Proceedings of the Madras Government, Revenue Department, 7th November 1866.

No. 179. Read the following Proceedings of the Board of Revenue, dated 30th October 1866.

Read the following:—

Season Report for the 1st fortnight of October 1866.

1. It has rained very heavily in most of the talooks, moistening the lands, so that agricultural operations are extensively carried on in the district. The rain is considered very favorable for cultivation. Most of the tanks have received large supplies. The Huggry river is also flowing.

2. Supplies of grain are being received from Bangalore, Cuddapah, and Kurnool, as well as from Dharwar and Mysore. Prices have slightly fallen, but not so much as could be desired, owing to supplies not being easily brought in from the flooding of the rivers, the heavy rains, and from agricultural operations being in progress. So that the poor still continue to be relieved in many of the large towns where they have assembled; famine works are in progress, on which the able-bodied poor as well as indigent ryots are employed. But the aspect of the season is very hopeful.

3. Cholera still prevails here and there, though it has ceased in a large portion of the district. In the Talook of Penkonda, however, it is still severe, there being so many as 101 deaths in 160 cases of cholera, in ten villages of that talook. Fever is also prevalent in some parts of the district. The cattle are generally free of disease, and now that pasture is beginning to spring up, they may soon be expected to improve.

4. Cholum and raggy are being reaped.
