expired, and on the same date in two previous years.

IX. Statement of Silver received and coined in the Mints of Calcutta, Madras, and Bombay.

X. Statement of the Note circulation, and Reserve, in the Currency Department in Bengal, Madras, and Bombay.

10. The preceding Quarterly and Monthly Statements, except IV and VII., and the Annual Statements I. A., I. B., and I. D., are already published in the Gazette. But as the Statements I. C., II., and III., are too bulky to be circulated with the Gazette, it may be sufficient to print them, as heretofore, in the Financial Department, copies being supplied to the Press, as well as to the Chambers of Commerce, and their Office-bearers, and other copies being offered for sale at cost price to the Public.

11. These Financial Returns will be more complete than those published for the United Kingdom; but, for Trade and Navigation, Returns, such as the accompanying, based on those of the English Board of Trade will suffice. A List (D.) of these Returns, adapted for use in India, is annexed.

12. The main object is to show the Trade with each country, and the amount of Trade in each principal article with all countries, and to afford similar information regarding the carrying Trade on British, Foreign, and Country vessels. This will be done in Monthly and Annual Returns.

13. The Monthly Returns of the Board of Trade are eight, of which four relate to Imports and Exports, two to Navigation, the seventh shews the increase or decrease of the principal articles in bond, and the last the move-

ment of the precious metals. Substantially the same arrangement has been followed in the Forms now proposed. But it being desirable to record also the coasting or inter-portal Trade of each Presidency distinct from the foreign Trade proper, two additional Tables to the above series are added for that purpose.

14. The Monthly Trade Returns above mentioned are those which, it is proposed, that the Chief Custom authority of each Presidency shall furnish to the Financial Department for tabulation and publication in the *Calcutta Gazette*. The Returns of inter-portal Trade from each Presidency will include the Imports into every Port belonging to such Presidency from British Indian Ports forming part of another Presidency, and similarly the Exports from every Port in such Presidency to British Indian Ports subject to another Presidency, but will not include the coasting Trade *inter se* of Ports belonging to the same Presidency, the object of such returns being to show, not the amount of Trade conveyed by sea between one Port and another of the same Government, but the aggregate Coasting Trade of each Government with other Divisions of British India.

15. The Returns for each Presidency will be compiled by the Chief Custom authority thereof from subsidiary Returns to be rendered monthly by each Custom House subordinate to it. Forms of such Returns were prepared in 1860, by the Customs Committee, consisting of Messrs. Spooner, Bullen, and Eden. These Forms were subsequently modified by the Board of Revenue at Calcutta. We now avail ourselves of the permission accorded by Government to recommend the accompanying Forms, as per List D., for adoption, generally, in the subordinate Custom Houses in the three Presidencies. We think that they will give less trouble to the subordinate offices than those which were previously contemplated. These subsidiary returns will contain full details of the Foreign Trade and of the coasting Trade, not only between Ports of one Presidency and Ports of another Presidency, necessary for the compilation of the Tables of inter-portal Trade just referred to, but also imports into and exports from each Port, from and to other Ports in the same Presidency and will therefore furnish the material for compiling fuller Tables of the coasting Trade than is above contemplated, should such hereafter be found desirable.

16. In these subsidiary Returns, as also in those to be furnished by the Chief Custom authority of each Presidency to the Financial Department in Calcutta, quantities will be entered in the (Tariff) weights, measures, and currency, according to which the several Custom Houses charge duty. The Financial Department will, when necessary, reduce all weights and measures to the English standard.

17. In the Board of Trade Tables the value of Exports declared by the Shippers is assumed to be the real value, whilst of Imports, the real

value is computed from average quotations of the principal articles collected from trustworthy Trade circulars. As, however, Section XXVI. of the consolidated Customs Act provides that the real value of both Imports and Exports must be declared at the time of entry at the Custom House, the declarations made under the Section will, from the 1st of May 1863, be the basis on which the Tables of real values will be compiled in India.

18. The ultimate object of the Monthly Return from each Presidency being the compilation of Tables showing the over-sea Trade of the whole Empire, it is vitally essential that they be rendered uniformly. We therefore recommend that before the Tables now suggested by us be finally adopted, it be ascertained from the other Presidencies, whether they are adapted to the Trades of their respective Ports.

19. It is expected that the Returns will be furnished to the Financial Department from each Presidency within a month of the expiration of each monthly period, and that the Financial Department will issue the consolidated Returns within another month of the expiration of such monthly period.

20. The consolidated Monthly Returns for all India may be published in the Gazette, while printed copies of the Annual Returns may be distributed like the Abstracts (in Parliamentary Form), of Estimated and Actual Receipts and Disbursements.

