NOVEMBER

Nos. 365-366.

New Tank at K. Kottakalum in South Arcot.

—Order sanctioning the immediate execution, com-
municated to Board of Revenue.

Proceedings of the Madras Government, Public Works Department, 13th November 1868.

No. 232. Read the following letter from the Superintending Engineer, 5th Division, to the Secretary to Government, Public Works Department, dated Salem, 17th October 1868, No. 130 :—

4 Abstract Estimates.
4 Specifications.
4 Surveys.
5 Plans.

1. I have the honor to forward, for the sanction of Government, the undermentioned estimates for the improvement of Irrigation Works in the South Arcot District :—

	Rs.
For forming a new tank at Kottakalum, in the Trinomalay talook	2,740
Cutting a channel from the Sashanuddy to supply Kalamaradoor tank, and constructing a head sluice ...	1,100
Cutting a channel from the Guddelum river to supply Manaloor tank, and constructing a head sluice	1,000
Restoring a ruined tank at Nawany	1,380

2. The new Kottakalum tank will adjoin the present tank of that village. The estimate provides for raising and strengthening a bank thrown up some years ago, building a calingulah in the old tank bank, and providing the new tank with a calingulah and two sluices. The tanks will be supplied from a river channel, and it is expected that, by storing more water, there will be an increase of revenue of Rupees 1,774.

3. Kalamaradoor tank is situated between Trivanalore and Oolundoorpet, and has a bund of good section, as the district road passes over it. The present revenue is nearly equal to the ayacut, but by cutting the channel the revenue will be secured and somewhat increased.

4. By cutting the channel to the Manaloor tank, it is expected that more land will be brought under cultivation, and there will not be occasion for granting remissions on account of withered crops.

5. There is no nunjah ayacut under the Nawany ruined tank, but it is expected that 100 cawnies of dry land will be converted into wet, by which an increased revenue of 500 Rupees will be obtained.

6. If these estimates are sanctioned, I expect to be able to provide funds for them in the statement of re-distribution of funds to be submitted later in the year.

No. 233. ORDER THEREON, 13th November 1868, No. 3,545.

IRRIGATION, No. 12.

1. With this letter the Superintending Engineer of the 5th Division submits estimates, amounting in the aggregate to Rupees 6,220, for the formation of a new tank at Kottakalum, the excavation of two supply channels from the Sashanuddy and the Guddelum rivers to the Kalamaradoor and Manaloor tanks respectively, and the restoration of a ruined tank at Nawany in the South Arcot District, and states that the execution of the works will be the means of bringing additional lands under wet cultivation, and of securing and improving the existing revenue.

Proceedings of the Madras Government, Public Works Department,
13th November 1868.

2. His Excellency the Governor in Council sanctions the immediate execution of the works in anticipation of an allotment of funds being made later in the year.
