This Quarterly 'Progress Statement'

may be 'recorded', like the previous

Quarter's, unless before the 1st of Decr

to decide that the Ryots of those

parts of the Krishna district where

new Puttaks are ready, shall

pay the new rates from the present

Finaly -

Mr. Sambhu was ready to

call upon them to do so, but he (Mr.)

says 'Give them time to decide

'whether they will now bring up their

'lands or not, under the new rate'

It is too late but what is to be allowed?

Now in Nov. 21/11/72

Land Revenue

Revenue Settlement Office
Madras
16th November 1872
Ed. S. G.

Geo Banturys
Director of Rev. Settlements

Revenue Settlement Office,
No. 2178
65 Madras,
16th November 1872

From, Geo. Danbury Esq.
Director of Rev. Settlement.
To, W. F. Carmichael Esq.
Asst. Secretary to Government
Revenue Department

Sir,

I have the honor to
submit the report shewing
what progress has been
made by this Department
during the 2nd quarter of
the present official year,
comprising the months of
July, August and September.
Each District will be noticed
in the usual order.

Kistna. 2. The orders
of Government sanctioning
the

the settlement scheme for the Gunter portion of this District having been received in May last, arrangements were at once made to introduce the new rates, and the Acting Lineovenanted Assistant started work with his temporary establishment in July. The main items of office work performed stand thus.

Particulars	Last quarter		In this quarter	
	N. of Villages	N. of fields	N. of Villages	N. of fields
1. Calculating the field war assessment	130	61,648	198	140,946
2. Examination of - do -	90	36,583	224	149,513
3. Examination of Amara patta assessment	"	"	121	65,868
4. Writing out Orisam logs	"	"	108	58,041
5. Comparison of - do -	"	"	17	4,793
6. Preparation of Awaras	"	"	71	24,747
7. Comparison of - do -	"	"	15	4,963
8. Examination of the measurement of the sub-divisions	"	"	42	16,244

In calculating the new assessment

assessment for each field fair progress was made, nearly a lac and a half of fields having been thus dealt with. The preparation of the "Asamiwar" or individual account (No. 5 in the Manual) also progressed, and more than half a lac of fields were written up. It is the copy of this register for each individual that constitutes the "rough patta", so that as soon as the former is complete the latter can be at once prepared. There was a small falling off in field work as regards demarcation and classification

f

of tracts lately occupied. This is owing to there having been less waste newly entered upon by the Ryots, and to the fact of classification having in some instances been already carried out, and there being, therefore, no occasion to go over this work again, when these tracts were for the first time demarcated. The field work carried on by the few hands in this party is as follows.

Items	Last quarter		In this quarter		Difference	
	Acres	Sqrs Miles	Acres	Sqrs Miles	Acres	Sqrs Miles
Area demarcated	2593	4.05	2538	4.00	- 55	0.05
Number of stones put down	803		841		+ 38	
Area classified	1944	3.04	340	0.53	- 1604	2.51
Area surveyed	2648	4.14	2678	4.18	+ 30	0.04

The

The outlay for the period in question comes to Rs. 322 or Rs. 1882 over that of the preceding quarter owing to the entertainment of the extra hands as already explained.

Kurnool & Maddur

3. The results of this party, the largest in the Department shew better than during the preceding quarter in both detail demarcation and classification. There is a falling off in the Rhundum demarcation, as the area comprised in these large blocks of waste, undemarcated in detail, is not brought to account.

particular

until the whole village is finished, and work has only comparatively recently commenced in the Pulivendla Taluq. The following shews the area dealt with both during the past quarter and that of the one preceding.

Items	Last quarter		In this quarter		Difference
	Acre	sq. ft.	Acre	sq. ft.	
Area demarcated in detail	56344	88	67438	105	+11094+17
do into Khudums	205463	321	57588	81	-153875-240
Area classified	44993	70	57196	80	+6203+10

4. The number of field stones put down shews a large increase, and when it is remarked that efforts have been made to diminish the number appertaining to

to each field, it will be seen that this increase is due to a larger area having been dealt with. Thus the marginal fig. Area demarcated in detail — 67438 shew that No. of field stones. 58,576 there has been not more than one stone planted per $1\frac{1}{2}$ acre of detail demarcation.

