Proceedings of the Madras Government, Revenue Department,
28th August 1865.

No. 477. Read the following letter from R. E. MASTER, Esq., Officiating Director of Revenue Settlement, to W. HUDLESTON, Esq., Acting Secretary to Government, Revenue Department, Fort Saint George, dated Madras, 6th July 1865, No. 747-26 :—

SIR,

1. Referring to paragraphs 20, 21, and 22 of the Proceedings of Government, dated 23rd May last, No. 1,096, passing orders on the Settlement of the Central and Eastern Deltas and of the Upland Talook of the Godavery District, I have the honor to submit two Statements A. and B., shewing the mode in which I have endeavoured to meet the wishes of Government, and the rates which I propose to apply to the dry and wet lands in the Upland Talooks. It will be observed that the proportion laid down by Government, viz., half the net produce, has been steadily kept in view, in forming the rates, and though, in some instances, they are slightly higher, and in others slightly lower than that proportion, the variations are justified by the necessity of maintaining some degree of uniformity in apportioning the rates to the scale of classification, as well as by a reference to the proportion of 30 per cent. of the gross produce, which the Government long ago declared should be the maximum of demand. The Government are aware that though every effort has been made to obtain correct information on the subject of cultivation expenses, the results arrived at cannot be relied on as mathematically accurate, and that to take those results as a rigid guide in every case, without any reference to the gross produce, the true amount of which is much more easily ascertained, would lead in some cases to a needless sacrifice of revenue, and in others to the imposition of an assessment that would prove burdensome. To exhibit, therefore, clearly the grounds on which the several rates are now recommended, I have inserted columns to shew the proportion of 30 per cent. of the gross and of half the net, the rates proposed in the Report, and the rates as now altered in accordance with the Government Order above quoted, the area of occupied land affected by the alteration, and their financial effects, and I trust that the scale adopted will meet the approval of Government.

2. In the margin of paragraph 22, the Government point out five instances in which the rates proposed for the Delta exceed the prescribed proportion of half the net produce, and direct me to re-test the values of the classes of land in which this occurs, and to adopt rates approximating more closely to the moiety thus determined. I would submit that, judged by the test above given, these rates are not excessive, as will be seen from the annexed Statement C., in which the several proportions are shewn. Considering, further, that these rates have been introduced throughout the Western Delta Talooks, in which they have been in force three years, and that during that period no complaint has been received of their being excessive, I would respectfully deprecate any alteration being made in them at the present time, preparatory to their introduction in the remaining portions of what is, in fact, the same Delta.

3. Adverting to paragraph 24, in which the Government call for a report on the arrangements proposed for carrying out the Settlement of the Kistna and Godavery Districts, I beg to state that in the former District the preliminary operations, consisting of the calculation of the assessment at the sanctioned rates on the fields, and the preparation of the Asamiwar accounts, are already in active progress on the spot under the superintendence of a superior Native Settlement Officer, whom I can safely trust with this portion of the work. The Settlement itself should be introduced simultaneously with the Jamabundy of the current Fusly, by which time the necessary accounts will be ready. For this work, as I have no Settlement Officer of sufficient experience available (Mr. Melville being fully engaged in Kurnool) I propose, when the proper time arrives, which will be about November next, to apply for the services of a Covenanted Officer of the grade of Head Assistant. Perhaps the Government may be able to spare temporarily for this duty the present Head Assistant in the Kistna District, Mr. Wilson. In that case it would not be necessary that he should be relieved of the whole of his ordinary duty, as it is most convenient that the Officer introducing the Settlement should do so in the combined capacity of Revenue and Settlement Officer; but it might be found advisable to lighten his work by relieving him, for the time, of his Magisterial duties, and any other departments under his charge.

4. The introduction of the new Settlement in the Godavery I will myself undertake, in accordance with the wishes of Government already expressed. As however the work will altogether occupy a somewhat longer period than I can consistently with the general duties of the Department, and the requirements of the other parties, devote to a single District, it is my intention, with the approval of Government, to leave the District after settling the main portion of it, and to entrust the settlement of the remainder to Mr. J. H. Cox, First Assistant Director of Revenue Settlement, whose services will, I hope, be available for this duty by the time they are required. The Settlement, whether carried out by myself or by my Assistant, will of course be introduced in immediate communication with the Revenue Officers of the District.

