Revenue (Forests),

No. 4.

To His Excellency the Right Honourable The Governor
in Council, Fort St. George.

My Lord,

Para. 1. I have considered in Council the Despatches from your Excellency in Council, numbered 2 and 3, Forests, and dated respectively the 27th of March and the 25th of April, the former reporting, in continuation of your Despatch, No. 4, of the 13th of August last, the additional measures adopted by your Government for the formation of Fuel Reserves and Plantations for the use of the Railways, and the latter requesting that I will forward to you at an early date two hundredweight (2 cwt.) of dynamite, for the blasting operations necessary to enable the Forest Officers to float timber down the Barghoor and Cauvery rivers.

2. The proposals made for supplying fuel from the Coimbatore Forests by the Barghoor river on the one side, and from the Salem Forests on the other side of the Cauvery, by removing the impediments in those rivers received confirmation from the report of Mr. Nordman, the Engineer deputed to investigate the locality with Colonel Morgan; and I have given directions for obtaining and forwarding to your Excellency in Council the dynamite you have indented for.

3. I approve of your having postponed the question of a tramway, until it has been ascertained to be necessary, which will not be the case if the channels of the rivers are made available for the purpose of floating the timber.

4. The formation of the additional Fuel Reserves reported in these proceedings has rendered necessary the appointment of three additional Assistant Conservators, and I approve the measure.

5. I likewise approve your instructions, that where suitable waste lands cannot be found for reserves, proposals should be made to you for the purchase or lease of private lands, and that forest and jungle lands situated near railways (and, I will add, in other localities where fuel may be required) should not be alienated until the requisite Fuel Reserves have been finally set part.

6. Your directions for keeping accurate and detailed statistics of the effect of irrigation upon plantations are also very judicious.

I have the honour to be,

My Lord,

Your Lordship's most obedient humble Servant,
