Proceedings of the Madras Government, Public Works Department, 26th November 1866.

No. 528. Read the following letter from the Superintending Engineer, 4th Division, to the Secretary to Government, Public Works Department, dated Madras, 17th November 1866, No. 3,162:—

1. I have the honor to submit for sanction an estimate, amounting to Rupees 1,650, for raising the old dam over the Mungalathan or Adavunthoray channel, and improving the channel leading from it to the Allapuram tank in the Vellore Táluq, Vellore Range, North Arcot District.

1 Abstract Estimate.
1 Ayacut Statement.

2. The Adavunthoray channel, which has its source in a tank of the same name, runs in a northerly direction between the Native Infantry Lines at Vellore, which are situated in the east, and the villages of Adavunthoray and Ramnaikon Poliem, which are on the west of it. The large body of water which passes down this channel in the rainy season endangers both the Military Lines and the villages above named. At the request of the Military authorities and the villagers, an estimate, amounting to Rupees 800, for strengthening the banks of the channel was prepared, and sanctioned for execution on the 23rd September 1865. If the improvements now proposed are carried out, much of the water will be diverted into the Allapuram tank, thereby ensuring a supply to that tank, both during the early and latter rains of the year, and decreasing the supply going down the Adavunthoray channel.

3. The estimate has received the approval of the Collector of North Arcot, and the accompanying Ayacut Statement, furnished by that Officer, will show the amount of revenue at present accruing from the work, and the increase of revenue that may be expected.

4. The project seems a very desirable one, and is specially recommended by the Assistant Engineer.

5. If the Government are unable to allot now the funds required, it is requested that permission may be given for making an application for the amount early in April 1867 out of the Reserve "Agricultural" of that year.

No. 529. ORDER THEREON, 26th November 1866, No. 3,746.

CIVIL WORKS, No. 105.

On the strong recommendation of the Superintending Engineer and Collector, the Government approve of the estimate of Rupees 1,650 submitted with this letter, but, as the outlay is calculated to make a return of not more than six per cent., funds will not be allotted till other more remunerative works have been provided for.

(True Extract.)