21. The annual returns of the Board of Trade are extremely voluminous, but, with unimportant alterations to adapt them to local circumstances, might be adopted. These returns are ordinarily issued in England in the autumn of the year, for the year which has immediately preceded. No greater delay in their preparation should be necessary here.

22. Regarding the Statistics of Civil Government, or Statistical Tables to accompany the Administration Reports of the different Local Governments, we can suggest no better arrangement, at once scientific and practical, than that adopted by the Statistical Society of London. In the accompanying forms, as per List E., we have modified the classification and adapted it in detail to India. The five heads under which we have arranged these Forms are :—

1. The Statistics of Physical, Political, and Fiscal Geography.
2. " " " Production and Distribution.
3. " " " Instruction.
4. " " " Protection.
5. " " " Life.

The Statistics under the first head may not vary much from year to year. Nevertheless it seems desirable that they should be repeated in every Report for the information of readers, doubtless an increasing number, who may not possess the first of the Series of Annual Reports in which these Statistics are generally given with more or less completeness.

23. In Section I. under Fiscal Statistics, we have noted some particulars relating to different kinds of tenures, as a specimen merely of the sort of entries proposed for that Form.

24. There may be difficulty in some Provinces in collecting Statistics of Production and Distribution with much fullness and accuracy. But a beginning should be made; and efforts should be encouraged to supply in each year deficiencies in the Reports of the previous years. Gradually, the Statistics for the various Provinces may thus be improved and rendered uniform.

25. With regard especially to Statistics under the heads of Production and Distribution, it is desirable that Compilers should state the sources from which the information recorded has been obtained. When prices and values are to be stated with reference to any local currencies, we suggest that uniform reference should be made to Prinsep's Useful Tables.

26. The Statistics of Trade, Currency, and Finance may be given in the Forms already proposed under the head of Financial and Commercial Statistics. It will be noticed, however, that the Commercial Statistics, for which provision has been made, relate only to Sea-borne Trade Carefully-digested particulars of Inland Trade would be a very interesting feature in the Local Administration Reports.

27. Under Statistics of Protection, those for Civil and Criminal Justice will, we are informed, be arranged by the High Court. We have not therefore proposed Forms for Judicial Statistics, but we should be glad to be furnished with copies of those which may be adopted, from which we shall draw up general tables, suited to an Administration Report.

28. In like manner, we believe that Educational Forms are in use throughout India, under instructions from Home, but that they are not adhered to strictly. We are prepared to submit uniform and complete Tables for all the Presidencies.

29. For Vital Statistics also, we hesitate to propose Tables, as we are informed that proposals on the subject are likely to be submitted without delay by the Inspector General Medical Department.

30. The subjects entered by us under the five heads mentioned in paragraph 22, will be treated by each Local Government, as they affect the Territories under its jurisdiction. But there are great Imperial subjects, viz. :—

Legislation,	Army,
Public Works,	Marine,
Finance,	Telegraphs,
Post Office,	Geological Survey,
	Trigonometrical Survey,

on which Annual Reports are prepared, and, with one exception, published by the Secretariats of the Government of India, or by Departmental Officers under

that Government. We would recommend that these Imperial Departments be instructed to adopt, as far as practicable, the arrangement of subjects which has been proposed for the Administration Reports of the Local Governments; in order to the more ready consolidation (in the General Report of material progress in India) of the information supplied in the various Reports, Imperial and Local.

31. In this view, we strongly recommend that while each Local Administration is left free to adopt on other occasions such Statistical Forms as it finds best adapted to its own peculiar requirements, those appended to the Annual Administration Reports should be uniform, [illegible] in the Forms now recommended, or as nearly as possible in those Forms.

32. We would also urge the desirableness of exhibiting all Statistics of quantities and values, on the decimal system. This could be done in the Tables to be published by the Financial Department without interfering with the subsidiary or local Returns, or disturbing existing Tables of moneys, weights, and measures.

33. We need hardly, in conclusion, point out how greatly the value of all Statistical information would be enhanced by something like accurate statements as to the numbers of the people. It will not be desired that we should offer suggestions as to a General Census, the execution of which in this country must probably be left to the discretion of Local Administrations. We beg, however, to submit that a Census, even of the City Population, especially of the Presidency Towns, would be very useful, and that apparently be carried out without inconvenience, if legislative sanction were given. We are glad to observe that this is also the opinion of the Lieutenant-Governor of Bengal, and that a Bill to give effect to this measure in the city of Calcutta, and to provide for an Officer of Health, whose duty it will be to collect Vital Statistics, has already been introduced into the Local Council.

We have the honor to be,

Rev: 1466/63

In No 3964 of 1863

A.

A LIST OF ACCOMPANYING TABLES PROPOSED FOR THE ANNUAL SERIES OF FINANCIAL STATISTICS.

