be allowed to collect and administer funds for village improvements whilst introducing the new settlement.

2. Mr. Puckle now reports that he has collected and spent Rupees 11,734 during the settlement of the Tinnevelly Taluq. The results achieved are far more than proportionate to the sums expended, and show that the Board were justified in recommending that an unusual amount of discretion should be left to Mr. Puckle in this matter.

3. The greater part of the money, viz., Rupees 11,361, was obtained by selling rights of occupancy in pieces of waste and Peramboke. It appears to the Board that no objection can be taken to this. No right of Government has been surrendered, but, on the contrary, the revenue has been improved. The only persons who could have any reason for objecting are the villagers, and they seem to be satisfied for no complaints have been received from them in this office.

4. Rupees 373 were obtained by selling trees. Mr. Puckle ought to have obtained previous permission before he sold the trees and applied the proceeds in village improvements, but permission would undoubtedly have been given if it had been asked.

5. The statement shows that in the village of Tirumaleikondupuram Rupees 762-8-0 were obtained by selling the right of occupancy of house-grounds for the extension of Nattam, etc. Mr. Puckle will report whether the land for the extension was granted by competent authority.

No. 250. Read the following Proceedings of the Board of Revenue, dated 15th January 1874, No. 59 :—

Read the following letter from R. K. PUCKLE, Esq., Collector of Tinnevelly, to J. GROSE, Esq., Secretary to the Board of Revenue, dated 26th November 1873, No. 680 :—

With reference to Board's Proceedings, No. 466, dated 27th March 1873, I have the honour to report that during the settlement of the Tinnevelly Taluq I have succeeded in getting the following works wholly or partially carried out by the villagers, without any cost to Government, in the manner indicated in paragraph 2 of my letter embodied in the Board's Proceedings :—

(1.) A road, eight miles in length, from the bridge across the Tambrapurni, at Tinnevelly, along the south bank of the river eastwards to join Road No. II. at Tirutu.

(2.) A road, two miles in length, from the bridge along the south bank of the river westwards to Melnattam.

(3.) A road, five miles in length, from Velagam to Sultamali.

(4.) Several minor cross roads connecting villages with each other or with some main road or river.

(5.) The construction or repair of several tanks, sluices, bridges, etc.

2. The accompanying map exhibits these several works, and the account shows the amount paid into my Lands. The roads newly opened a red line in the map.

3. In all Rupees 11,734 were received, but the work done is worth at least twice this amount, as the collections in many villages were disbursed direct by the villagers.

4. In no single case was any land sold outright, but the right of occupancy on payment of the taram assessment of certain water-holes, swamps, mounds, etc., all of which require considerable further outlay to bring under cultivation, was sold, and the future revenue to be derived from these lands will be a direct gain to Government.

5. The works selected are all very useful, and, the roads being all in the river valley, afford a means of communication across the rice-fields that in some cases save miles of detour. They were selected by the villagers concerned, and my Special Assistant, Vencata Chariar, was mainly instrumental in reconciling conflicting interests and arranging the many details connected with laying out the lines of road, procuring the land required, raising the needful funds, and pushing on the works towards completion.

The form of this Return now in use contains 65 columns the one above now proposed only 35, it is believed that nothing important has been omitted, while the spaces for entry of figures, which in the old form were very small indeed, are now nearly twice the size.

The omissions are.

1. Minor Circuits As it is never possible to tell how many Minor Circuits remain to be surveyed in a District the entries under this head should have no place in this Return, the number completed each month is shewn in the Return of work.
2. Village traverses set up } These are omitted for the same reason given for omitting them in the
3. Boundaries plotted } Monthly Return of Work.
4. Under the heads "Finally tested" and "Maps sent to Central Office" it does not appear necessary to show Area the number of Maps Completed and remaining under these heads is all that is necessary.

Revenue Settlement Office,
Madras, 22 June 1870.

From

G. Bunbury Esqre
Ag. Director of Revenue Settlement

To

R. A. Dalyell Esqre
Ag. Secretary to Government
Revenue Department

Sir,

In accordance with the instructions contained in the Government Order dated May 11th 1870 No 687, I have the honor to report regarding the returns and forms in use in this department, objected to as recommended, whether practicable, advisable, and desirable, and subsequent submission.

2. I may state at the outset that this office being one of comparatively recent creation and engaged upon special work, the returns and forms are nothing like those of a collectorate, since the duties are of a far more miscellaneous character. In this Office our reports and returns are but few in number, and I can only suggest modifications to a small extent.

3. The Monthly returns received at this office are as follows.

Report

X Rc 2205/10

Inclosure to letter

Rev 10/2205/10

the Accountant General
and appertainments, and
disbursement are acted
up to.—

Cyhn Postage Bills, with detailed statements in duplicate.—

The original Bill with statements go to the Board with Director's countersignature, and duplicate is retained in this Office. The duplicate is not only necessary for reference, but also enables the Director to see when and where the deputies have been during the past month, and how much they have drawn about their charges.

Statement of Charges.

This shews how the expenditure has been debited to each work, and is necessary as far as regards the outlay in this department. But a return of somewhat similar kind comes from Colonel Priestley and is only "accepted." As there is no good to be gained by the scrutinizing of this Account from the Survey Office it may as well cease.—

1 Returns of Progress of Work executed and by each Party, to be contained in the following Heads.

1 Statement of Measurements and of Village Communities.

2. —do— do— Field Boundaries.

3. —do— do— Roads, Footpaths and Village or Hamlet Sites.

4. —do— do— Classification of Cultivation.

5. —do— do— Rivers, Lakes and Village or Hamlet Sites.

6. —do— do— Towns and Villages and Hamlet Sites.

7. Remarks of Superintendents showing what they have done and what work they still have to execute.

This Report should be considered in all its parts as the Return from the State of Progress of the Survey, and should contain what Villages have received what they have not received but ought to have what Lands have been measured what remains to be measured what is to be executed next. What is the cost of the Establishment employed on the Survey during the period to which the Report refers, stating the Pay of each Class of Officers employed, and the Number of each Class employed in the Survey, distinguishing the Establishment employed in the Survey of Cultivation from that employed in the Survey of Villages and Hamlet Sites.

2 Tabular Statement of Progress of Work.

This is to be a Tabular Statement of the Progress made in the Survey of the several Districts in which Work has been executed during the Year, and of the Progress made in the Survey of each District during the Year, and of the Progress made in the Survey of each District during the Year, and of the Progress made in the Survey of each District