5. As it is of importance that I should be in possession of the views of Government on the points alluded to in paragraphs 1 and 2 of this letter, at as early a date as possible, I forward this letter direct, furnishing a copy to the Board.

Revenue Settlement Office,
Madras, 6th *July* 1865.

(Signed) R. E. MASTER,
Offg. Director of Revenue Settlement.

No. 478. Order thereon, 28th August 1865, No. 2,013.

Land Revenue.

1. The Government accept the revised rates now proposed by Mr. Master for the Upland Talooks of the Godavery District; and on consideration of the facts stated in paragraph 2 of his letter, and also of the expediency of maintaining uniformity throughout the Delta, they will not require him to modify his scale for the Central and Eastern portions, but sanction the adoption of the same scale as is already in force in the Western portion.

2. The arrangements proposed for introducing the revised Settlement in the Godavery and Kistna Districts are approved; and Mr. Master will at the proper time apply to Government for Mr. Wilson's services, should they then be available

Ikaaba,
6th July 1865

From

R. E. Master Esqre
Officiating Director of Revenue
Settlement

To W. Windlestone Esqre
Acting Secretary to Government
Revenue Department
Fort St George

Sir

Referring to paras 20, 21 and 22 of the Proceedings of Government dated 28th May last No 1090 passed ordering the Settlement of the Cuttack and eastern delta ceded districts also the Salt Revenue of the Godavery District, I have the honor to submit two Statements A and B shewing the mode in which I have endeavored to meet the wishes of Government and the views which

I propose to apply to the dry and wet lands in the upland talukas. It will be observed that the proportion laid down by Government viz half the net produce has been steadily kept in view throughout. The Madras and though, in some instances, they are slightly higher and in others slightly lower than that proportion, the variations are justified by the necessity of maintaining some degree of uniformity in apportioning the rates to the scale of classification, & reference to this proportion of 30 percent of the Gross produce, which the Government long ago declared should be the maximum of demand. The Government are aware that though every effort has been made to

Mr Prinsep has also written from Burdwan that the 30 per cent assessment is not found to be adequate in Behar. Mr Robertson writes from Tirhoot that the assessment there is considered very moderate. Mr Thomason from Furruckabad and Mr Martin from Kumaon state that the assessments in those districts are also considered moderate.

no one wants mathematical accuracy

Mr Martin has lately employed in undertaking jointly by the Civil & Revenue Officers of the district

2

obtain correct information on the subject of cultivation expenses, the results arrived at cannot be relied on as mathematically accurate, and that to take those results as a rigid guide in every case, without any reference to the gross produce the true amount of which is much more easily ascertained, would in many cases be a needless sacrifice of revenue, and in others to the imposition of an assessment that would prove burdensome. To exhibit therefore clearly the grounds on which the several rates are now recommended, I have inserted Columns to show the proportion of 30 per cent. of the gross produce, and of half the net the rates proposed in the Reports and the rates as now altered in accordance with the Govt Order

Remarks

It appears to me that Mr Masters has misunderstood altogether the instructions given by the Lieut Governor relative to the proportion of the Crop to be taken — Mr Elwood says nothing about 30 per cent of the Cash crop nor does he attempt to establish any fixed relation between 30 per cent of the Cash crop & the net crop, which is a practical absurdity — but he states precisely that the Govt is to take 1/3 of the net Crop. — Now Mr Masters in his present schedule of rates has been mixing up matters which have no relation with each other — he has in the case of the deductions given made arbitrary deductions from the value of the 1/3 Govt share which he gives no reason — I have marked in the table among the inconsistencies

into what it has been led by
an attempt to reconcile with
approximate identity matters
which have no relation to each
other - he has in most instances
reduced the Govt demand
which has in others increased
it - Apart from these arbitrary
dealings on the part of the deputy
Mr Revenue settlement - his
business it is to carry out the
instructions he has received
from the Govt and before
adopt a cut & dried table
like the one I will
to ascertain how the data upon
which it is founded have been
applied - I cannot but believe
from some calculations I have
drawn made from the Tables then
delay that the work has been
performed in a slovenly way
