

MADRAS RECORD OFFICE.

Government of Madras.

Revenue DEPARTMENT.

G.O. No.	1754	Press Mis.
Dated	16-7-	18 66

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
16th July 1866.*

No. 293. Read the following letter from the Secretary to the Chief Commissioner, Central Provinces, (Revenue—Forests), to the Secretary to the Government of Madras, dated Nagpore, the 29th June 1866, No. 2,064-152:—

1. I am directed to request you will be good enough to convey to His Excellency the Governor of Madras, an expression of the Chief Commissioner's thanks for the Reports on Chinchona, forwarded with your letter No. 778, dated 4th April 1866.

2. I am desired to forward copy of a letter, No. 65 A, dated 21st May 1866, from the Conservator of Forests, Central Provinces, on the subject, and to state that the Chief Commissioner hopes shortly to renew the experiment of bringing Chinchona plants from the Neilgherries, for plantation in selected spots on the Sant-poor hills.

No. 294.

ORDER THEREON, 16th July 1866, No. 1,754.

Miscellaneous.

Ordered to be recorded.

(True Extract.)

(Signed) J. GROSE,

Under Secretary to Government.

Copy of a letter No. 45, dated the 25th May 1886, from the
Conservator of Forests C.D., to the Secy to the Comr. C.D.

In reply to your dossier No.
¹⁴⁰⁹₁₀₅ of the 16th Instant, forwarding
a report (herewith returned) on Cinchona
cultivation. I would beg to state for
the Chief Comr's information that, of a
number of Cinchona plants brought in a
warden case from the Nilgheeries two &
a half years ago, with the greatest care by
Mr. Late St. Cole F.C.S., not one plant (al-
though it was in the cold season) survived
the journey.

It is impossible to say whether the Cinchona
plants will flourish here, unless the experiment
is tried, but I feel no doubt that Mr

Taylor

Taylor, the European Gardener, who is coming
from Madras, and may be expected very
shortly, will be able to give some advice
on the subject - It seems that, although
the Nilgherries, and as well as the Annamally
and Pallney Hills, have a much higher
general elevation than we can approach
in Central India, yet in some cases,
a few plants have succeeded as low as
3500 feet, and therefore it might be hoped,
that something might be done at
Ponnamma - The subject shall not be lost
sight of.

"Ima Cpy"
