B.P. No.		Mis.
Dated	18-12-1873	196 .

Not to be folded or roughly handled

No. 102. Read the following letter from H. S. THOMAS, Esq., President of the Municipal Commission, Mangalore, to the Hon. W. HUDLESTON, Chief Secretary to Government, Fort St. George, dated Siradi, 25th October 1873, No. 150:—

In conformity with the provisions of Section 32 of the Towns' Improvement Act III. of 1871, I have the honour to submit the annual report of the Municipal Commissioners for the town of Mangalore on the working of the Act during the last official year 1872-73.

Statement I., with Enclosure A.
Do. II., with Enclosures A and B.
Do. III.
Do. IV.
Do. V.

The several statements of receipts and charges in the forms prescribed in G.Os., Nos. 1646 and 822, dated the 28th October 1871 and the 12th January 1873, respectively, are herein enclosed.

2. Mr. J. W. Boys, Accountant in the Branch Bank of Madras at this station, was appointed by the Commissioners to audit the accounts of the year, and a copy of his report is herewith transmitted for the information of Government. The result is satisfactory, as nothing more than a few clerical errors have been found.

Enclosure A.

3. The balance to the credit of the Municipality at the commencement of the year was Rupees 14,810-12-9, of which Rupees 2,053-0-5 is the Endowment Fund of the Civil Dispensary at this station entrusted to the Commissioners. This large balance was caused by a small increase in the receipts of the year 1871-72 above the budget provision for that year, and more especially by the difficulties felt by the Commissioners in carrying out some new works proposed to be constructed during the year from not having a proper agency. The receipts, current and arrear, during the year under review, from the various sources detailed in Statement I., amount to Rupees 21,666-10-1, exceeding the Budget Estimate by a sum of about 1,347 Rupees. The Commissioners had, therefore, at their disposal during the year a sum of Rupees 36,477-6-10.

4. ARREARS.—*Revenue, Taxes on Buildings and Lands* (*Section* 40).—At the beginning of the official year under report there was a balance under this head to the extent of Rupees 1,654-11-2, as will be seen from the Demand, Collection and Balance Statement IV. Out of these arrears the Commissioners have been able to realize the sum of Rupees 1,351-2-9. The Commissioners had also to strike off a sum of Rupees 112-13-7, the same having been found, after due inquiry, to be irrecoverable. The large outstandings have thus dwindled down to a small sum of Rupees 189-13-9, the recovery of a greater portion of which is doubtful.

CURRENT.—The demand for the year, as shown by Statement IV., is Rupees 6,753-14-0, towards which a sum of Rupees 6,360 (net Rupees 6,347-5-8 after deducting refunds) has been realized against an estimate of Rupees 5,000. The assessment was carefully revised during the year, special regard being had to new and improved buildings, and from this results the excess collection. The number of bills issued during the year is 4612, the greater number of which have been discharged upon presentation thereof. The number of coercive processes used for

the realization of this tax, as compared with the number issued last year, is given in the margin, and the Commissioners are glad to observe that, notwithstanding the small number of processes, the balance that remained uncollected at the close of year is the smallest ever yet known. They trust that during the course of the current year they will have this small balance disposed of.

	No. of Bills.	Notice of Demand.	Warrants.
1871-72 ...	4,803	1,358	824
1872-73 ...	4,642	1,547	658

5. ARREARS.—*Taxes on Arts, &c.* (*Section* 57).—The collection under this head, the Statement IV. will show, amounts to Rupees 751-1-0, thus falling short of the budgeted amount (viz., Rupees 1,500) by a half of it. The decrease is owing to the Commissioners having had to write off from the accounts Rupees 678-12-0 on account of death, absence or poverty of the taxpayers.

CURRENT.—The amount set down in the budget as probable collection is Rupees 7,000, and the actual collection amounts to Rupees 7,251, or to Rupees 7,002-8-0, the refunds being deducted.

6. *Tax on Carriages, Horses, &c.* (*Section* 63).—Considering the difficulties which the Commissioners have to contend with in realization of this tax, which is open to evasion by taxpayers, the collection under this head may be on the whole looked on as fair, though it has fallen short of the budgeted amount by about 350 Rupees.