Description of stones	Last quarter	In this quarter	Difference
No. of field stones put down	47536	58,576	+11,040
No. of stones on Village Boundaries	1436	2438	+1,002
do on Khudums Boundaries	3773	10,052	+6,279

As mentioned in para 5 of my last quarterly report attention has been paid to quarrying the demarcation stones in a more uniform and

and shapely manner, and the following Extracts of communications from Mr. Baber and Mr. Pedraza show that good results have been obtained in this respect.

Extract from Mr. Baber's diary for September.

"I was much surprised at the quality of the stones, as from reports received prior to my arrival in the Talug, I came to the conclusion that the material put together would not come up to the standard required by the Director."

Extract from Mr. Pedraza's letter dated 28th October 1872.

"I am glad to observe that in most instances the marks now being placed though rough dressed, almost equal those dressed with the chisel."

Restoration of demarcation

5. Whilst on a tour last year in the Jummulamadafoo, Proddatoor

8/13
Proddatoor and Jeddapah Talugs, I found that during the eight years which had elapsed since demarcation was undertaken in this District, some of the stones had disappeared and others had been knocked over by carts &c. As the new settlement is about to be introduced into these Talugs it seemed to be a good opportunity for renewing these missing marks, and as it was necessary that the stones should be replaced in the exact spots occupied by their predecessors as shown in the sketches, Colonel Priestley lent me five of his Aumeens with

with the field plans,
and these employees aided
by the Salug authorities,
as kindly ordered by Mr
Horsley are now engaged
upon this task of revival.
The out-turn stands as
follows.

Field stones renewed. 9,714
Boundary - do. - 1,065
Total. 10,779.

b. Hill boundary work,
it will be noticed, shows
better than during the pre-
vious quarter.

Particulars	Last quarter		In this quarter		Difference	
	$\frac{1}{2}$ Villages	$\frac{1}{2}$ Acres	$\frac{1}{2}$ Villages	$\frac{1}{2}$ Acres	$\frac{1}{2}$ Villages	$\frac{1}{2}$ Acres
Government	11	10856	13	18197	+2	+7341
Agraharum	4	4296	3	2652	-1	-1644
Total	15	15152	16	20849	+1	+5697

The hands are now chiefly
engaged on the definition
of

of the Hill boundary
line between Juddapah
and Kellare; but they are
hindered by disputes which
crop up during the course
of this work now undertaken
for the first time. Mr. Baker,
the Acting Assistant District
has been deputed to settle
the more important cases
of this nature. The Government
may remember that this
is a new branch of work
never originally contemplated
and only lately introduced
for the more accurate pre-
paration of the Salug maps.
y. The measurement of
minor holdings likewise
exhibits an increase, and
is due to the hands engaged
thereon

thereon having been stirred up from time to time, and stimulated to greater exertions.

Talugs	Last quarter		In this quarter		Difference	
	N ^o of survey fields	N ^o of sub. divisions	N ^o of survey fields	N ^o of sub. divisions	N ^o of survey fields	N ^o of sub. divisions
Summulamadappa	496	1306	1420	3980	+924	+2674
Pullempett	575	1474	5404	14,898	+4889	+13424
Cuddapah	112	195	445	1254	+333	+1059
Total	1123	2975	7269	20132	+6146	+17157

Major Stuart also paid attention to testing the out-turn of crops, and 273 of these experiments were made. I hope to have the results of 5,000 experiments of this nature to serve as a basis for framing the grain values of Pulivendla and the sub. division Talugs, which are to be settled en bloc.

Kurnool. & The Registers of

10/123
of the three villages remaining to be printed to complete those for the whole of Kurnool proper have been struck off.

As Government sanctioned the introduction of the new rates into Pattikonda I selected for this task Rajah Sopaul Sengar, formerly Native Assistant in this Department, and subsequently Nagar Sheristadar of Tanjore, but now receiving pension. He was nominated to a vacant Supervisorship and with some extra hands commenced work at Osapully on the 1st of August, since which time

he has been making very good progress as will be seen below.

Particulars	N ^o of Village nos	N ^o of Survey fields
1 Entering the survey areas in the Classification Register	90	61260
2 Comparison of - do -	90	61260
3 Making Abstracts of classification from survey areas	66	42159
4 Entering and calculating the field survey assessment	90	52866
5 Comparison of - do -	90	52866
6 Making abstracts of - do -	17	6989
7 Comparing the classification Register with the Kurnool's account of July 1274	84	57890

A small amount of field work was carried on, as in the Kistna District, in the case of lands newly occupied, and extended over 938 acres of demarcation, survey and classification in 31 Villages. The stones planted were 1079.