1. India.—Revenues, Charges, Ultimate Result, Progress of Debt, and Cash Balance, for each year, from 1850-51.
2. Revenues and Charges of Home Government and of each Presidency and Province, from 1850-51.
3. Gross amount, Charges of Collection, and net amount, of each principal item of Revenue, and of the remaining items, for all India collectively, in each year from 1850-51.
4. Gross amount, recoveries, and net amount of each principal item of charge incurred in India, from 1850-51.
5. Amount of the Public Debt of India, including the Bond Debt in England, divided under principal heads, with the amount of Interest paid thereon, in each year, from 1850-51.
6. Analysis of the Public Debt of India, and of the Indian Home Debt, for each year, from 1850-51.
7. Analysis of the Book Debt of each Presidency and Province, in each year, from 1850-51.
8. Analysis of the amount at credit under Deposits, in each Presidency and Province in latest year.
9. Amount (less refund) of each principal item of Revenue in each Presidency and Province, for each year, from 1850-51, *viz*:—
   - *a*. Land, Sayer, and Abkaree.
   - *b*. Income Tax.
   - *c*. Customs, (Sea and Land) exclusive of Salt.
   - *d*. Salt.
     - *d*. 1. Quantity from last return, since manufactured, imported, sold, remaining, proceeds of sale, rate of duty. (In North-Western Provinces, only the columns "imported" and "proceeds" will be filled).
   - *e*. Opium.
     - *e*. 2. { *Behar and Benares*. Number of Chests of each Agency, sold, proceeds, total thereof, and average price per chest on the whole produce in each year from 1850-51. *Malwa*. Number of Chests and Proceeds of Malwa Opium, with rate of duty levied thereon, in each year, from 1850-51.
   - *f*. Stamps.
   - *g*. Other items.
10. Expenditure from 1850-51, under each Government and Administration, for the head—
    - *a*. Army.
    - *b*. Indian Navy and Marine.
    - *c*. Public Works, including Expenditure from Local Funds.
    - *d*. Salaries and Expenses of Public Departments.

e. Law and Justice.

f. Police.

g. Education, Science and Art.

h. Political Agencies and other Foreign Services.

i. Allowances and Assignments under Treaties and Engagements.

k. Allowances to District and Village Officers.

l. Interest on Debt.

m. All other charges, including those for collection of Revenue in each Presidency and Administration, from 1850-51.

n. Expenditure of India, from 1850-51, under the head Territorial Payments in England.

11. (*a. to n.*) Details of Expenditure, from 1850-51, in each Presidency and Province, under each of the heads *a. to n.* of 10.

12. Analysis of charges of collection, (shewn in 11 *m* in the aggregate only) for each Presidency and Province, from 1850-51.

13. Receipts and Payments from Local Funds, in each Presidency and Province, from 1860-61.

14. Analysis of Receipts and Payments from Local Funds for latest year, for each Presidency and Province.

Cash Requirements.

15. Home Requisition on India, from 1855-56, showing opening Cash Balance, Income, Charge, other Receipts and Payments, and probable deficit or amount of Requisition,

16. *a*. Gross amount—also net amount (*i. e.*, deducting payments of Railway Capital into India House Treasury)—of Home Requisition on India in each year, from 1855-56, likewise the amount remitted to England in the same period, from Bengal, Madras, Bombay, through—

Drawings by Home Authorities.

Bullion Remittances from India.

Remittances by Bills from India.

Payments to Railway Companies in India.

16*b*. Bills of the Home Authorities outstanding on 30th April 1855, and those since advised, discharged, and outstanding at the General Treasuries of Calcutta, Madras, and Bombay, for each year, from 1855-56, to commencement of current year.

17*a*. Receipts, Payments, net Result, and Cash Balance of each Presidency and Province, for each year, from 1850-51.

17*b*. Receipts and Payments of 17*a* shewn under the Sub-Divisions of—

1. Revenue or Income.
2. Charge, including Remittances to Military, Public Works, Postal and Telegraph Departments.

I do hereby certify that in my opinion Burways a Peon in the Revenue Board office is incapable of further service from ill health being paralytic in the right leg & arm.

