I HAVE the honour to forward, for sanction, five estimates for the works, as per statement shown below, included in the budget of petty construction and repairs for 1873-74, and to state that the Salt Deputy Collector, having represented that the channels at the several Salt Stations require to be cleared forthwith for facilitating the manufacture and transport of salt, I have, considering the urgent character of the work, directed its execution to the limit of the budget grant, and requested the District Engineer to expedite the estimate for other channels, with a view to putting them also in hand at once. On the receipt of these and other estimates, I will again address the Board:—