9. The cost of this establishment for Kurnool and Juddapah shews a decrease of Rs. 1263.

Last quarter 22171
In this quarter 20908
Decrease 1263

This

This arises mainly from less outlay in printing Land Registers, the work having drawn to a close, as already explained.

Kellore & North Arcot

10. Mr. Rundall's party like that in Juddapah works upon the combined system, demarcation and classification being carried on simultaneously. Operations were chiefly confined to the Pithore Taluk, the results of this quarter when contrasted with that preceding stand as under.

Items	Last quarter		In this quarter		Difference	
	Acres	Sq. ft.	Acres	Sq. ft.	Acres	Sq. ft.
Demarcation in detail	27041	4224207	38	2834	-4	
do - put to the ground	4069	616130	25	12061	+19	
Classifications	16300	2526390	41	10090	+16	

This

There is a small decrease in demarcation, owing to a few of the hands, not yet being quite up in classification, so that in some instances the older employees had to do classification alone, thus foregoing their demarcation for awhile, and thereby diminishing the outturn of this latter branch, and enhancing the former.

11. As anticipated in para 11 of my last quarterly report there is a decrease in the number of field stones put down owing to Government having recently permitted the clubbing of small holdings into one survey

survey field as heretofore.

	No. of stones
Last quarter	75,399
In this quarter	62,432
Decrease	12,967

12. Mr. Rundall has also been engaged in calculating the assessment to be levied upon the excess Inam areas in the subdivision of Kellom according to the procedure laid down in G.O. dated 30th May 1891 No. 948. The results have been obtained for 91 Villages and the assessment to be newly levied comes to Rs. 2032. The outlay of this party stands at Rs. 11,197 against Rs. 10,934 for the preceding quarter, thereby shewing an increase of Rs. 263, mainly owing to Mr. Clerk having

having passed his examination and been made a 2nd Assistant.

Salem & Gimbatare

13. Mr. Fogstoun having been mainly engaged in finally introducing the new rates into the Sharampoory Talug, which was completely out of hand just after the close of the quarter, there is a considerable decrease in out-door work which consists of revision of classification and final registration.

Items	Last quarter	In this quarter	Difference
Number of Villages	241	78	-163
Number of Survey fields	34,799	9683	-25116
Area classified	111,315	36,051	-75264

The Sharampoory Talug has taken

taken longer than was anticipated, but as the increase in Revenue was heavy, it was most necessary that great care and attention should be bestowed on the task. My report just sent to the Board shews that the final settlement yields an increase of Rs. 30,214 or 20½ per cent on the present Revenue.

14. In addition to the foregoing the Salem party carried on work under the following heads as thus shew.

1. New demarcation, classification and survey.

	Acre	Sq. miles	No. of marks
Last quarter	897	1.40	4,642
In this quarter	966	1.57	3,351
Difference	+69	+0.11	-1,291

2. Measurement of interstitial fields.

Items	Last quarter	In this quarter	Difference
Number of Villages	267	48	-189
Number of Survey fields	2,072	426	-1,646
Number of Sub. Divisions	4,528	1,467	-3,061

3. Restoration of demarcation.

	No. of old stones properly fixed	No. of stones newly planted	Total
Last quarter	5,215	6,536	11,751
In this quarter	6,203	9,759	15,962
Increase	988	3,223	4,211

The second item shews a decrease as this task is carried on pari passu with the revision of classification which already shewn had to give place to office work.

I have again seen the work of restoration of demarcation which comprizes the third item, and not only does the branch of work exhibit a large increase, but Mr. Foggetoun is entitled to much credit on account of its quality; the stones being now as good as can be wished for, and very permanently buried.

The preparation of the Siglott Registers for the Sharampoary

Sharampoary Talug was attended to and 41,820 fields (including subdivisions) in 323 Villages were written up.

Coimbatore 15. Mr. Foggetoun

Acting assistant Director in Mr. Foggetoun's party began classification in the Perintharay Talug with a small staff and the result of their work is shewn beneath.

Items	N ^o of Villages	N ^o of fields	Area classi- fied	sq. m. miles
Completed Villages	32	12,285	58,374	91
Sub Villages in progress	10	3,320	34,345	52
Total	42	15,605	92,719	145

The daily average attained reaches 131 acres which is very fair considering that at first starting there were

were some drawbacks. The measurement of interstitial fields, and the number of experiments made in out-turn of crops are shown below.