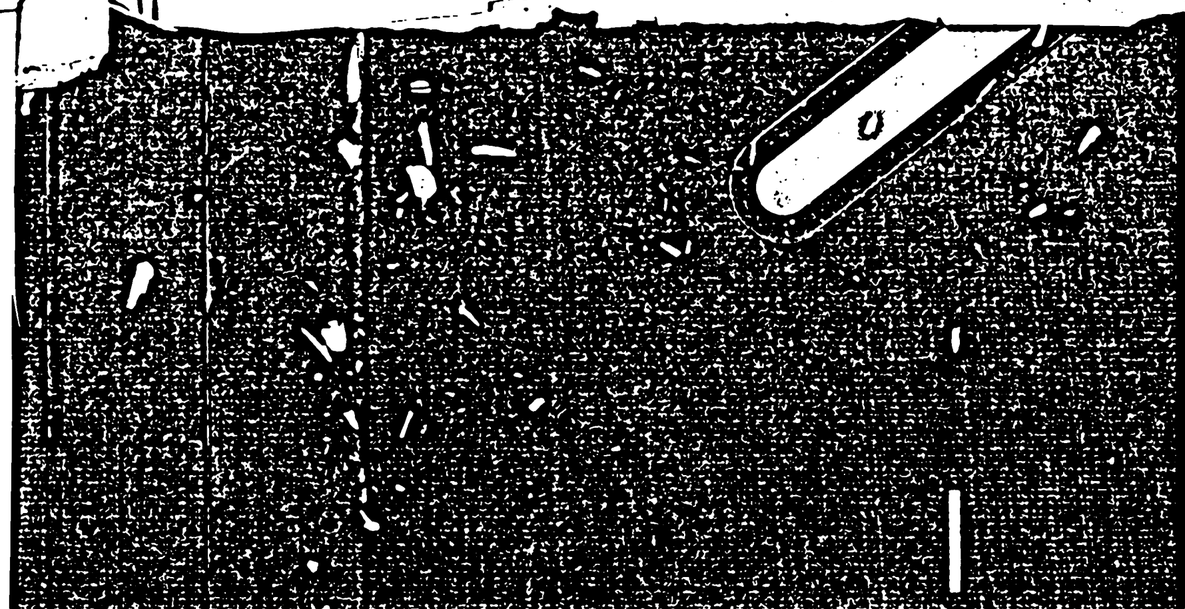

G. Bruce
Surgeon
H. M. Dist.

Received 8th June 1830.

Obliged to apply for leave on account of ill health

Revd. 24th Augt. 63

Medical purposes

To the President and Members
of the Board of
Revenue Cm

The humble Petition
of Balasunga

Humbly Sheweth, that humbly beg leave to
represent to your Honorable Board that I have been
employed as a Peon in the Office of the Board
of Revenue from the year 1871 to the year 1879 during
the Honorable G

The Govt do not see the advantage of consolidated monthly returns for all India being published by the Financial Department but they are sure to be too late for any practical purpose and will probably involve considerable expence for extra establishments. The better plan would be for each Presidency to publish its own monthly statements and for the Financial Department to issue an annual consolidated return for all India.

It will be brought to the notice of the Surveyor Genl that the monthly returns should be expected to reach Calcutta earlier than the middle of the second month after that to which they relate.

The Govt have no doubt that the new forms are intended to be in substitution of those now rendered & not in addition to the same information would be twice furnished and large additional establishments would be necessary.

The Navigation Returns need no remark.

As to the statements styled "Statistics of Physical, Political and Local Geography" the Govt wish to make the following observations.

As Physical Geography

The Govt would prefer the following classification.

Total Area - Square miles.

Total Cultivable Area	Area cultivated or occupied		Cultivable waste		Percentage of cultivation to cultivable area	
	18 - /2	18 - /3	18 - /2	18 - /3	18 - /2	18 - /3

N.B. In this Presidency this statement could not be accurately rendered. Zamindary accounts are untrustworthy and in Malabar and Canara cultivation shifts

Column 5 and 6 would necessitate Survey-

Arrangements would be necessary to procure information as to temperature-

This Statement is much too brief to be of practical use - Column 2 could be supplied without Survey - Column 3 is inapplicable -

This Table seems misplaced - No distinction between Judicial and Commercial Stamps is practicable -

No remark -

No remark -

do

The term Revenue should be understood to mean actual collections, current and arrear, within the year -

The Column headed "Personal Income" could not be filled up except by mere guess -

No remark -

Character of the Surface

Climate -

Soils and Crops -

Taxes other than Land -

B. Political Relations -
Nature States -
do Chiefs -
Character of Native Rule

C. Political Divisions -

D. Population -

E. Land Revenue

Varieties of Tenure

Cultivation

Survey and Settlement - Too brief to be of any use -

A. Agricultural - The area under each crop may be given, though with difficulty - The number of cattle could not -

Rent and Wages - Private rents cannot be ascertained - Produce varied too much for entry in such form -

B. Mines and Quarries - No remarks -

C. Manufactures - Needs an annual Census -

Other manufactures - do

D. Public Works - No remark -

E. Railways - do

F. Prices of Produce - do

Prices of Manufactured goods - do

Prices of Labour - do

Coinage - do

Board of Revenue & Land Records