7. *Tolls* (*Section* 77).—The Commissioners proposed in their Budget Estimates for the year to levy the maximum rate of tolls allowed by the Act, and so increased their estimate of collections from this source to Rupees 1,300. The Government, however, did not sanction the proposal, and fixed the amount under this head at half the schedule rates. The two toll-gates established by the Municipality were let out on contract for Rupees 1,009, the whole of which amount was realized within the year, and this amount has been the highest ever collected. I beg to observe that no instance of oppression or other irregularity on the part of the Contractors has come to notice in the year under report. The weight of this impost cannot be taken as affecting the traffic of the country, as it falls entirely upon the traders at Coorg and Mysore, who send their produce to the coast and take Government salt on return.

8. *Fees* (*Sections* 106, 123, 125, 130, 131, 136, *Bye-laws, and Schedule A*).—The Government will observe an excess of Rupees 268 over the estimated collection under this head, but this is owing chiefly to a large number of distraints issued during the years 1870-71 and 1871-72 having been executed during the year under review.

9. *Fines—Magisterial Fines* (*Section* 170).—The receipts under this item exceed both the budget provision and the realization of the previous year, and this arises from certain men having been heavily mulcted by the Magistracy for a wilful infringement of the Commissioners' order closing certain objectionable burial-grounds in the heart of the town.

10. *Endowments and Sundry Contributions.*—Since the Civil Dispensary has been transferred to the Municipality, voluntary private contributions have

Proceedings of the Madras Government, Financial Department,
13th December 1873.

gradually fallen off, and it seems probable that they may eventually fail altogether, for the people are unwilling to pay voluntarily for an institution for which they are also taxed. This explains the falling off in the receipts under this head. The Commissioners have received, during the year under report, an aid of Rupees 800 from the Local Fund Board of the Canara Circle for the support of this institution.

11. *Miscellaneous.*—The miscellaneous receipts are usual, and call for no particular explanation.

12. The Commissioners are glad to record here that the collections, as above severally explained, are, on the whole, very satisfactory. Almost every item of receipt has been recovered within the year.

13. CHARGES.—*Grant* I. (*Public Works*), *New Works, Sanitary and Miscellaneous. Latrines.*—A sum of Rupees 2,522 has been spent on the construction of five public latrines, four for males, and one for females, which sum, added to the outlay of Rupees 1,100 in the previous year, gives a total of Rupees 3,622. These latrines have been built on the most thickly-populated localities, and are found very useful, as people appear to take much advantage of them. It must be observed here that the people in this town have generally private latrines of their own, which the municipal scavengers keep clean. The Commissioners think that a few more [illegible] till be built at the expense of the Municipality as funds may be available; but this cannot be expected to be soon feasible if the profession-tax is to be given up hereafter, as seems to be intended.

14. A portico to the Civil Dispensary, which was much needed, was erected at Rupees 224-12-9, and a dead-house outside the precincts of the Civil Dispensary was built at a cost of Rupees 322-7-4; Rupees 205-12-8 within the year and Rupees 116-10-8 subsequently. This amount of Rupees 322-7-4 has been, however, since recouped from the Imperial Treasury as sanctioned in G.O., dated 7th March 1873, No. 317, Financial Department, and will appear to the credit of the Municipality in the accounts of the current year.

15. *Market.*—This work, the Government are aware, was begun in the year 1870-71, and only a small sum of Rupees 236 was spent in that year for levelling the ground. A sum of Rupees 5,350 was provided in the budget of the year under report, and the Commissioners anticipated that two wings would be completed within that year; but the Assistant Engineer to whom the work has been entrusted has only spent a little above Rupees 2,500 and completed one wing, with the central well, and made a commencement on the other, which is at present in progress.

16. *Small-pox Hospital.*—This is an adjunct to the Civil Dispensary, located at a distance from it, which cannot admit of small-pox patients for obvious reasons. This was built long before out of the dispensary private contributions, but being found ill-adapted to its object, was inproved in the year under review at the suggestion of the medical officer, and has been put in an efficient state at a cost of Rupees 197, which may be regarded as small, considering the benefits it now affords to persons afflicted with that dangerous disease.

