Read the following letter from the Acting Collector of Madras, to the Acting Secretary to the Board of Revenue, dated Sydapet, 8th June 1868, No. 191 :—

1. I have the honor to submit the Season Report for the week ending June 6th.
2. The rain that fell in Madras on the nights of the 3rd and 4th, and which was registered at Sydapet at 4 inches 30 cents in the forty-eight hours, was general throughout the district, but less heavy in the west and south than at Madras. In Madurantacum, the rain fell on the 4th and 5th. Full reports of the supplies received in the different tanks have not been received, but several are reported as having received one and two months' supply, and there is now abundance of water for drinking purposes every where. Ploughing too has been commenced generally throughout the district, and pasture for the cattle will be everywhere

procurable. Cattle diseases* are still reported in a few villages, but they do not spread, and it is to be hoped that they will disappear under the influence

of the rain. Small-pox is still prevalent. The Navara crop in Madurantacum, which it was feared would be lost, is now reported as beyond risk.

3. There have been slight freshes in the Adyar, the Cortelliar, and the Numaveram rivers.

4. Prices continue stationary, and the markets well supplied from Madras.

Submitted for the information of Government.
