

MADRAS RECORD OFFICE.

Government of Madras.

Revenue DEPARTMENT.

G.O. No.	3	Press
		~~Mis.~~
4		
Dated	4-1-	1865.

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
4th January 1865.*

No. 4.

Dated 4th January 1865, No. 3.

Miscellaneous.

1. Resolved that the American Pump exhibited to Government by the Reverend Mr. Dall be purchased for Rupees 110, and that the Superintendent of the Gun Carriage Manufactory be requested to report at what cost he could make up twenty pumps of the same kind for exhibition in the Provinces.

2. The Government consider Lieutenant Curran's Rope Pump a very efficient apparatus, and likely, with certain alterations in the mode of applying the motive power, to be very useful to the Ryots. It is inexpensive and easily made up or repaired, as the materials are merely wood and rope. The Government resolve to present Lieutenant Curran with a donation of Rupees 250, as an acknowledgment of his services in devising this simple pump; and as they think that such a pump would be very useful in the Districts where water is raised from wells for irrigation, they would be glad to have twenty made of different sizes, some to be worked by a single pair of treddles, so that the weight of a single man might be applied; others with two pairs of treddles for two men; and a third set to be worked by bullocks, walking round as in the old threshing machine. Mr. Moncrieff will be instructed by the Public Works Department to prepare drawings of these different modes of applying power, in order that Colonel Campbell may be able to state the cost at which they can be made at the Gun Carriage Manufactory.

(True Extract.)

(Signed) J. D. SIM,
Secretary to Government.

To the Superintendent of the Gun Carriage Manufactory.

No. 3.

Proceedings of the Madras Government
Under date the 4th January/65.

Resolved that
the American Pump
exhibited to Govt by
the Revd Mr. Dall.
be purchased for Rs.
110, and that the In-
superintendent of the Gun
Carriage Manufactory
be requested to report
at what cost he could
make up twenty pumps
of the same kind for
exhibition in the Pro-
vinces.

The Government

Consul

to direct the man-
ufacture of 20 for
exhibition.

✓

Consider Sir, Our
pump, a
very efficient appa-
ratus and likely,
with certain alterations
in the mode of ap-
plying the power, for
to be very useful
to the ryots. It is
inexpensive and easily
made up or repaired
as the materials are
merely wood and rope.
The Govt. resolve to
present Sir J. Curran
with a donation of
Rs. 250 as an ac-
knowledgment of his
services in devising this
simple pump and

as they think that such a pump
would be very useful in the districts
where water is raised from wells for
irrigation, they would be glad to have
twenty made of different sizes, some to
be worked by a single pair of treadles,
so that the weight of a single man
might be applied; others with two
pairs of treadles for two men; and
a third set to be worked by bullocks,
walking round as in the old
threshing machine. Mr. Moncreff
will be instructed by the Public Works
Department to prepare drawings of
these different modes of applying
power, in order that Colonel Camp-
bell may be able to state the cost
at which they can be made at
the Gun Luggage Manufactory.

to be made at
the Gun Luggage Manufactory
