No. 58. ORDER THEREON, 4th July 1866, No. 2,091.

CIVIL WORKS, No. 11.

1. Communicated to the Superintending Engineer of the 3rd Division.

2. Major Moberly will report fully upon the statements, that "the crops "at Moka irrigated by channels from the Huggry are fading, owing to those "channels being choked with sand from the flooding of the river," and that "the "crops under the Toongabadra channels, in the Táluq of Hospett, are fading "from want of water." He will explain whether it has been usual for this Department to keep the channels in question at Moka free from sand, or whether that work is not one ordinarily performed by the Ryots. As the Government have hitherto been under the impression that the Toongabadra did not fill sufficiently to affect the channels leading from it till the latter part of May at the earliest, they were not prepared to hear of crops under those channels having been so far advanced before the end of that month as to be described as withering from the failure of the channels to supply water, and Major Moberly will therefore give the fullest information on these points.
