Read the following :—

No. 163.

Season Report—1st to 15th June 1866.

1. RAIN.—Slight drizzling showers in all the Talooks except in those of Wallaja, Chendragheri, and Vellore.

2. STATE OF THE CROPS. *Wet.*—Sugar-cane, indigo, car and manakattai paddy, raggy, gingely-oil seed, and chillies cultivated where there are means of irrigation. The standing crops have very generally withered from drought. Out-turn very scanty.

Dry.—Cholum, cumboo, indigo, raggy, and gingely-oil seed cultivated under wells.

PRICES.—No fall in high prices last reported. In some parts rising, owing to active export of paddy, &c., to the western Districts. Much real distress, particularly in the Poloor Talook.

PUBLIC HEALTH.—Cholera still prevalent in the Wandawash, Poloor, and Arcot Talooks, and fever in the jungle tracts of Vellore. Heat excessive. Death from sun-stroke frequent. High dry land winds blowing. Particularly strong and continuous in highland tracts on western frontier.

CONDITION OF CATTLE.—Still indifferent, owing to want of pasture and water. The “Vakkai” disease reported in parts of Wallaja, Poloor, and Arcot Talooks. Another kind of murrain, called “Nalooopoo,” has shewn itself in the Chittoor Talook.