17. *Gun Powder Magazine.*—The necessity for this building was noted by the Commissioners in their budget of the year under report, and a sum of Rupees 2,000 was allotted for the work. The Government, however, referred in their Proceedings, dated 6th April 1872, No. 460, Financial Department, the advisability of the construction of the building to the Magistrate of the district, and allowed the allotment to remain in the budget pending his report. The construction was eventually sanctioned after the close of the year. No expenditure, therefore, appears in the accounts of the year. It may not be out of place to mention here that the allotment was repeated in the current year, and that the building is now being undertaken.

18. *Repairs—Communications.*—The unsual and prolonged duration of the well-known heavy rains on the coast in the year under review injured our roads to a considerable extent which necessitated their repairs over and over again to render them efficient, and this object could not have been acquired unless an unusually large sum of Rupees 5,939 was expended. They are in excellent order.

19. *Grant* II., *Education Result Grants.*—The expenditure under this head, amounting to Rupees 957-12-0, is a little above the budget provision. The Government and the private schools here, the Commissioners think, answer the needs of education in this town. They, therefore, consider it unnecessary to establish any schools of their own. The Commissioners h[illegible]ontributed a sum of Rupees 530 to the Local Fund for Educational Inspectorate.

20. *Grant* III., *Sanitation and Medical Services.*—(*a.*) *Mangalore Civil Dispensary.*—The financial transactions connected with the institution is shown in the accompanying Statement I.-A. When it came into the hands of the Municipal Commissioners, 1,000 Rupees invested in Government loan appeared in the receipts of the previous year. This amount is shown in the accounts as funded capital. Setting it apart as yet unappropriated, the assets of the year under report amounted to Rupees 2,053, inclusive of the allotment of Rupees 800 received from the Local Fund Board, and the charges to Rupees 2,449, the excess of Rupees 396 in the latter being borne out of the Municipal Funds proper. But if this excess in the expenditure is to be deducted from the funded capital of Rupees 1,000, the amount to the credit of the dispensary will be reduced to Rupees 604, with the aid of which and the ordinary receipts of the current year, inclusive of the Local Fund contribution, the current year's expenditure can scarcely be borne without larger encroachment on the Municipal Funds. The Commissioners will, therefore, have apparently to look to a larger contribution from the Local Funds, or to share the excess charge between the Local and Municipal Funds. When such necessity actually arises, special application will be submitted.

21. As required by G.O., No. 209, dated the 2nd March 1872, a copy* of the report of the medical officer in charge of the dispensary for the year under report is herewith forwarded for the information of Government. The Commissioners hope it will be found satisfactory.

* Enclosure B.

22. There is a marked increase in the number of patients treated at this charitable institution, which shows its growing popularity. Much credit is due to Dr. Dempster for the unremitting zeal which that gentleman evinces for the people generally.

	In-patients.	Out-patients.
1868-69	... 146	3,531

1871-72	... 164	4,488
1872-73	... 180	5,622

23. (*b.*) *Vaccination.*—The Commissioners have entertained two vaccinators on a salary of Rupees 10 each, and they are placed under the immediate supervision of Dr. Dempster. The work performed by them is satisfactory. There is a strong prejudice here, as in some other districts, against the vaccination of infants, and in order to meet it the Commissioners endeavour to make it widely known that the operation is more effectual at this stage than at a late period of life. With a view to promote this safeguard against one of the most threatening and prominent epidemics, I have, with the full consent of the Commissioners and on Dr. Shortt's recommendation, placed in the hands of Dr. Dempster a sum of Rupees 50 for petty rewards to the people of the poorer class coming forward to be vaccinated.

Total vaccinated		1,584.
Successful	1,383	
Unsuccessful	139	
Unknown	62	
	——	1,584

24. (*c.*) *Registration of Births and Deaths.*—The Registrars here are Potails appointed, with the concurrence of the Collector of the district, to exercise [illegible]s prescribed by the Act within their revenue jurisdictions falling within the municipal limits, and due notice of these appointments has been given for the information of the public. Care has been taken to put up their names in conspicuous places on or near the outer door of their dwelling-houses. The public have been instructed that the failure on their part to supply these Registrars with the prescribed information of births and deaths is made penal under Section 94 of the Act. The Registrars are required to furnish to this office a monthly list of defaulters with a view that they may be prosecuted before the Magisterial authorities. The Commissioners have often tried to interest the Registrars in their work and teach them to appreciate its importance to the well-being of the community. Notwithstanding these precautions, the Commissioners find that the registration is still defective, though a change for the better has already been effected. The outturn of the year is given in the accompanying summary, Enclosure C.

