No. 357. Read the following Proceedings of the Board of Revenue, dated 16th March 1867.

Read the following :—

Season Report for the month of February 1867.

1. As before stated, the dry crops in part of the Bellary talook are poor, not so in the rest of the talook. In seven villages of Alur, bordering on Bellary talook, the crop is poor. Wherever there has been a deficient crop, relief works are continued to such as choose to come.

2. The bulk of those now employed are women and children, who are satisfied with the subsistence rate of wages.

3. The Vysac crop was being sown, and other crops reaped during the month.

4. There is a considerable amount of fever in some talooks which are named, as Raidrug, Madaksera, and Anantapur. Quinine pills have been despatched. It has declined in other talooks, such as Tadpatry, where it had been very prevalent.

5. A considerable number of relief houses have been closed at the end of the month, owing to the absence of distress, or else have been continued on a much more limited scale, as at Bellary town. It is not thought that there will be occasion to keep any open beyond the month of March.

7. Pasture is generally reported sufficient. It was withering in Hospett, but that is only customary during the dry season.
