159 - 160

Dated 6 - 11 — 1866.

Not to be folded or roughly handled

Proceedings of the Madras Government, Revenue Department,
6th November 1866.

No. 159. Read the following letter from the Chemical Examiner, to the Secretary to Government, Revenue Department, Fort Saint George, dated Madras, 26th October 1866, No. 183.

1. In reply to your Official Memorandum No. 132, dated 24th October 1866, I have the honor to submit as follows.

2. In my reply to your note dated the 1st May 1866, I had the honor to state that Mr. McIvor had been able to send me but a very small supply of bark, only enough in fact for a single analysis, the results of which differed so much from those of other analysts, that before reporting I was anxious to verify my work by a further and more complete examination.

3. Mr. McIvor, in a letter to my address, stated his inability at that time to supply my wants, but mentioned that later in the year, after the rains, he would be able to furnish me with a much larger quantity of bark. This further supply has not yet reached me, consequently the work has remained in abeyance since May last.

4. In reference to the preparation of Quinium, I have the honor to state, the Government Order mentioned in your Memorandum has never been sent to me, nor have I received any instructions relative to it; if I am to undertake the preparation of this compound, it will be necessary to provide further laboratory assistance, and a larger supply of Chinchona bark from the Neilgherries will also be needed; but I would respectfully suggest that as the process of manufacture is more a pharmaceutical than a chemical one, it would be more easily prepared at the Medical Stores, as there, apparatus, &c., on a sufficiently large scale, is probably at hand.

No. 160. ORDER THEREON, 6th November 1866, No. 3,020.

Miscellaneous.

1. With reference to paragraphs 2 and 3 of this letter, Mr. McIvor will be instructed to forward as soon as possible, direct to Dr. Wyndowe, the further supply of bark required by him.

2. Paragraph 4 will be communicated to the Principal Inspector General, Medical Department, with instructions to arrange for the preparation of Quinium at the Medical Stores; the requisite supply of bark being obtained from Mr. McIvor.

(True Extract.)
