No. 73. Read the following letter from the Acting Inspector-General, Indian Medical Department :—

Submits opinion on the Medical Certificate granted to the Rajah of Venkatagiri relative o his son's health } (Here enter 25th August 1871.)

No. 74. ORDER THEREON, 6th September 1871, No. 1,543.

Miscellaneous.

THE Government consider that, regard being had to their very limited observation of the case of the Venkatagiri Rajah's son in point of time, Drs. Stanbrough and Duff acted in an indiscreet manner in granting such a certificate as they did, especially as to the specified period of time during which they warned his parents that it would be inadvisable he should be permitted to leave his present home, and that, in citing his strong affection for his family as an additional argument to support their view, they adduced a motive of which, under the circumstances, it was beyond their competence to judge.

2. The Acting Inspector-General will communicate these remarks to the officers concerned.

(True Extract.)

(Signed) W. HUDLESTON,
Secretary to Government.

To the Acting Inspector-General, Indian Medical Department.

Ed. F. R. Bantleman.

at the request of Rattah Vaboo Gotee Coomar
Gatchama Naidu Bahadur C.S.I., Rajah
of Venkatagherry, that we the undersigned
should report upon the state of health of
his third son Ramjama Naroo Nistah
Jarn, aged 9 years, who it appears has
lately been adopted by the Rance of Bobbi-
and who is desirous that the boy should
proceed at once to Ten en daree, we
this day proceeded to Venkatagherry, and
have carefully examined into the state of
health of the boy.

He is of a very delicate appearance, and
is evidently recovering from recent attack
of Chicken pox, and dysentery which
have left him emaciated and debilitated
From enquiries it is found that he suffers
from very frequent attacks of indigestion
fever, and diarrhea; food of the bland
description often disagreeing with him.
He is besides of a very timid disposition

In consequence of his present condition, he is in an opinion quite incapable of undertaking any long land journey, such as that to Bobbi, of about 600 miles, as safely living in that jungly and unhealthy Country - His nervous system is in so depressed a condition and his affection for his family is so strong, that we cannot too pointedly caution the parents to the inadvisability of permitting the youth of such tender years and susceptibilities, to leave his present home in at least 18 months or 2 years -

We are further of opinion that his being sent away now on such a journey might very possibly be attended with serious consequences -

J. Cleveland
Health Officer

L. Murray Duff Lieut
Surgeon Superintendent

Received at Office
31st Oct 1871

No 1563
Sept 6th/71

From Asst Surgeon
Indian Med. Dept.

The Govt. consider that expenditure should be strictly limited to the observation of the symptoms of the Bubonic fever in regard to Dr. Bleeker & Dr. Duff acting in + indiscreet manner in sending such urgent and insufficient as they did, especially as to the specific period of time during Dr. Bleeker's present illness it will be indispensable to remain to

+ per both "indiscreet" would be better - or "injudicious" the reference to Bobbily in the latter specifically was respectfully submitted.
J. of S

I would say "indiscreet"
J. of S
N

I have his present
letter and that in-
closing his Photographs
for his family as an
additional argument
& support to other
steps already taken
for his advancement
& will do what I can
to bring his services
& merits to the
notice of the
Officers concerned