25. (*d.*) *Conservancy.*—The charges under this head, the Government will observe, exhibit an increase over the budget, but this is owing to the municipal contribution for the conservancy of the Military Cantonment for the year 1871-72, not discharged in that year, having been paid during the year under report. The Commissioners are glad to think that the freedom of the town from epidemics is mainly due to the improvement effected in the general cleanliness, consequent on the conservancy clauses of the Act having become better understood, and having been more strictly enforced. The latrines in the private compounds are well cleaned by the municipal scavengers. The want of public latrines, much felt by the people, has been in part supplied. To these measures and the diffusion of vaccination may be attributed the general healthiness of the town.

26. *Grant* IV., *Miscellaneous Municipal Purposes*—(*a.*) *Lighting.*—One of the great desiderata of the town's-people has been lighting of their streets. An allotment of Rupees 1,000 was sanctioned by Government, but only so much as Rupees 215 were spent during the year. It is in this year that the lighting has been first undertaken. Twelve lamps were set up and twelve have been added in the current year.

27. (*b.*) *Watering Streets and Planting Avenues.*—Such of the streets in the town as are much frequented by people were watered in the hot season so as to lay the dust, and this contributed considerably to general comfort.

28. (*c.*) *Maintenance of Fire engine.*—The Municipality maintain two engines —one in charge of the Police, and the other of the Officer Commanding. In cases of fire they are of valuable assistance. The Commissioners have spent a sum of Rupees 275-2-0, the greater portion of which consists of the rewards paid to the men who worked the engines on the occasions.

29. (*d.*) *Time gun.*—Two lascars are maintained to fire the gun at a monthly cost of Rupees 10, or Rupees 120 per annum, old powder being supplied as heretofore by Government gratis, under which condition the gun has been taken charge of by the Municipality.

30. *Grant* V., *Supervision and Management.*—A provision of Rupees 2,320 was made under this head in the budget of the year under report, and the actual expenditure is within that sum. The several items of this grant are usual, and call for no particular remark.

31. *Closing Balance.*—The closing balance amounts to Rupees in lieu of Rupees 150 assumed in the budget. This is chiefly owing to the provision made for the construction of the market-house not having been fully used in the year, and to an allotment of Rupees 2,000 conditionally reserved in the budget not having been finally sanctioned by Government until after the close of the year under report.

32. I beg to apologize for the delay that has taken place in submitting this report, the cause of which has been explained in my letter of the 9th instant, No. 146.

From J. W. BOYS, Esq., Auditor of the Municipal Accounts, Mangalore, to H. S. THOMAS, Esq., President of the Municipal Commission, Mangalore, dated Mangalore, 10th October 1873.

Having completed the audit of the municipal accounts for the year 1872-73, I have now the pleasure to submit my report on the same.

2. I have examined each item in the day-book of receipts and expenditure book, and compared them with the cash-book and their respective vouchers, &c., and beg to forward, herewith, a list of the errors and differences found thereby.

3. I would call the attention of the Commissioners to the practice of allowing the peon collecting subscriptions, &c., for the Civil Dispensary, to retain the amount in his own possession for a considerable period after collection. I observe that a subscription collected on the 11th January, and others collected in that month, are not passed to the credit of the Municipality until the 27th of the following month. In the same manner a travellers' bungalow fee, Rupees 17, collected on the 14th October, is not passed to credit till the 5th November.

4. I find that the registers of notices of demand contain a record of all notices of demand issued, but in certain cases, where the bill upon which the notice is issued is paid before the notice is served, the claim to the fee is waived, but the notices remain recorded in the register,

which thus ceases to be trustworthy as the only check upon the entry of the fees in the day-book of receipts.

5. The work of the Auditor would be considerably lessened by the observance of more order and neatness in the keeping of the books, *e.g.*, the underlining of headings and columns of figures or single amounts when carried out into totals, &c.

