*Proceedings of the Madras Government, Revenue Department,
12th July 1871.*

131. Read the following letter from the Acting Inspector-General, India Medical Department, to the Secretary to Government, Revenue Department, dated Fort St. George, 1st July 1871, No. 215:—

With the honour, with reference to the Proceedings of Government marginally noted, to submit a report on the medical value of the Calcic Quinovinate, a small supply of which was prepared and furnished by Mr. Broughton.

G. O., Revenue Department, No. 990, of 5th June 1871, and G. O., No. 1,085, of 19th June 1871.

2. The cases in which it has been used are altogether insufficient in number to admit of any conclusions being arrived at as to its therapeutical virtues. But, so far as will be seen from the annexed tabular statement, the results have been unsatisfactory.

3. Five cases of malarious fever were treated with the drug, and of these three recovered, one was not relieved, and in the fifth there was a doubt as to whether the case had ever been one of fever. A further experience, therefore, will be needed before an opinion can be formed as to its anti-periodic powers.

4. In ten cases of diarrhoea the effects were even less satisfactory, but in some of the cases the patients had not a fair trial, as the patients were old and debilitated, and the disease had been of long standing.

5. Only one case of dysentery was subjected to the action of the drug, and the patient recovered, but no deduction can be drawn from the result of a single case.

6. It is, however, extremely desirable that a remedy so highly spoken of should be subjected to more extensive trials in the manner proposed by the Right Honourable the Secretary of State for India, and to permit of this being done, I have the honour to recommend that Mr. Broughton may be requested to furnish me with at least five pounds of the Calcic Quinovinate.

Tabular Statement of the Results of Trials of the therapeutical effects of the Calcic Quinovinate manufactured by J. Broughton, Esq.

Diseases.	Number of Cases.	Average quantity of the Drug administered in each Case.	RESULTS.		
			Successful.	Unsuccessful.	Doubtful.
