Two groynes in the nullah below the village of Jolada Kudlighi, in Bellary District.—Order sanctioning estimate for their construction with the view of saving the village from destruction, communicated to Revenue Board.

2

Proceedings of the Madras Government, Public Works Department, 7th October 1868.

No. 152. Read the following letter from the Superintending Engineer, 3rd Division, to the Secretary to Government, Public Works Department, dated Bellary, 19th September 1868, No. 2,236 :—

1 Copy of letter.
1 Plan.
1 Survey.
1 Estimate.
1 Report.

I have the honor to forward, for the sanction of Government, from "Minor New Works, Agricultural," the enclosed plan, report, and estimate amounting to Rupees 538, for constructing two groynes in the nullah below the village of Jolada Kudlighi, so as to break the force of the water which at present is cutting into the left bank, and threatens to wash away the village of Jolada Kudlighi itself. A survey plan on the points referred to in the report accompanying the estimate is also forwarded for reference. I also beg to submit a copy of the Head Assistant's letter* to the Collector on the subject, and would solicit the early sanction of Government to carry out the work.

* No. 79, dated 25th November 1867.

Copy of a letter No. 79, dated 25th November 1867, from the Head Assistant, to the Collector of Bellary.

1 I have the honor to call your attention to the dangerous state of the village of Jollada Kudlighi in Kudlighi talook.

2 It is built on the bank of a broad nullah, the banks of which are from twenty to twenty-five feet high. The force of the current is gradually washing away the bank on which the village is built, and undermining the houses. This was represented to the Acting Sub-Collector at the time of last settlement, and the villagers were told to begin to divert the nullah, and that perhaps some help would then be given by the Circar.

3 I visited the village at the end of September. The population is about 600, and the Beriz Rupees 927. The houses are in a most dangerous position. The villagers had spent about Rupees 400 in digging a diverting channel, and in building a small bund of wood and earth across the main stream. I asked the Supervisor in charge to frame an estimate for completing the diversion, and his estimate is enclosed; it amounts to Rupees 3,493. Unless the work is speedily carried out, the village must be destroyed. I have the honor, therefore, to recommend that sanction may be obtained for carrying out this work at once from Imperial Funds.

This estimate was found to be quite incorrect.
A. S. M.

(Signed) A. S. MOBERLY, Major, R. E.,
Superintending Engineer, 3rd Division.

No. 153. ORDER THEREON, 7th October 1868, No. 3,161.

CIVIL WORKS, No. 22.

His Excellency the Governor in Council observes that, while the plan submitted with this letter would seem to show that the proposed groynes are to be built of masonry, the estimate provides for the use of blocks of rough stone for the purpose. The Government consider that the latter description of material is all that is necessary, and that the entire groyne should be formed of it, the earthwork and pointing with chunam being dispensed with. The estimate will accordingly be returned to the Superintending