Minor holdings	N ^o of Villages	42
	N ^o of Survey fields	1646
	N ^o of Sub-divisions	3122

Experiments.	N ^o of Kyles.	
	Cumbos	160
	Chalcam	1
Total		161

The outlay of the Salem party shews a decrease of Rs 300,

Last quarter	13,755
In this quarter	13,455
Decrease	300

owing to the acting Deputy Director's deputation allowance alone having been debited for the whole quarter to this department during Mr Goodrich's absence on sick

sick leave.

Chingleput. 14. The small party working under my orders in this District were engaged in the Trinellur Taluk and their quarters work yields an increase over that of the preceding three months.

Particulars	Last quarter	In this quarter
N ^o of Villages	81	88 + 7
Area classified in acres	49914	51611 + 1697
Area in square miles	78	81 + 3

The measurement of minor holdings of which in this District there are a large number shews well, although there is a slight decrease.

Items	Last quarter	In this quarter	Difference
N ^o of Villages	77	88	+ 11
N ^o of Survey fields	9849	8253	-1596
N ^o of Sub-divisions	27425	26583	-842

In this party the measure

are aided by the field sketches, and length of the sides common to both survey fields and, minor holdings having in many instances been given by the Survey Department.

There is a decrease of Rs. 309 in the outlay of the Pingle. put partly owing to some of the hands having been sent back to Tinnevely, now that orders have been issued on the settlement of that district.

Tinnevely. 18. The outlay in this district is debited to the Settlement Budget; but all the work is carried on by Mr. Puckle.

There

15/18
There is a slight decrease of Rs. 504 below the expenditure of the former quarter.

To Summarize. 19. In the Krishna, Mr. Fox who has just arrived from England has taken charge of the Gunter Settlement work from the Acting Unconvenanted Assistant, and it was intended that the new assessment should be realized for this fully in four out of the 7 Salugs. But as the Asst. Collector Mr. Leman is of opinion that owing to an increase of assessment the Ryots should have full time to consider whether there are any lands they

they would like to throw
up, I have not pressed
the point; so the tickets
or rough pattahs will be
issued this July, and
the new rates levied next
year - July 1283 - as was
the case in the other por-
tion of the Province. In
Juddapah good progress
is being made in Puli-
vendla and very little re-
mains to be done in Kadri.
Major Stuart's report on
the proposed Settlement
for the Budwail, Pullempett
and Sidhout Taluqs is ex-
pected before the close of
the present year. Rajah
Gopaul Syengar is introducing
the

the new rates into the
Pattikondah Talug of Kur-
noal, under my orders, and
as soon as I have a supply
of rough pattahs ready,
I must proceed thither
and distribute them. If
Mr. Hase sees no objection
the new rates might be
levied this year and I
am in correspondence with
him on the subject. In
North Arcot, Mr. Rendall
is getting on with the Shittan
Taluq, and I am sorry to
say that owing to Bengue
fever having largely pre-
vailed amongst the
printers, his Settlement
report for the Subdivision
Taluqs

Taluqs of Kallare has
 not yet come to hand.
 Mr. Lloyd Jones in Salem
 having completed the
 settlement of Bharampore
 is now similarly engaged
 upon Coosoor and Kistna-
 gherry; he is also paying
 considerable attention
 to the permanent revival
 of missing demarcation
 marks, as ordered by
 Government. Classifica-
 tion has commenced in
 the Perinthoray Taluq
 of Coimbatore. I visited
 the scene of work last month
 and matters appear likely
 to progress satisfactorily.

In Shingleput, progress is
 being made in the Pre-
 vellar Taluq, which may
 be completed by the end
 of the year, when I must
 begin to prepare the settle-
 ment report for the Principal
 Division of this District.
 I may finally add that the
 settlement proposals for
 the Principal Division of
 Cuddapah } *Formerly part*
 Poddatur } *of Cuddapah.*
 Summalnadurgas }
 Kailgumbla { *Formerly attach-*
 ed to Cuddapah
 but now forming
 part of Kurnool }
 Kallare and for
 the four
 Taluqs noted in the margin
 await the orders of Government.

I have the honor to be,
 Sir,

Your most obedt. servt.
