14th August 1874.

No. 131. Read the following letter from the District Engineer of Kurnool (through the Public Works Department), dated 26th June 1874, No. 48 :—

ABSTRACT.—Report on Munro's Choultry and well at Pattikonda, Kurnool District.

No. 131. ORDER THEREON, 14th August 1874, No. 1,025.

Miscellaneous.

ORDERED that the Acting District Engineer's letter be referred to the Collector for report, through the Board of Revenue.

2. The question as to the means to be adopted for increasing the water-supply in the well need not be touched upon, but it should be stated whether the channel to the village is still required, or whether the well is already sufficiently utilised.

I. 67 before the Resumption of this work by the Government Lord Napier visited it & as the result of his inspection he recommended that the well, which appeared to him to be insufficient if used, should be utilized by having a channel constructed from it to the village so that the waters might be conveyed there.

The work has been delayed & in order submitting revised estimates the District Engineer questions the utility of the work as there is already a channel to the village from 2 tank. He says further that the villagers do not want their proposed channel from the well

3. Lord Napiers chief reason for suggesting the construction with a desire to make the well useful & keep it filled but from the District Engineer's letter it would appear that more the well is fully utilized in supplying water daily to a tope & paddy fields." He is indeed desirous lest the wells should fail.

4. It seems probable that the condition of things has altered since Lord Napiers visit

and it is suggested that the Collector should be called on for a report through the Board
