*Proceedings of the Madras Government, Public Works Department,
2nd June 1868.*

No. 41. Read the following letter from the Superintending Engineer, 4th Division, to the Chief Engineer for Irrigation and Joint Secretary to Government, Public Works Department, dated Madras, 20th May 1868, No. 859 :—

1 Sketch.
2 Plans.
1 Estimate.
1 Ayacut Statement.
2 Letters.

1. I have the honor to forward plans and an estimate amounting to Rupees 4,200, for cutting a channel and building the necessary masonry works for conveying the surplus water of the

Poorsay tank to the Achoor, Thennagoor, and Vadanangoor tanks, in the Wandewash talook, Polur Range, North Arcot District.

2. The excess of water of the Poorsay tank now discharges itself through the escape marked A. in the sketch, and swamps the nunjah cultivation under the tank. To avoid the damage thus occurring, and to utilize the water, it is proposed to draw it off through an escape to be constructed at the point B, and to convey it thence by means of a channel to the three before-named tanks.

3. The project has received the approval of the Collector of North Arcot, but the Ayacut statement furnished by that Officer, which is enclosed, shows that no increase of revenue is expected to result from the execution of the works.

4. The revenue, however, at present depending on the tanks would seem to justify the contemplated expenditure, and I, therefore, recommend the work for sanction from the Reserve "Agricultural" of the current official year.

MEMORANDUM.

The estimates submitted with the foregoing letter from the Superintending Engineer of the 4th Division, which provide for the execution of the following works considered to be necessary by the Collector and Superintending Engineer for the efficient working of the Poorsay tank in the Wandewash talook of the North Arcot District, are recommended for the sanction of Government:—

	RS.	A.	P.
New escape for Poorsay large tank	823	12	1
Escape channel to Achoor tank	209	3	6
Strengthening embankment of Achoor tank ...	436	14	2
Revetting with rough stone do.	695	12	0
Constructing two sluices of sixteen yards ...	420	13	4
Do. calingulah to Achoor tank	289	8	0
Channel from Achoor to Thennagoor tank ...	1,008	7	6
Revetment	212	4	0
Blocking up old escape	33	12	0
Sundries	69	9	5
Total	4,200	0	0

(Signed) J. C. ANDERSON, Colonel, R. E.,
Chief Engineer for Irrigation.