Annual Medical Report on the Mangalore Dispensary for the Year 1872-73.

The charity is in a very satisfactory state, and, as regards out-patients thoroughly appreciated, and the return shows a considerable increase over former years, but the number of in-patients remain much the same, and, with the exception of accidents, they consist principally of the poorer classes.

2. Well-to-do people will not, as a rule, come into hospital.

3. The following is a comparative statement of patients treated during the last five years :—

In 1868-69,	146	in-patients,	3,531 out-patients.
1869-70,	140	,,	3,282 ,,
1870-71,	198	,,	2,443 ,,
1871-72,	164	,,	4,488 ,,
1872-73,	180	,,	5,622 ,,

Self-supporting patients during the year, three.

4. In consequence of the considerable increase of patients, the Hospital Assistant was overworked, and the Municipal Commissioners sanctioned the entertainment of a writer to keep the books, and who also assists in vaccination in the town.

5. During the past year the building has been much improved by the addition of a substantial portico ; a new dead-house outside the compound is being constructed and will be completed within a few weeks.

6. A new cook-room, store-room, and dead-house has been erected in the compound of the Small-pox Hospital.

7. Ample funds have been provided by the Municipal Commissioners for the support of the charity.

8. Appended is an abstract return of patients treated during the year.

Refunds...	100	102
Balances	150	9,042
Total ...	28,620	35,477

2. The amount shown in the abstract given above includes only the floating balance of the dispensary, and the same plan should be adopted in future in the municipal statements, the invested capital finding a place in column 2, Statement I.-A. The entries in column 2, Statement IV., Current, should correspond with the entry under the same head in Statement I.-A, refunds appearing in the column headed "Remitted on appeal or otherwise," except where the refund has been of collections in excess of the demand, in which case it need not appear in any of the prescribed statements.

3. The increase under "House-tax" is ascribed to a careful revision of the assessment. The Government concur with the Commissioners in deeming it satisfactory that the uncollected balance was smaller than in previous years, although the number of coercive processes issued was much fewer. The decrease under "Tax on Arts, &c.," was owing in great part to arrears being written off as irrecoverable for satisfactory reasons. The collections under "Tax on Vehicles, &c.," fell short of the estimate by Rupees 266, and not Rupees 350 as stated in the report; and, although they were Rupees 119 short of the collections for 1871-72, the

Commissioners consider the result fair as the tax is so open to evasion. The receipts from Tolls amounted to Rupees 1,009, or only eleven per cent. below the amount which the Commissioners expected to realize with double the rates sanctioned. The President explains that the impost falls entirely on Mysore and Coorg traders who send their produce to the coast—an explanation which would indicate that the receipts should be credited to Local Funds rather than to the Municipality; but, as the amount thus realized falls so very far short of the expenditure on Communications, the Government will not insist on any change in the existing arrangements.

4. The short expenditure on New Works is owing to slow progress in building the new market and to the utilization of the allotment for the Gunpowder Magazine having been deferred pending the sanction of Government. The unusually large outlay on repairs to roads followed on the damage done by the exceptionally heavy rains, and, as the roads are reported to be now in excellent order, the large excess of the expenditure over the budget allotment is approved. The Commissioners consider that the educational wants of the town are fully met by the existing institutions, and the Government observe that the amount paid as results grants alone exceeded the whole expenditure on education in the previous year. The contribution for the Normal School does not appear to have been paid within the year. The dispensary appears to have worked well, and the large increase in the attendance under municipal management is very gratifying. The Government consider that as a general rule the accumulated funds of a dispensary should not be drawn upon except for permanent improvement, and as the institution opened this year with a floating balance of Rupees 1,053, or more than the expenditure on the buildings, the funded capital should be allowed to remain intact and the negative balance of Rupees 396 defrayed from municipal funds, in which case the municipal balance will be reduced as shown in the abstract. The conservancy of the town appears to be well carried out, and the Government are especially glad to notice that private latrines are common and are kept clean by the municipal scavengers. The short expenditure on lighting is to be regretted. The unspent balance was reduced during the year by Rupees 4,769, and with the market and magazine to complete, and the system of lighting merely in its infancy, there is ample room for its utilization within the current year.
