No. 355. Read the following Proceedings of the Board of Revenue, dated 9th September 1871, No. 3,881:—

Read the following letter from the Acting Collector of Madura, to the Secretary to the Board of Revenue, dated Madura, 14th August 1871, No. 242.

ADVERTING to the Board's official mem[illegible]um dated the 26th May last, No. 730, I have the honour to state that the local measure is converted into the Madras garce, calculating at the rate of 2,844 heaped measures per garce. The same rate of conversion is applied both to grain and salt.

THE Board observe that the Madras garce of grain is equal to 400 Madras mercals of 832 or 800 cubic inches; whereas the garce of salt is arbitrarily considered to be 424 mercals of 828·34 cubic inches.

2. These Proceedings will be submitted to Government in continuation of those dated 29th June 1871, No. 2,613, in further proof of the necessity for some intelligible rendering of the price lists.

No. 356. ORDER, THEREON, 26th September 1871, No. 1,683.

[redacted] dated 26th September 1871, No. 1,682, on Board's Proceedings dated 29th June 1871.

(True Extract.)

(Signed) W. HUDLESTON,
Secretary to Government.

To the Board of Revenue.
