*Proceedings of the Madras Government, Revenue Department,
19th February 1868.*

No. 390. Read the following Proceedings of the Board of Revenue, dated 10th February 1868, No. 983.

Read the following letter from H. St. A. GOODRICH, Esq., Junior Assistant to the Agent in Ganjam, to the Agent to the Governor in Ganjam, dated Camp at Gannaringia, 19th December 1867, No. 198:—

I see that all the results of Carolina paddy are wanted. I sowed at Baliguda eight seers in virgin soil, clearing it myself, soil being a sandy loam. My object was to see whether it might (as some of the printed opinions led me to think) turn out to be cultivable in clearings instead of Sua ('Kueri' Khond) and hill paddy. I sowed in July, and found it looking so poor at the end of August, that I watered it three times a week until November 1st, and cut it on the 12th. The piece of land on which it grew was much infested by white-ants, and hares and rats took a large share of the crop. No doubt, however, was left on my mind that, at Baliguda, it must be grown as a wet crop, and not, as I tried to grow it, as a dry one. There was nothing remarkable about the plant as it stood; it tillered well, but the ears were not large; my cattle seemed to like the straw much. I have lucerne and wheat in this and the adjoining land, which you will see when you visit Baliguda. Owing to the causes I mentioned, the return was very small, only ten seers. I shall grow the seed obtained next year under irrigation, having first noted the results at Aska.
