channel to the existing line of irrigation channel. The aqueduct for this purpose, designed by the Executive Officer, is in my opinion insufficiently strong; and rather than trust to what appears to me an insecure mode of supplying the irrigation channel in question, I would propose that the Railway Officers be requested to construct a new head sluice at the foot of their embankment, or that they be left to follow their own design, so long as they place the supply of the irrigation channel in the same condition, as it was before their operations were commenced.

Chief Engineer for Irrigation.

FORT ST. GEORGE,
19th May 1868.

No. 553. ORDER THEREON, 22nd May 1868, No. 1,623.

IRRIGATION, No. 33.

1. The Government sanction the following works proposed to be carried out to the Patta Cotta Cherroo tank in

the Gooty talook of the Bellary District:—

Repair of breach		Rs. 2,950
Re-construction of principal irrigation sluice		1,850
		Rupees 4,800

The Superintending Engineer will provide the necessary funds for the first of these items, and report whether a grant of money will be required for the second work from the Reserve.

* Rupees 2,430.

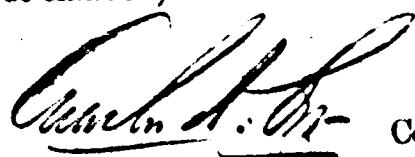

† Rupees 300.

2. His Excellency in Council approves of the extension* of the South calingulah and re-building† of the irri-

gation sluice adjacent to it, being carried out under the direction of the Superintending Engineer, the outlay that may be incurred being recovered from the Railway Company on the completion of the works.

3. The Government also approve of the recommendation contained in the latter portion of Colonel Anderson's Memorandum, and the Consulting Engineer for Railways will place himself in communication with the Officers of the Company with a view to their carrying out such arrangements as will ensure the supply of the irrigation channel being placed in the condition in which it was before their operations interfered with it.
