Proceedings of the Madras Government, Revenue Department,
27th September 1866.

No. 661. Read the following Proceedings of the Board of Revenue, dated 22nd September 1866.

Read the following:—

Report on the state of the Season in the Cuddapah District during the first fortnight in September 1866.

1. A fair supply of rain was received in the fortnight, the Talooks in the southern section, however, being but partially supplied.

2. The moisture was sufficient to enable Ryots in the northern, eastern, and western sections to cultivate Jonna, Raggy, Indigo, Cotton, Oil-seeds, and a variety of pulses. Paddy cultivation was, however, not in a forward condition. The crops were, on the whole, in a fair condition. Some Jonna and Raggy had been harvested in two Talooks.

3. The prices of grain were still excessive, and had risen in Cuddapah owing to the extensive exportations to Bellary. In the Kadiri Talook, the high prices at which grain was selling, compelled poor people to resort, in some cases, to roots and leaves of plants for sustenance; matters are, however, now better. Cholera was prevalent in the Budvail, Pulivendla, and Pullampett Talooks, and existed in other parts of the District. Flocks and herds suffered from disease in a few localities.
