Norton's Tube Wells.—Order regarding the transfer of three wells for use at Bangalore recorded.

From Hon. Boys Govt.
R/12 Dec/68 Encl 3 No's

Proceedings of the Madras Government, Public Works Department, 6th November 1868.

No. 74. Read the following letter from the Superintending Engineer, 5th Division, to the Secretary to Government, Public Works Department, dated Vaniembady, 28th October 1868, No. 143:—

1. With reference to the Order of Government of the 17th September, No. 2,942, I have the honor to state that there are at present three wells on the Race Course plateau at Bangalore. No. 1, ten feet in diameter and forty-three feet deep, at a spot where the ground is eight feet below the highest point of the plateau. Nos. 2 and 3, pot wells, three and a half feet in diameter, and thirty-two feet deep, immediately behind the Medical Subordinates' quarters of the new Hospital, where the ground is eighteen feet lower. There was in August six feet of water in No. 1, and two feet in Nos. 2 and 3. No. 1 is always dry in hot weather. It is now intended to deepen it thirty feet beyond its present depth.

2. The Executive Engineer reports that Norton's tube wells could be advantageously used, first, all along the lower side of the bund of the Shoolay tank, and, second, close to the existing water troughs under the bund of the Ulsoor tank. One might also be used in making a preliminary examination of the ground before well No. 1 on the Race Course plateau is deepened.

No. 75. ORDER THEREON, 6th November 1868, No. 3,466.

MILITARY WORKS, No. 7.

1. The arrangement reported in paragraph 1, is approved.

2. Sanction is also accorded to Norton's tube wells being made use of in the manner proposed in paragraph 2, and, as there are none of these tube wells in the stores of the Public Works Department, the Board of Revenue will be requested to transfer three of those lately received by that department.
