*Proceedings of the Madras Government, Revenue Department,
6th January 1872.*

No. 45. Read the following Proceedings of the Board of Revenue, dated 28th December 1871 :—

Read the following letter from the Acting Collector of Ganjam, to the Secretary to the Board of Revenue, dated Mohana, 14th December 1871, No. 161.

State of crops, Purla Kimeddy.—In continuation of my letter of this date, No. 160, I have the honour to state that the accounts from Purla Kimeddy just received show that the average yield of the talook is estimated at $\frac{3}{4}$ ths or $\frac{1}{2}$ ths of a full crop, the low-lying lands dependent on large tanks and river-channels having yielded well, while the crops of those villages which do not possess means of irrigation are of an ordinary character.

2. *Water-supply.*—There has been no rain for three months. In the larger tanks there is half the usual supply of water. The smaller tanks are nearly dry. The Vamshadara and Mahandratanaya rivers are very low.

3. *Prices.*—New paddy is selling at Rs. 45 per garce; old paddy and raggy at 63 Rupees.

4. *Health.*—There is no disease among the people or the cattle.

5. *Prospects.*—There is no great stock of old paddy in the talook, inasmuch as large purchases have been made by the merchants in Vizagapatam where the crops are said to have failed. The reaping of the present year's crop has already commenced, and no difficulty is anticipated in procuring new grain.

SUBMITTED to Government.

No. 46. ORDER THEREON, 6th January 1872, No. 24.

Miscellaneous.

ORDERED to be recorded.

(True Extract.)

(Signed) W. HUDLESTON,
Secretary to Government.

To the Board of Revenue.
„ G. Thornhill, Esq.

Proceedings of the Board of Revenue
dated 28th December 1871

Read the following letter

No 161.

Camp, Mohona 14th Dec 71

From
The Acting Collector of Gangan

To
The Secretary Board of Revenue
Madras.

Sir

State of crops

Pula Kennedy

In continuation of my letter
of this date, No 160; I have the honor
to state that the accounts from
Pula Kennedy just received
show that the average yield of
the tuteok is estimated at $\frac{3}{4}$ or
 $\frac{10}{16}$ of a full crop, the low lying
lands dependent on large tanks
and river channels having
yielded well, while the crops
of those villages which do
not possess means of irrigation
are

are of an ordinary character

2 There has been no rain Water
for 3 months. In the larger tanks supply
there is half the usual supply
of water. The smaller tanks
are nearly dry. The Namshadana
and Mahanchiatamya rivers
are very low.

3 New paddy is selling Prices
at Rs 45 per gane. Old paddy
and Ruggy at 63 Rupees.

4 There is no disease among Health
the people or the Cattle.

5 There is no great stock of Prospects
old paddy in the talook in as
much as large purchasers have
been made by the Merchants
in Vijayapattam when the crops
are said to have failed. The
reaping of the present year's crop
has already commenced and
no difficulty is anticipated

in procuring new grain 39

Thank you
